

# MULTIPLAYER

Multiplayer and servers remains untested due to being unable to host one, but Servers should work deeming that the mod is installed to the server and the players have the appropriate mods installed to view them.

If you go onto a non RWBYbound server with mod items installed, you will be able to use and view them, but only those with the mod installed will be able to see it. You will also not be able to damage any creatures.

If anyone does happen to host a server with RWBYbound installed, contact me with any bugs issues and I will continue to strive to make this mod compatible for online play.
