

# Utica City School District Career and Technical Education Program Computer Applications Pathway Summary Overview

## **Focus Overview**

The Computer Applications Pathway provides students with the opportunity to learn the fundamentals of information processing, networks, hardware, software applications, and web publishing. Students will learn about common software packages for word processing, spreadsheets, databases, digital imagery and design, and desktop publishing and will use their skills to create authentic products for themselves and the community. Students will carry out computer and technical equipment maintenance and environmentally responsible hardware recycling. Students will explore and apply the concepts of digital citizenship. Within this curriculum students will have the opportunity to earn Microsoft Office and Adobe Suite certifications along with CTE Endorsement and college credits. Students who successfully complete the Computer Applications Pathway will be prepared for entry level careers or further education and training in programming, systems analysis, tech support, web development, software development, and other opportunities in the computer applications field.

## **Work-Based Learning**

Students will be connected with working professionals through mentoring, field trips to local job sites, and job shadowing, leading to opportunities for direct job training and real-world experience. Students will create and maintain a portfolio of their experiences to document the development of their skills, including a professional resume.

## **Additional Learning Opportunities**

- **Micro-credentials:** Students may pursue learning experiences and credentials depending on the requirements of the project that they are involved in. Some examples for this pathway include, but are not limited to:
  - Microsoft Office Specialist: Word Associate
  - Microsoft Office Specialist: Excel Associate
- **Summer Bridge Enrichment:** Students will have the opportunity to participate in cross-curricular Summer Bridge programs to enhance and enrich their skills. Students will explore and create solutions that address authentic needs in the school and wider community with the involvement of local industry professionals. Students will build on skills learned during the school year to work collaboratively with students from other pathways and programs.

## **Integrated High School Academics**

TBD

## **Concurrent Enrollment**

Upon successful completion of BM100, students will earn 3 college credits for BM100: Introduction to Business from Mohawk Valley Community College.
