ABSTRACT
Abstract written in English maximum 250 words. Abstract is made concise and clear with italic format. Keywords are written after abstract within 1 space. Keywords can consist of 3-5 words or phrases. Abstract contains the purpose of research, method, main result and main conclusion.

Keywords: keywords1, keywords 2, keywords 3, keywords 4, keywords 5

GENERAL GUIDE :*The scientific article is typed 1 space on one A4 size paper sized book, Times New Roman12 with a margin of all edges of 2.5 cm. Number of pages 12-15 pages in the form of 2 columns, including tables and drawings. No footnotes are allowed.*

INTRODUCTION
The introduction contains an explanation of the background of the research, the core issues and objectives.

RESEARCH METHODS
Research method contains explanation about research design, location and time of research, population, sample size and sampling method. It also contains research variables, data collection, data analysis and please attach the ethics test / ethics test number.

RESULTS AND DISCUSSION
This section contains the results of research submitted in the form of narration, tables, and or images and statistical test results with explanation without discussion. Table title is written on it while the title of the image is written underneath it.
The results of research results. Results of research results research results research results.

Sub Section
The results of the results of the results. Results ha result.

Sub Sub Section
The results of the results of the results of the results. Results of results.

Table 1. Relationship of Demographic Characteristics with Independence of Elderly

Variable	Variable	p	Koefisien Kontingensi
Level of education	Ability to prepare meals	0,005	0,508
Job status	Physical activity	0,035	0,509
Type of work	Physical mobility	0,035	0,628

Table 2. Distribution of Respondents

Age	n	Persentase (%)
10-15	1	20
15-20	2	30
20-25	3	50
Total	**6**	**100**

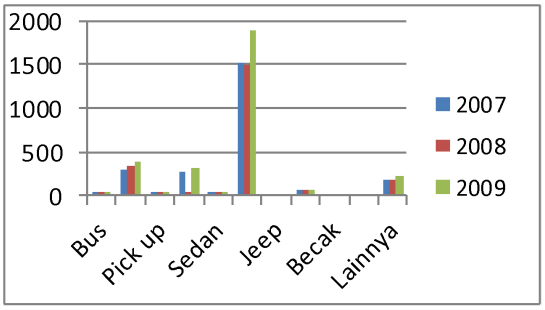

Figure 2. Distribution of Traffic Accident Rate.

The results of the results of the results of the results of the results of the results.

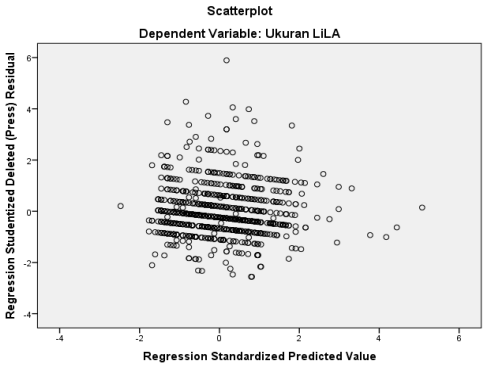

Figure 3. Plot Homoskedastisitas.

The results of the results of the results of the results of the results of the results. Results of results.

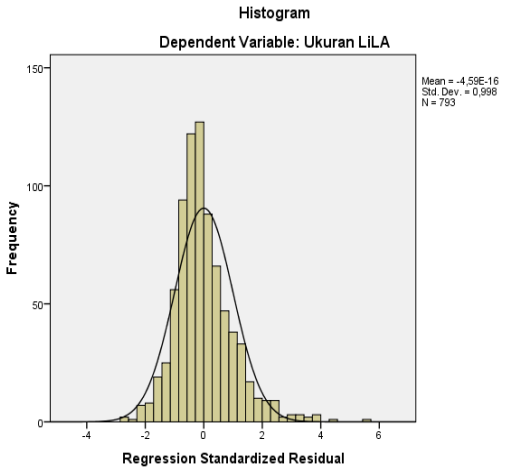

Figure 4. Histogram Normalitas Error.

The results of the results of the results of the results of the results of the results.

DISCUSSION

Discussion is not a rewrite of research results, but should contain a brief statement of important parts of the research results, supporting arguments, discussion of other relevant published research results and the contribution of findings to the enrichment and development of science and technology for the community.

CONCLUSIONS

The conclusion contains a brief statement of the findings as an answer to the formulation of the problem and purpose.

Suggestions contain suggestions for troubleshooting, refinement and technology referring to conclusions.

SUGGESTION

Recommendations consist of the discussion's findings from the conducted research, such as recommendations for further research and the utilization of research findings for the community.

REFERENCES

Reference writing must use the MENDELEY APPLICATION, in the ANGLIA RUSKIN UNIVERSITY-HARVARD style. References are at least 15, have a proportion of 80% derived from the results of research or articles published last 10 years and 20% from other sources such as books and regulations that are still relevant. Writing a Reference when taking from a journal is asked to complete the volume, number and page along with the DOI link.

The reference source must be a primary reference source and not a quote taken from another source. Example: (Notoatmojo in Risma, 2016) should be direct (Notoatmojo, 2008)

Tindatu, H. F., Maramis, F. R., & Wowor, R. (2020). Analisis Peran Pengawas Menelan Obat Dalam Kesembuhan Pasien TB Di Puskesmas Bitung Barat Kota Bitung Tahun 2020. KESMAS: Jurnal Kesehatan Masyarakat Universitas Sam Ratulangi, 9 (7).
