

Directions: Use your notes to find descriptions of each organelle to complete the flash cards

1. For each word below make a flash card (using either index cards or make them cutting paper)
2. On the front of the flash card NAME the organelle
3. On the back of the flash card write if it is in a Plant Cell, Animal Cell or Both
4. Describe the function or job of this organelle.

Example: (This is not one of your terms, do not copy!)

<i>Cytoskeleton</i>	<i>cytoskeleton is found both plant and animal</i> <i>The function of the cytoskeleton is to maintain cell shape and anchor the organelles in place</i>
---------------------	--

**** These need to be written on your index cards or flashcards you made!*****

Part 1 Flash Card Terms:

1. Cell
2. Cell Membrane
3. Cell Wall
4. Cytoplasm
5. Nucleus
6. Chloroplast
7. Ribosome
8. Lysosome
9. Vacuole
10. Mitochondria
11. Golgi Apparatus
12. Endoplasmic Reticulum
