Re: Oral Health Assessments

Deborah Massenburg, Public Health Dental Hygienist, will conduct dental screening on **9/29/2022**.

1. Dental Screening will take place in the SCIENCE LAB this year. Classroom teachers should pull their students' health cards from the cumulative folders. Students and their health cards should be placed in alphabetical order.
2. ***Students should wear their name badge to dental screening if available.**
3. The schedule for the day is tight; it is extremely important for each class to arrive on time.

If your class is scheduled for the screening after breakfast, lunch or snack please give the students a chance to rinse their mouth before you bring them to be screened. Thank you for your assistance.
