

Technical Presenter & Communication Liaison

Location:	Fully Remote (Targeting U.S. Business Hours)
Compensation:	\$30 to \$50 / hour (Interview Phase) + 20% Recurring Monthly Residuals
Payouts:	Secure Monthly Distributions via Cryptocurrency

About the Role

We are seeking highly confident, articulate, and camera-ready individuals with exceptional English communication skills to act as the primary, U.S.-based face and voice for our elite technical organization.

In this strategic partnership role, you will collaborate closely with our backend engineering syndicate to secure premium U.S. remote technical contracts. You do not need to be a world-class, hands-on software developer. Your core responsibility is to represent a tailored engineering profile during client-facing video interviews (Zoom, Microsoft Teams, Google Meet) and command technical conversations smoothly.

Our internal technical team provides comprehensive, real-time backend infrastructure, including advanced proprietary AI prompt tools and detailed pre-interview briefing notes. This allows you to effortlessly navigate technical screenings, live coding sessions, and architecture reviews. Once a placement is achieved, our offshore development squad handles 100% of the daily programming, version control, and overnight deliverables.

Compensation & Financial Upside

- **The Interview Phase:** Your time is fully valued. We provide a guaranteed baseline pay of \$30 to \$50 per hour, depending on your communication baseline and camera presence, for every client round you complete (HR screenings, coding evaluations, and final panels).
- **The Placement Phase:** Upon contract assignment, you receive a recurring monthly cut equal to 20% of the client's net contract value for maintaining the client relationship.
- **Financial Example:** A standard corporate contract yields \$12,000 per month. Your passive allocation translates to \$2,400 per month per individual engagement.
- **The Scalability Advantage:** Because ongoing responsibilities are limited exclusively to brief daily client status updates (15 to 30 minutes) using updates pre-authored by our staff, you can easily sustain 3 to 5 client tracks concurrently without experiencing workflow fatigue. Experienced partners regularly scale their supplemental income past \$10,000 per month.

Note on Operational Workflow: This ecosystem is optimized for individuals looking for maximal financial leverage with minimal operational overhead. We manage the technical delivery; you command the communication architecture.

Key Responsibilities

- Represent assigned engineering profiles across all stages of client video interviews with high confidence, clarity, and authority.
- Actively leverage real-time AI assistance dashboards during streaming evaluation rounds to convey precise architectural concepts, algorithms, and technical solutions.
- Maintain a highly professional, visually clean home office setup equipped with a high-definition webcam, clear microphone, and a reliable high-speed internet connection.
- Attend short morning client standup meetings post-hire to read operational progress updates compiled nightly by the engineering team.

Ideal Profile Requirements

This opportunity is custom-tailored for professionals who:

- Possess native or absolute bilingual English fluency characterized by a clear, confident, and professional speaking cadence.
- Thrive under ambient interview pressure and project exceptional presence on camera.
- Are highly tech-savvy and capable of fluidly processing real-time system responses while maintaining dialogue continuity.
- Place an exceptionally high value on extreme scheduling flexibility, financial scaling, and rigorous operational confidentiality.
