

Subject: Ignore This Tip to Lose Money Quickly

LOOK, you've probably tried day trading before and it didn't go so well,

Saved up a big sum of money, then before you knew it...

Your trading account was \$0

And if you haven't tried it, you've considered it but didn't do it due to the 'risk'

I'm here to show you that it's WAY easier than you think.

Here's what you don't need:

- 10k to experiment with
- A college degree
- Years of experience

Now, you could read this email and just bet on charts rising or falling without my guidance.

I don't advise it... but you could.

Seeing successful traders confirms that big earnings from trading are possible,

So why haven't you?

Like I said, after this email you could run off and try,

But what you'd miss out on is the key practice of all successful traders.

A Community.

Somewhere you can get powerful insights from people who were in your exact shoes,

Where you can take leap steps to monumental profits.

No one makes it alone.

Trying to will only lengthen the time it takes to hit a place of financial stability.

The ***only*** reason your trading journey hasn't been going too well is lack of community.

Trading doesn't have to take all your money, time and effort.

You've wasted a boatload of all of those things by neglecting community

And you know this.

Sign up here to gain access to the community that's going to exponentially speed up your trading journey.

See you inside.

Subject: I slammed my computer shut in despair

[name]

The most impactful lessons in life come in unexpected ways, right?

For some time, trading had consistently brought me income,

Racking in thousands in profit day in and day out.

Each time I took profits, I envisioned a life of never-ending cash

I was a MONEY MAKING GLITCH...

Or so I thought.

January 6th, the dreaded day approached.

I lost ALL of my money in a series of 3 trades.

Every penny.

In a single day, all of my earnings VANISHED

Three bad trades changed my entire life.

I felt like I had been in the game for so long that I didn't know how to start from scratch.

I didn't know where to go from here.

But I only had 2 options...

Feel sorry for myself and truly solidify my loss,

Or get my ass to work and hit the books.

Fast-forward 6 months I am now making 3x what I was before,

Except this time I am 'Market Proof'

I learned the hard way so you don't have to.

I've created a full template for you to follow to leap step on your trading journey.

Target Audience- Jack, An 18 year old boy who has little money and sees a lot about trading online.

Where are they now?- Instagram, Tiktok, snapchat. They could be in their home in bed scrolling, on their computer scrolling looking for a good option to make money, they could be in school in class bored looking for a way to make money. They could be at work angry they have to go there or on the way to work angry they have to go there. They can still be early in the buying process but it doesn't matter too much as their desire to make money will supercede the prematurity of the buying process. They have seen trading a little bit but may not know too much about it.

Where do i want them to go- to my email. From there I want them to be so engaged in the email that a movie plays in their head and then I want them to scroll to the bottom of the email then go to the link at the bottom where the sign up for the trading discord.

What do they need to experience to achieve my objective- they need to have their scrolling flow disrupted and then be roped in by the possibility of big money. Then from there a movie need to play in their head which will be accomplished by using a lot of sensory tools or even a story or both, then they need to have enough affinity through surpassing the pain threshold or future pacing the dream state to then click the link to the discord.

roadblocks - price of discord, skepticism of trading, skepticism of me, no money, no time, fear of losing money, previous scams related to trading guru.

solutions - speak of the price being paid back within a short amount of time in the discord, the price pays for itself, skepticism can be obliterated by social proofing with testimonials, no money can be obliterated by speaking on how much money they will make and following up with the "proven strat", previous scams can be obliterated by speaking on that objection, reframing it and establishing trust through honesty and an offer or gift.
