		Ch 9, pgs 290-296	296-301	301-305
13	14	15	16	17
305-309	309-314	314-319	319-323	*Quiz Ch 9 Ch 11 364-372
20	21	22	23	24
Pres. Day	372 375	375-379	379-384	384-389
27	28	29	March 1	2
389-393	*Quiz Ch11 396-403	403-406	Review	Review
5	6	7	8	9
U6 MC	U6 FRQ			

*Please note: We are placing Chapter 12 Key Issue 2, 3, and 4 with our Urban Unit.

Important Dates:

February 25th - AP Review Day #3, either 8:30AM or 12pm, East HS *registration online

May 12th - AP Practice Exam, 8AM - 12PM, Central HS Library *test grade

May 18th - AP Exam, 7:30AM

Portfolio Questions:

- 1) What is “development”? How do we measure development based on economic, social, and demographic factors?
- 2) What are “MDCs” and “LDCs”? Where are they located? Describe each region within MDCs and LDCs.
- 3) Identify the GDI and GEM and explain how they relate to gender inequality in our world.
- 4) Contrast the two approaches to development that LDCs take - what are they, how do they work, what are the pitfalls?
- 5) Explain each level of Rostow’s Development Model in your own words.
- 6) Describe the qualities and traits of each of the four main industrial regions in the world.
- 7) Describe the factors that go into distribution of industry. Specifically analyze situation factors (inputs, markets) and site factors (labor, land, and capital).
- 8) Describe areas where industry is shifting or expanding. Why is this happening? What is moving there?

- 9) Explain the ideas behind three major industrial phenomenons: outsourcing, just in time deliveries, and fordism/post-fordism.
- 10) Identify the three types of services in the economy - expand on each.
- 11) Identify and explain rural settlements - both clustered and dispersed.

Vocabulary (45): *remember - sometimes it is not as simple as a definition.

Agricultural labor force	Ecotourism
Dependency theory	Entrepôt
Development	Export processing zone
Foreign direct investment	Fixed costs
Gross domestic product (GDP)	Footloose industry
Gross national product (GNP)	Four Tigers
Human Development Index	Industrial Revolution
Levels of development	Infrastructure
Measures of development	Labor-intensive
Neocolonialism	Maquiladora
Purchasing power parity	Multiplier effect
Rostow, W. W. -“Stages of Growth” model	NAFTA
World Systems Theory	Outsourcing
Agglomeration	Just in Time Delivery
Assembly line production/Fordism	Postindustrial
Bid rent theory	Refrigeration
Break-of-bulk point	Special economic zones (China)
Canadian industrial heartland	Threshold/range
Deglomeration	Transnational corporation
Deindustrialization	Variable costs
Economic sectors	Weber, Alfred
Economies of scale	(Weight) Bulk-gaining
	(Weight) Bulk-losing
