

K-2 Recommendations for Hangouts Meet

Inviting Students to Join

Students in grades K-2 do not currently have access to email, therefore, the “Add People” feature, shown in the yellow box below, will not work to add students in K-2 when you create a Meet room. The following are some recommendations to share the join link, highlighted by the red arrow, with your students:

1. Post the link on Google Classroom or Seesaw for students to join at the scheduled time.
2. Add the link to your daily schedule at the appropriate time.
3. Add the link to a Slides presentation that you share with the students.
4. Generate a QR code and share with parents.

*Note that if you send students a QR code, they will not be able to view it on their device and scan it on the same device.

‘Meet’ing with Students for the First Time

The images linked below can be shared with students prior to your Meet to help them prepare for their first video conference with you and their classmates!
