

NATIONAL SCIENCE DAY

CELEBRATION BY SCI-MATH CLUB (F.Y.BEd) ON 14th MARCH 2023

The programme started at 10:30am with a periodic table song having the same melody as an aarti. It served the purpose of starting any occasion with a prayer. After the prayer, Mahek welcomed the Principal, teachers and students on the celebration of Nations Science day. She enlightened the audience about the great Indian physicist Sir C.V. Raman and the honor he brought to our country in 1930 by being the first Asian to win the Noble prize in the science category. The theory of Raman effect was explained to the audience in a simple language.

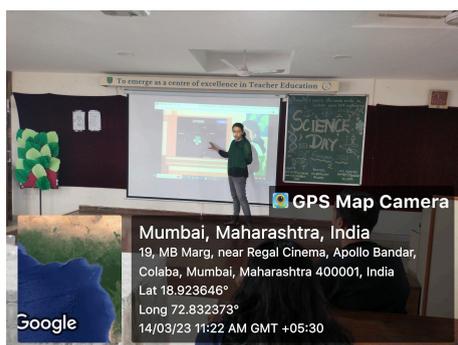

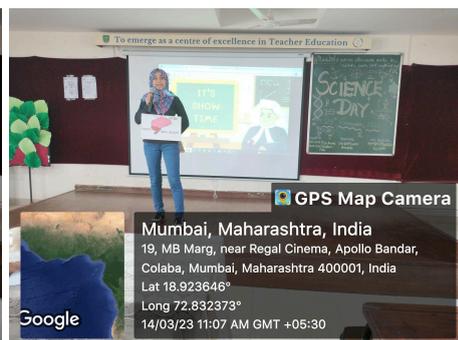

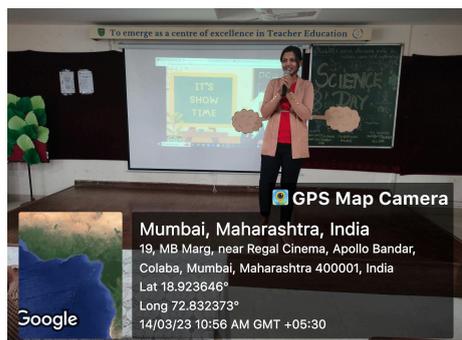

After that Sheetal conducted a game called Chinese whisper in which 10 students from the audience were called. The students were made to stand in a line next to each other and the person on one end was whispered an element's name which was to be whispered and passed on to the person on the other end. Next in the line of programs was a dance performance by based on different elements of the periodic table. The principal, teachers and the audience enjoyed the performance and appreciated the efforts to creatively present topics of science.

After the performance it was time for the fashion show where students came dressed as uterus (Aishwarya), brain (Rimsha), eye (Siennera), cloud (Malika) and dry ice (Saptashree). They came one by one on the stage and spoke about what they had come dressed as and interacted with the audience. This was an interactive activity which imparted knowledge in a very creative way.

NATIONAL SCIENCE DAY

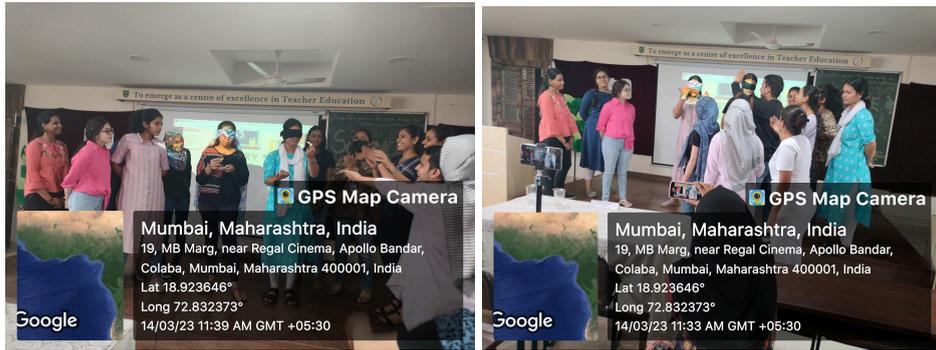

CELEBRATION BY SCI-MATH CLUB (F.Y.BED) ON 14th MARCH 2023

To test the logical and scientific knowledge of the class which included student teachers of non-science background, a quiz was conducted by Iqra on the online platform - Quizziz. The quiz was more of a game where students had to read the statement and guess whether it is a fact or a fiction. The atmosphere had become very competitive as the class was divided into two teams. It was a fun way to impart the knowledge of general science to the students. Another game called Sensory Trivia was conducted by Anuj. It tested the ability to identify things by smell, taste and touch. The participants were blindfolded and were given things like milk powder, corn flour, raw mango, mustard seed, curry leaves, tulsi leaves, etc. The participants were told to describe the smell, taste and touch of the thing before prompting the answer. It portrayed the amazing power of the human senses.

NATIONAL SCIENCE DAY

CELEBRATION BY SCI-MATH CLUB (F.Y.BEd) ON 14th MARCH 2023

The event came to an end after principal Dr. Bhagwan Balani sir, Prof. (Dr.) Rajeev Jha and Dr. Neelu Verma congratulated the Science - Math Club members for the successful organization and conduction of the event. They appreciated the effort of making science fun and comprehensible for all student-teachers irrespective of their academic background.
