

## K-5 Math Matrices

The matrices and guiding tenets below are based on evidence-based research and best practices related to math teaching and learning for all students. Students with disabilities need more direct, explicit, systematic and sensory learning experiences.

These matrices are intended to offer initial guidance to schools as they begin to develop their own Standard Treatment Protocols for math. If there are any questions or needed clarifications, please contact Krista Boyd.

[Guiding Tenets for Math Intervention](#) - This is also linked at the top of each matrix.

Concepts/skills to develop through all math domains	Domain: Counting and Cardinality	Domain: Operations and Algebraic Thinking	Domain: Number and Operations - Base Ten	Domain: Number and Operations - Fractions
