

Learn Biomimicry Internship Program

What does a whale fin design have to do with the most efficient wind turbine?
How does a kingfisher's beak influence the speed, efficiency and silence of the bullet train?

Biomimicry.

Biomimicry is a practice that learns from and mimics the strategies found in nature to solve human design challenges — and find hope along the way.

[Learn Biomimicry](#) is a young company that is focused on creating and selling foundational online biomimicry courses and is running a 4, 6 or 12-month internship program for aspiring students.

We're Hiring

Role: Internship

Contract: Full time. 6 week probation period with a 4, 6 or 12-month contract if successful.

Location: Anywhere you are. We're distributed (read remote)

Salary: Based on an individual basis, situation, track record, and qualifications.

Experience: No formal experience required - preference will be given to individuals certified via our foundational course or with a deep passion for Biomimicry

[Learn Biomimicry](#) is offering a remote based internship to proactively upskill an individual in the practical world of business. We are actively looking for a self-starter, someone able to find and run a project within the business that they own themselves. We are fast-paced and are looking to work with A players who are interested in the world of online learning and biomimicry.

The Challenge

Challenge One: Assist with onboarding new learners and answering any questions they have
Challenge Two: Encourage the adoption of biomimicry, a practice many have never heard of

Learn Biomimicry

Learn Biomimicry aims to accelerate and advance the world's transition to sustainable design, using nature as a design guide. Through offering online foundational courses on Biomimicry, we collaborate with the world's best biomimicry practitioners to help make this future a reality, with a network of affiliate partners.

Working with Learn Biomimicry

At Learn Biomimicry, we're creating the foundation for the world's engineers, architects, designers, businesses and change-makers to redesign and solve humanity's most important challenges by using nature as a guide. We work with those who share our passion to create a thriving world. Our culture is holistic, outcome-oriented, autonomous and innovative. Headquartered in Gardens, Cape Town, we work to build an inclusive environment where both nature and humanity can do their best work.

Roles and Responsibilities

1. The roles and responsibilities will be determined on an individual basis depending on the skillset of the individual.

What is biomimicry

Biomimicry is a practice that learns from and mimics the strategies found in nature to solve human design challenges — and find hope along the way. Biomimicry provides the opportunity to feed our curiosity and be in wonder and awe about nature's genius water, energy and material-use strategies. This perspective broadens the solution space to bring new solutions to the table.

After 4 billion years of evolution, humanity has arrived to ask what is truly sustainable. The only real model that has worked over long periods of time **IS** the natural world.

Why should you apply

There is a direct link between your professional success and the positive impact
Flexible work arrangements
Personal development is guaranteed
Excellent growth opportunity in a young and innovative company
