**INTRODUCTION (Font size: 12, Book Antiqua, bold, and Capital Letters)**

Clearly state the study's purpose, its contribution to knowledge, and the specific research gap it addresses in your opening paragraph. Support these statements with relevant theories in the subsequent paragraphs. Ensure your introduction includes sections for Research Problems, a Literature Review, and the Research Methodology. Write the entire document, from the Introduction to the Conclusion, with a length of 2,000 to 3,000 words, using either Bahasa Indonesia or English.

## RESULTS & DISCUSSION

The discussion is written to interpret and describe the significance of your **findings** in light of what was already known about the issues being investigated, and to explain any new understanding or insights about the problem after you have taken the findings into consideration. It should connect to the introduction by way of the research questions or hypotheses you posed and the literature you reviewed, but it does not simply repeat or rearrange the introduction; this section should always explain how your study has moved the reader's understanding of the research problem forward from where you left them at the end of the introduction.

The research findings in the form of research data are further discussed or critically interpreted with particular relevant theoretical approach. Data can also be supported with the presentation of tables, images, etc. **Captions for table** is written **above it** with sequenced numbering so that it can be easily referred to, though not put under the pointing sentence/ paragraph. **Line (border)** to the table is made minimalist by eliminating the vertical lines and leaving horizontal lines deemed necessary. **Captions for images** are **placed below the picture**, also with providing sequenced numbering. One page only accommodates a table or an image with a maximum of two-thirds the size of the page (size adjusted as efficiently as possible).

## **CONCLUSION (Font size: 12 Bold in Capital Letters, Book Antiqua)**

The conclusion is intended to answer the research problems or purposes. It helps the readers understand why your research should matter to them after they have finished reading the paper. It is not just a summary of the main topics covered or a re-statement of your research problem, but a synthesis of key points and, if applicable, where you recommend new areas for future research.

## **REFERENCES**

IJSSH uses *VANCOUVER referencing style*. The references should be in alphabetical order, Use Book Antiqua (12), 1 (one) spaced. The minimum requirement is 20 references. It is preferable to have academic journal as the references published in the last 10 years except for main references of particular theories. It is suggested to apply reference software like Mendeley, Zotero or Endnote.
