Abstract : (Cambria, size 11 font **Italic**) Abstract Maximum 250 words in English, printed in upright Cambria font, size 11. The abstract should be clear, descriptive, and provide a brief overview of the researched problem. It should include the rationale for selecting the topic or the significance of the research topic, the research methodology, and a summary of the results. The abstract should conclude with comments on the importance of the findings or a brief conclusion.

1. INTRODUCTION (Cambria, size 11, Bold)

The introduction should provide a clear and logical background of the study by explaining the research problem, supported by recent facts, empirical evidence, and relevant literature. Authors should demonstrate the importance of the topic, identify the existing research gap, and explain why the study is necessary. The introduction should also present the novelty or contribution of the research, state the research objectives, and briefly introduce the theoretical foundation that supports the study. The final paragraph should clearly describe the purpose of the study and its expected contribution to theory and practice.

Authors are encouraged to use recent references published within the last five years, especially from reputable international journals. A strong introduction should move logically from the general context to the specific research problem and avoid an excessive literature review or detailed discussion of the findings. {Cambria, Size 11; Alignment: Justified; First-line indent: 1.27 cm; Spacing: Before 0 pt; After 0 pt; Line spacing: 1}

3. RESULTS {Cambria, size 11, Bold}

This section presents the research findings clearly and objectively. The results should answer the research questions or test the proposed hypotheses. Authors may use tables, figures, or other visual materials to present the findings. All tables and figures must be numbered consecutively, provided with clear titles, and referred to in the text. The results should be reported without extensive interpretation.

3.1 Tables {Cambria, size 11}

Tables should be created using Microsoft Word table format and placed as close as possible to the first reference in the text. Tables must be numbered consecutively using Arabic numerals (e.g., Table 1, Table 2). The table title should appear above the table and be written in bold, using sentence case. Avoid vertical lines; only horizontal lines at the top, below the header, and at the bottom of the table should be used. All tables must be editable (not images) and include the data source below the table when applicable. {Cambria, size 11, Spacing: before 0 pt; after 0 pt, Line spacing: 1}

4. DISCUSSION {Cambria, size 11, Bold}

This section explains the meaning of the findings and discusses their importance. Authors should interpret the results by comparing them with previous studies and relevant theories. The discussion should highlight the contribution of the study, explain possible reasons for the findings, and describe

their theoretical and practical implications. Avoid repeating the results; instead, focus on explaining what the findings mean and why they are important. {Cambria, size 11, Spacing: before 0 pt; after 0 pt, Line spacing: 1}
