

FIRST DAY QUESTIONNAIRE PLANNING TOOL

What are some of the things you've learned about individual students this semester?
(examples: they've taken this course before, they work a full-time job, they're a veteran,
etc.)

What would have changed or done differently if you had known these things at the start of
the semester?

WHAT WOULD YOU LIKE TO KNOW ABOUT...

Generate some questions that might help you learn more about the following topics:

Your students' Prior Knowledge

Your students' Goals and Learning Needs?

Your students' Resources and Tools for Success?

Your students' other Time Commitments?

DIFFICULT TOPICS

What topics are you concerned or unsure about adding to your questionnaire? Are there things that you are hesitant to learn about your students?

Take a moment to consider why these topics or subjects might belong or not belong on your questionnaire.

- Do these topics or subjects make you uncomfortable? If so, why?
- Do you feel unprepared to respond to these topics should a student mention them?
What COD resources could assist you and your students?
- Do the topics seem unrelated to teaching and learning in your classroom?
- Could learning this about your student give you an opportunity to positively impact their learning experience in your class?
