ABSTRACT (10 PT)

A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and major findings and conclusions. (100–200 words) 9pt.

1. INTRODUCTION (12PT)

Provide a comprehensive background, research rationale, literature review, and scientific contribution. The introduction should explain the relevance of the medical research topic and the motivation for the study. (10pt)

2. RESEARCH METHOD (12 PT)

Describe the materials, participants, data collection, and analytical methods used. Include ethical approval and supporting references for medical studies. (10pt)

3. RESULTS AND DISCUSSION (12PT)

Present research results supported with tables, graphs, and figures. Provide critical discussion, interpretation of results, and comparison with related medical studies.

3.1. Sub Section 1

Xx

3.2. Sub Section 2

Yy

4. CONCLUSION (12 PT)

Summarize key findings, relate them to the research objectives, and suggest recommendations or future directions for medical research. (10pt)

ACKNOWLEDGEMENTS (12 PT)

Xx

REFERENCES (12 PT)

The main references are international journals and international proceedings, and at least the last 5 years All references must be the most relevant and up-to-date sources. References are written in IEEE style. Reference at least 50 recent journal articles. Please use a consistent format for references - see example below (10 pt):
