

WTL- 2019 Pattern

Assignment No-4

Login Form using Java Script

```
<html>
<head>
<script>
function f1()
{
var un=document.getElementById("t1").value;
var pw=document.getElementById("t2").value;

if(un == "admin" && pw == "java" )
{
alert("Welcome You are Successfully Logged");
window.location="calci.html";
}

else
{
alert("Wrong Username or Password");
document.getElementById("t1").value="";
document.getElementById("t2").value="";
document.f2.t1.focus();
}
}

function tog() // Function to Show or Hide Password
{
var y = document.getElementById("t2");
if (y.type === "password" )
y.type= "text";
else
y.type="password";
}
</script>
</head>

<body>
<form name="f2">
<table border=1 align=center>
```

```
<caption>Login Form</caption>
<tr>
  <td>UserName</td>
  <td><input type=text id="t1"></td>
</tr>

<tr>
  <td>Password </td>
  <td>
    <input type=password id="t2">
    <input type=checkbox onclick="tog()"> Show </td>
</tr>

<tr>
  <td colspan=2 align=center>
    <input type=button value="Login" onclick="f1()">
    <input type=reset value="Cancel">
  </td>
</tr>
</form>
</body>
</html>
```
