

Find Your Blackboard Content in Brightspace

Your content has been imported from Blackboard into Brightspace. After accessing Brightspace:

1. In the My Courses widget click on Converted.
2. Find your course and pin it so it shows at the top of your course lists.
3. Your content imported from Blackboard will be in the Content tab of your course.

****It is important to check the content as it may require rearranging. Quizzes and links may need fixing. Reach out to the FDC for assistance converting quizzes or broken links.**

If you do work in your converted course it could be compromised when system updates are applied. To avoid losing your work, it is

best to copy it into the new course shell or a new development shell. Alternatively you can change the title of the converted course.

Change the Title of a Course

Access the course and go to "Course Admin" on the navigation bar. Click on "Course Offering Information". Scroll down to "Course Offering Name*" and change the name by adding an X at the end of the title information. This (and any change to the title) will distinguish the course from import updates and it will not be overwritten. This will also help you identify the course in which you are currently working.
