

ABB Emergency Stop Push Button - Safety at Your Fingertips!

Stop hazards in their tracks with the ABB Emergency Stop Push Button. This essential tool instantly cuts power to dangerous equipment, ensuring maximum protection for personnel. Its eye-catching red actuator and yellow base make it easy to locate and activate when every second counts. The tough thermoplastic housing resists abrasion and impact, making it ideal for demanding industrial applications. Stay informed with status information with a quick look, thanks to the LED indicator on top.

Key features:

- Mechanical durability of 50,000 operations for long-lasting performance
- Wide operating temperature range (-10°C to +55°C) ensures reliability in harsh environments
- Flame-retardant housing self-extinguishes in under 10 seconds, preventing fire spread

Applications:

- Perfect for food and beverage processing
- Ideal for industrial automation
- Well-suited for distribution centres

Need to reset?

With an easy twist-to-release mechanism you can manually reset the button before the machinery restarts, so you have peace of mind that it's safe to return to work.

When safety matters most, the ABB Emergency Stop Push Button is just the thing. Designed with purpose, this reliable solution empowers you to tackle any project with confidence.
