

We request that the legislature revitalize DNR’s Trust Land Transfer program – a tool that protects our natural heritage and upgrades state investments to provide more funding for trust beneficiaries, all while also protecting working forests. In addition to passing the Trust Land Transfer (TLT) modernization bill ([HB 1423/SB 5372](#) or [HB 1460](#)), we request that legislators include \$25 million in the capital budget for the following 10 projects:
