

Privacy Policy for EventCents

Effective date: 13th March 2026

Last updated: 13th March 2026

EventCents ("the App") is an offline event planning and budget management application designed to help users organize events, track budgets, manage vendors, monitor payments, and maintain planning checklists.

This Privacy Policy explains how EventCents handles user information.

1. Overview

EventCents is built as an **offline-first application**. The core functionality of the App works without requiring an internet connection, and user data is primarily stored locally on the user's device.

We value user privacy and aim to keep data handling minimal, transparent, and secure.

2. Information We Collect

At this time, **EventCents does not collect, store, transmit, or sell personal data on external servers** as part of its core functionality.

The information you enter into the App may include:

- event names and descriptions
- budget amounts
- category and expense details
- vendor information
- payment records
- task checklists
- notes and reminder-related information

This information is stored **locally on your device** and is used only to provide the App's features.

3. How Your Data Is Used

The data you enter into EventCents is used only for app functionality, including:

- creating and managing events
- tracking budgets and expenses
- managing vendor details
- calculating balances, dues, and summaries
- showing dashboards and progress indicators
- managing reminders and deadlines

We do **not** use your data for advertising, profiling, or resale.

4. Data Storage

All core user data is stored locally on your device using on-device storage technologies.

This means:

- your event planning data remains on your device
- the app does not require account creation to function
- your core data is not uploaded to a remote server by default

5. Internet and Network Use

EventCents is designed to function offline.

If future versions introduce optional features that require internet access, such as cloud backup, export sharing, sync, analytics, or third-party integrations, this Privacy Policy will be updated accordingly before those features are made available.

6. Notifications and Reminders

If you enable reminders, EventCents may request permission to send **local notifications** on your device.

These reminders are used only to help you remember:

- payment due dates

- vendor follow-ups
- task deadlines
- event countdowns
- planning alerts

These notifications are generated locally on your device and are not used to track you.

7. Permissions

Depending on the features available in your version of EventCents, the App may request limited device permissions such as:

- **Notifications** — to deliver reminder alerts
- [Optional future] **Storage / Files access** — if export, import, or attachment support is added

The App only requests permissions necessary for its features.

8. Data Sharing

EventCents does **not** sell, rent, or trade your information to third parties.

Because the App currently works offline and stores data locally, user data is generally not shared externally by the App.

9. Data Retention

Your data remains on your device until:

- you delete it within the App
- you uninstall the App
- you clear the App's local storage through your device settings

Please note that deleting the App may also delete locally stored data unless you have separately backed it up through your device or operating system.

10. Security

We take privacy seriously and aim to minimize data exposure by keeping core user data on-device.

However, no device or software environment can guarantee absolute security. Users are encouraged to keep their devices protected with appropriate security measures such as screen locks, device encryption, and updated operating systems.

11. Children's Privacy

EventCents is not directed specifically to children under the age required by applicable law in their jurisdiction.

We do not knowingly collect personal information from children through remote servers as part of the App's current functionality.

12. Your Choices and Control

Because EventCents stores core data locally, you remain in control of your information on your device.

You can generally:

- edit or delete your data inside the App
- disable notifications in your device settings
- uninstall the App to remove local app access

13. Third-Party Services

EventCents currently does **not** rely on third-party advertising SDKs, account systems, or remote analytics services for its core offline functionality.

If future versions include third-party tools or integrations, this Privacy Policy will be updated to clearly explain what data is involved and why.

14. International Users

Since EventCents stores data locally on the device for its current offline functionality, cross-border transfer of personal data generally does not occur through the App itself.

If future cloud-based features are added, applicable cross-border data handling details will be described in an updated policy.

15. Changes to This Privacy Policy

We may update this Privacy Policy from time to time to reflect app updates, legal requirements, or new features.

When changes are made, the updated version will be published with a revised “Last updated” date.

16. Contact

If you have any questions about this Privacy Policy or EventCents, you can contact:
