

MTSS Problem-Solving Worksheet (Group or Individual)

Student: _____ Grade: _____ School: _____

Area of Concern:		
Intervention:	Duration of Intervention:	
	Start Date:	End Date:
1. Define the Problem (What is the Goal?) • Determine the gap or difference between the expectation and what is actually occurring in terms of student performance or behavior		
Insert Response:		
2. Problem Analysis (Why is it occurring?) • Hypothesize possible root causes • Analyze supplemental data to support or refute each hypothesis • Validate whether your hypothesis is true based on the additional data		
Insert Response:		
3. Implement Plan (What can be done to solve it?) • Select the intervention(s) or strategies that will address the problem. You may select an intervention from the <i>Intervention Matrix</i> (See tabs at the bottom of page) or speak with your compliance specialist for next steps. • Develop and implement the plan with fidelity		
Insert Response:		
4. Evaluate (Did it work?) • Collect and use school-wide, small group, and individual student data to determine if the plan is working to address the problem • Progress monitor and modify, if necessary • Evaluate the response to the intervention: good, questionable, poor		
Insert Response:		
5. What are your next steps for this student?		
Insert Response:
