

Lady has now delivered EIGHT (8) puppies so they will be quite young during transport. As we always do, we are doing double legs to reduce stress & make things easier on this family.

And we have a way you can enjoy family time at the beach (Outer Banks/Duck, NC) over Thanksgiving (11/17-11/24/17) AND help MAMAS with all their vet bills! You can purchase \$5 tickets to win your chance by sending payments through PayPal to mamastransportmgr@gmail.com. (Do NOT use the word raffle! You must say it is to purchase tickets!) The house is 4 bedrooms and 3 full baths - Jacuzzi in master bath! Tickets on sale until 8/6.

Saturday Transport Monitor also needed!

Sunday Monitor - Leigh Ann

End of transport for Lady + 8 puppies

PASSENGER INFORMATION:

ADULT DOGS:

NURSING MOMS WITH PUPS & PREGNANT MOTHERS:

Nursing mom & young (4 weeks & younger) pups: Moms with nursing pups will come in a crate OR kiddie pool they are to stay in for the whole trip. PLEASE MAKE SURE THE CRATE WILL FIT IN YOUR VEHICLE GIVEN THE CRATE MEASUREMENTS. Moms can come out of the crate at the stops to go to the bathroom or just for a break from the pups. Be aware that some moms will be fine on transport & having people around their pups but others may not understand the situation and will be protective of their pups. If a mom does not want to come out during a stop that is fine. However, if the mom does come out for a bit, you **NEED to wipe her paws off with a baby wipe or alcohol wipe BEFORE mom gets back in with her pups** in case there was something on the ground she could have picked up. Please provide the moms with food & water at each stop. Food & water can be provided during the drive if you can keep the bowls attached to the crate door so puppies don't accidentally get in them. Please do NOT handle the pups except to count them & make sure they are ok. YOU MUST WEAR MEDICAL WEAR GLOVES WHEN HANDLING THE PUPS! Mom will feed the pups so please do not feed them or give them Nutri-Cal unless otherwise instructed to do so.

SHR Passenger: Lady + 8 puppies

Breed: black/white mix

Age: **(NO paws on ground)**

Weight: 50lbs + puppies

Gender: female

Altered: To be done by rescue/adopter by contract

Crate: Yes - dimensions to be provided

Vaccinations: UTD

Known medical/behavioral problems: None known

***** DISCLAIMER *****

I am dependent on what the senders tell me about our passengers' temperaments. The very nature of rescue transport creates some risk for those who participate; even a good-natured animal may find it stressful to be passed from stranger to stranger and cooped up with other unfamiliar animals, and therefore may act in uncharacteristic ways.

As a Volunteer Transport Coordinator neither I nor anyone associated with this transport can accept liability for any accidents or incidents that may occur during the transport.

By agreeing to transport you acknowledge that risks are involved and agree not hold anyone involved responsible should an incident occur. All rescues have been screened and approved.

Please note that passengers may change, and that passenger descriptions are from the sending contacts and may be subject to change. We do our best to ensure that all animals are healthy and of sound temperament, but please keep in mind that transport is stressful and can cause previously unknown health/behavior problems to surface.
