faust - Barnard's Star

You are Barnard's Star. You are one of the oldest objects in the sky. Because you see everything from your perch in the heavens you are a Watcher. However, because you are very old and your eyesight and memory are fading, you are an Unreliable Watcher.

Each night, you may target a player. You will be told which other players performed actions on that target. Your results will always be accurate (PINL) BUT your target may not be. So if you say "Watch Galzria", there's a 50% chance I'll give you the results as if you'd watched a different player.

Once per game you may flare, creating a bright flash that obscures results for all other investigative abilities.

Galzria - Dainn

You are Dainn, a dwarf from Norse mythology. You possess the blade Dáinsleif, which is laid with a curse that it must always kill a man when it is drawn.

You are a BAD DWARF with mathdude and WestCoastDidds

On night one, you may gift someone the blade. As long as they possess the blade, they are a compulsive vigilante (starting the following night). After killing, they may choose to keep the blade or return it to its master. If they choose the latter, you may redistribute it the next night.

You may choose to use the blade to perform the nightkill. This does not convey your team an additional nightkill, but may have flavor implications.

You also might be an elf. But let's just keep that between us.

Awaclus - Nimmie Amee

You are Nimmie Amee, a munchkin girl who once loved the man who would become the Tin Man. You have a psychotic employer who has hired a witch to kill all your boyfriends. Bummer. Once per night, you may open a QT with another player. If you do, bad things will probably happen to them by and by. But those things could turn out ok -- after all, things worked out for the Tin Man.

mathdude - Sleepy

You are Sleepy, a Dwarf. Your thing is that you're always tired. You may not take any night actions, because you can't stay awake to take them. However, you're so sleepy that other people get sleepy when they're around you, so if someone tries to target you for a night action they'll fall asleep and be unable to take any actions that night.

By the way, you are a BAD DWARF with Galzria and WestCoastDidds

You're also in a neighborhood with the other Snow White dwarves Swowl and WCD.

If you are the last BAD DWARF remaining, I'll allow you to sleepwalk through your nightkills.

pubby - Mayor of Munchkin city

You are the nameless Mayor of the Munchkin City. You have the power to throw parades and bestow accolades on people who kill meddlesome witches or perform other public services. Each time town successfully exiles scum, you may select a player who was on that wagon and convey on them the following honors:

Honorary Captain of the City Guard - a 1-shot vig

Honorary Coroner of Munchkinland - once, they may select a dead player. They will be told how that player died.

Honorary Drum Master of the Munchkin Marching Band - once, they may submit a list of three players. One will be mond-confirmed to be town.

infangthief - Bashfull Bashfullson

You are Bashfull Bashfullson, a young but influential and progressive Dwarven leader in Uberwald. Once per day, you may exert your influence with an extra secret vote. Note, once per day is once per day -- you can't move this vote around like a normal vote.

WestCoastDidds - Doc

You are Doc. You are a doctor. Or at least a self-described one. Nobody's asked for your medical license in a minute, ok? Anyway, you're pretty good at treating Dwarves. Of course, if you were to find yourself with a patient who was like, a star or a spaceship or a munchkin you might not be able to do a lot.

Anyway, your power works like a normal doctor power, but no promises it's gonna work perfectly.

You're also in a neighborhood with the other Snow White dwarves Swowl and mathdude.

By the way, you are a BAD DWARF with mathdude and Galzria.

Swowl - You are Dopey, a dwarf who doesn't speak. You have a posting restriction. You cannot post regular words in the thread. You must post third party descriptions of actions you're taking, in italics.

You can, however, talk in any QT you find yourself with access to.

You're also in a neighborhood with the other Snow White dwarves Swowl and mathdude.

I don't want to be a jerk and give you a posting restriction but no powers, so you're one-shot bullet-proof/ exile-proof. That's one shot between the two, not one of each.

Brightgalrs - You're Urist, a Dwarf Fortress dwarf who can't do anything right.

You have the power to build a fortress. Your fortress will help keep you safe from the mafia. You can invite friends to the fortress with you, but if you accidentally invite the mafia in, it could be bad. Also, once people know about the fortress, they can invite other people.

The fortress is also a QT with daychat.

Jimmmmm - You are Red Dwarf, a spaceship. Actually, you're Holly, the Red Dwarf's AI. But you're a little fritzzy. You must include a non sequitor in each of your posts.

Once per night, you can consult your database to learn another player's flavor name.

EFHW - You are Professor Flitwick, Charms professor extraordinaire. Each night, you may post a charm from the Harry Potter books in your QT. I will try to figure out how to make it a mafia power. It has to be a charm, not just any spell. Something they either describe as a charm or learn in charms class.

scolapasta - You are Mini-Me, a 1/8th size clone of Dr. Evil. Weirdly, you're not evil in this game. You're a GOOD DWARF. But you investigate as evil.

You are unnaturally strong and tough for your small size, so if anyone tries to take you out, you're taking them with you.
