

To the Editor-in-Chief,

I am pleased to submit our manuscript entitled

AI-augmented networked control systems subject to network latency and packet loss

for your consideration for publication in Emerging Trends in Engineering and Sustainability (ETES).

This manuscript presents a significant and original contribution to the field of *[AI engineering]*.

The work addresses the fact that [Networked Control Systems (NCSs) are progressively utilized in critical infrastructure; yet, their efficacy is frequently undermined by communication deficiencies, including time-varying delays and packet loss.]

[These findings highlight the capacity of ensemble learning methods to improve resilience and operational safety in contexts susceptible to delays in NCS.]

We believe it fits well within the scope and objectives of ETES.

We affirm that the manuscript is original, has not been published previously, and is not under consideration for publication elsewhere. All authors have read and approved the manuscript.

We appreciate your consideration and look forward to your response.
