

Dead Ends

Anthony Fauci:

“When you get vaccinated, you not only protect your own health and that of the family but also you contribute to the community health by preventing the spread of the virus throughout the community,” Fauci said. “In other words, you become a dead end to the virus. And when there are a lot of dead ends around, the virus is not going to go anywhere. And that’s when you get a point that you have a markedly diminished rate of infection in the community.”

Pfizer & Albert Bourla

“as with all vaccines, we must demonstrate success in order to seek approval for public use. First, the vaccine must be proven effective, meaning it can help prevent COVID-19 disease in at least a majority of vaccinated patients.”
