Abstract

(Bold and Italic, spacing 1)

The content of the abstract, between 150-200 words, just one paragraph. Apparently, for the sake of simplicity, use the same language you use in your writing. Use the Abstract Fill style for this format. If you use this template correctly, all numbering will be generated automatically. So you don't need to edit it manually. Of course, if you create a section of this paper that requires numbering after this template, that number will be followed by the existing section number. Again you don't need to edit the part numbers, because if the contents of this template are deleted, the numbers will be sorted automatically. If you want to try deleting the contents of this template, please backup it first.

Keywords: Type 3-5 keywords here, separated by commas between them.

Received: Date Month Year

Revised: Date Month Year

Abstrak

(Cetak Tebal dan Miring, spasi 1)

Isi abstrak, antara 150-200 kata, cukup satu paragraf. Rupanya, demi kesederhanaan, gunakan bahasa yang sama dengan yang Anda gunakan dalam tulisan Anda. Gunakan gaya Isi Abstrak untuk format ini. Jika Anda menggunakan template ini dengan benar, semua penomoran akan dibuat secara otomatis. Jadi Anda tidak perlu mengeditnya secara manual. Tentu saja, jika Anda membuat bagian dari makalah ini yang memerlukan penomoran setelah template ini, nomor itu akan diikuti dengan nomor bagian yang ada. Sekali lagi Anda tidak perlu mengedit nomor bagian, karena jika isi template ini dihapus, nomor akan diurutkan secara otomatis. Jika anda ingin mencoba menghapus isi template ini, silahkan backup terlebih dahulu.

Kata kunci: Ketik 3-5 kata kunci di sini, dipisahkan dengan koma di antaranya.

Publish: Date Month Year

INTRODUCTION

Articles are made on 2-column pages with A4 paper size. For Top/Bottom Margin 3 cm, Left/Right Margin 3 cm. Manuscripts created using Microsoft Word, single spaced, 12 pt Palatino Lynotype, and no more than 8-12 pages.

Please select an article title (maximum 18 words) with the fewest possible words needed to adequately describe the content. The introduction should describe the background of the research, the proposed solutions and comparable related work. If the article contains a quote, it is MANDATORY to use it and so on using the Mendeley / Zotero citation tool in the

NATURE format. In the initial paragraph, describe what is the problem in the research (in the form of a paragraph description), also describe what is expected to be the solution to the problem in your research. Next, describe related research that is similar to your research (at least 5) with an update of 5 years before, so that this related research can bring up the GAP Analysis of the research you are doing. At the end of the introduction, describe the purpose of your research and what you hope to achieve from your research.

It is recommended for authors to use the following article structure: INTRODUCTION (min 700 words) –

RESEARCH METHODOLOGY (min 500 words) – RESULTS AND DISCUSSION (min 1800 words)–CONCLUSION (min 200 words). The maximum article contains 8-12 pages.

METHODOLOGY

Planing Research (Subtitle Palatino Lynotype 12, Bold and Italic)

Contains an explanation of the Plan of research (MANDATORY IN ARTICLE) which describes the sequence / stages in conducting research, how the stages of applying the method

in research and testing methods in obtaining research results are in accordance with the expectations and description of the research. It is better if there are pictures and tables, they must be presented with the names of the tables and figures accompanied by serial numbers.

Sub Title 2 (After 12 pt, Bold and Italic)

This Sub Title 2 can also contain problem solving methods, as well as the stages of the method. The table of numbers and figures is sequentially as shown in Table 1 and Figure 1.

Table 1. The title of the table (Palatino Lynotype 10pt)

Siz e	General	Bold	Italic
10	Table title, a letter or number written above		
10	Title of section/chapter, a Reference Library, table, table name, a first letter in table title, a title of image, subscript, superscript		
10		'Abstract'	
10	Author affiliation, main article, similarities, first letter in chapter title		Sub headin g
10	Authors name		
15	Manuscript title	Title	

Use high quality for the images used and provide an explanation for the images used. The formula uses the Formula Editor (EQUATION) found in Microsoft Word. Formula numbering is made sequentially based on the order of the formulas contained in the article, and the writing is like (1).

The formula is written clearly using an equation with an index like formula 1.

$$\Delta F = - 2,3 \times 10^6 \times F^2 \frac{\Delta M}{A} \quad (1)$$

$$\Delta F = - 2,3 \times 10^6 \times F^2 \frac{\Delta M}{A} \quad (2)$$

Figure 1. Tablet (10pt)

RUSULT AND DISCUSSION

The series of research results is based on a logical sequence/arrangement to form a story. The contents show facts/data and do not discuss the results. Can use Tables and Figures but does not describe repeatedly the same data in images, tables and text. To further clarify the description, you can use subtitles.

The discussion is a basic explanation, relationships and generalizations shown by the results. The description answers the research question. If there are doubtful results then present them objectively.

CONCLUSION

In the conclusion there should be no references. The conclusion contains the facts obtained, sufficient to answer the problem or research objectives (do not constitute further discussion); State the possible applications, implications and speculations as appropriate. If necessary, provide suggestions for further research. State the conclusion in sentences in the form of paragraphs, not in the form of numbering.
