# Change Printer Network & Password Using Wireless setup - Using the control panel

1. Gather these settings for your wireless network:

| SSID (Network Name) | The name of your Wireless Network or Access Point. |
|---|---|
| Network Key | The Security Key, Encryption Key, WEP Key, Passphrase or password to connect to your network. |

🖉 *If you're not sure about any of these settings, we may be able to help you find them. Click here(Opens in a new tab) for assistance.*

     - Click **here** for video instructions.

2. Have you previously set up your Brother machine with a wireless network connection?

     - Yes: Reset your machine's network card.  Click here(Opens in a new tab) for instructions.

     - No:  Go to step 3.

3. Start the wireless Setup Wizard:

     a. Press ▲ or ▼ to display **Network** and then press **OK**.

     b. Press ▲ or ▼ to display **WLAN** and then press **OK**.

     c. Press ▲ or ▼ to display **Setup Wizard** and then press **OK**.

4.  If **WLAN Enable?** is displayed, press ▼ (On).  Your machine will search for and display a list of available networks.

🖉 *If your network is set to hide the network name, then it will not appear in the list.  Click below for instructions on how to manually add your network name.*

Add your network name

5.  Press ▲ or ▼ to display your network name and then press **OK**.

*If your network has an Open System and does not use a network key, then the machine will now try to connect.  Go to [step 8](#).*

6.  When prompted, enter your network key and then press **OK**.

*Click [here](#) for help with how to enter text on your machine.*

*If you're prompted to use WPS, you may do so if you don't know your wireless network key.*

7. If prompted, press ▼ (Yes) to apply settings.

8. Your machine will try to connect to your wireless network.

   - If **Connected** is displayed on the LCD, then the connection was successful.  Press **OK** and then go to [step 9](#).

   - If **Wrong Network Key** is displayed on the LCD, then the password or security settings that you entered don't match your wireless network's settings.  Press **OK**.  An error report will print with details. Click [here](#) for helpful troubleshooting steps to help fix this.

   - If **Connection Fail** is displayed on the LCD, then your machine did not successfully connect to your network.  Press **OK**.  An error report will print with details. Click [here](#) for helpful troubleshooting steps to help fix this.

*The Brother machine only supports WPA2-PSK with AES.  If your network uses WPA2-PSK with TKIP you'll receive the "Connection Fail" error.  You may also receive this error if you manually enter the wrong Authentication or Encryption method.*

9. Wait about a minute and then print the Network Configuration report to verify that your Brother machine has acquired a valid IP address from your router.  Click [here](#) for instructions.
