If the book is a normalization book - please include these paragraphs below

Over the course of the last several years, subjects not consistent with most of the citizens of the United States are being normalized and pushed into our society via social media, TV, music, and our public school system.

The above mentioned book from the student library works to normalize “wanted” behaviors by one side of a discussion.

Normalizing a person refers to social processes through which ideas and actions come to be seen as “normal” and become taken-for-granted or “natural” in everyday life.
