How I Set Up My AI — Student Discussion: Module 1

This doc is for everyone watching Module 1 of this course to talk with each other.

Leave a comment next to any lesson below -- something you tried, what's working for you, a question for other students. Other students can reply to your comment.

I don't read or monitor this doc. For help with a lesson, ask your own AI, or my ProBot if you use it: it has all my course material. To ask me something directly, come to my free public Q&A call, which I host once a month: www.georgekao.com/qa

How to comment: select a lesson title below, then click the comment icon that appears on the right. You need to be signed in to a Google account, and your name shows next to your comment.

--George Kao

Module 1 — Getting It Running

Reminder: I don't monitor this doc. Ask your AI (or my ProBot) about a lesson, or ask me at my free monthly Q&A call: www.georgekao.com/qa

01 — 1.0 · Start here: what you're about to have

02 — 1.1 · Download the AI desktop app of your choice

03 — 1.1a · Claude or ChatGPT? And using both.

04 — 1.2 · Your AI is your tech support

05 — 1.3 · Already comfortable? Take the shortcut

06 — 1.4 · Real talk about privacy

07 — 1.4a · Supplement: "But isn't AI learning to hack and lie?"

08 — 1.4b · Supplement: How much access I actually give it

09 — 1.5 · Which folders to point it at

10 — 1.6 · Make sure those files are really on your computer

11 — 1.7 · Which door to use — and the one we're using

12 — 1.8 · Your project, and two key settings

13 — 1.9 · Chrome, and why it's required

14 — 1.9a · Supplement: Hand my browser lessons to your AI

15 — 1.10 · The 60-second check that it really worked

16 — 1.10a · Supplement: A day in the life with my assistant
