

A collection of folktales of the island, research from Teague and his compatriots, and other miscellaneous lore through in-universe characters

### **Teague's Research-**

-  A Dissertation on Naming - an exploration of the Heartnames of the various island species. Slightly outdated, only runs up to the Age of Discovery event and the release of Pachys and Suchos. Not entirely up to date with my own current perception of the lore either.
-  Anthology on the Island's ways - an IN PROGRESS exploration of the islands customs and cultures- currently only contains that of cryos

### **Cowbird's letters-**

-  An Expansion on Sharpclaw Heartnames and Language on the Archipeligo - what it says on the tin

### **Folktales-**

-  past tales from the island - currently only contains the story of the styra Awakening
