

# BALL x PIT Twitch Extension FAQs

The BALL x PIT Twitch Extension is made specifically for the brick-breaking, ball-fusing, base-building survival roguelite, BALL x PIT. Using this Twitch integration, streamers will be able to let their communities become a part of their excursions into Ballbylon's depths—from voting on fusions, upgrades, as well as providing curses and blessings, viewers will become an essential part of the streamer's experience. For better or for worse.

## Features

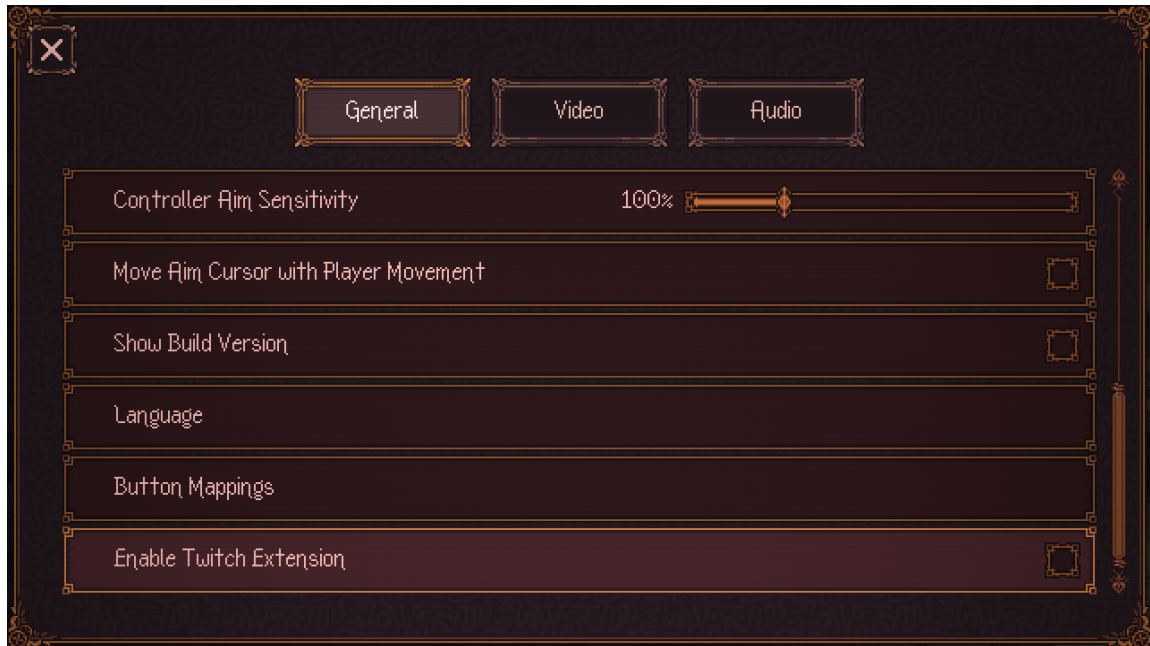

- **Communal Decisions:** Whether it's Upgrades or Ball Fusions, your viewers vote between options to truly play the game *with* you.
- **Curses and Blessings:** Periodically, a Curse or Bless event will start. Viewers will be voting on whether they want to help or hinder you by choosing between curses (hindrances) and blessings (boons) that throw curveballs into your run.
- **The False Messiah:** The False Messiah is a special Hunter character that is unlocked upon activating the Twitch integration. This character is levelled up separately, and can have the abilities of one of the other characters in the game.

## Installing the Extension on Twitch

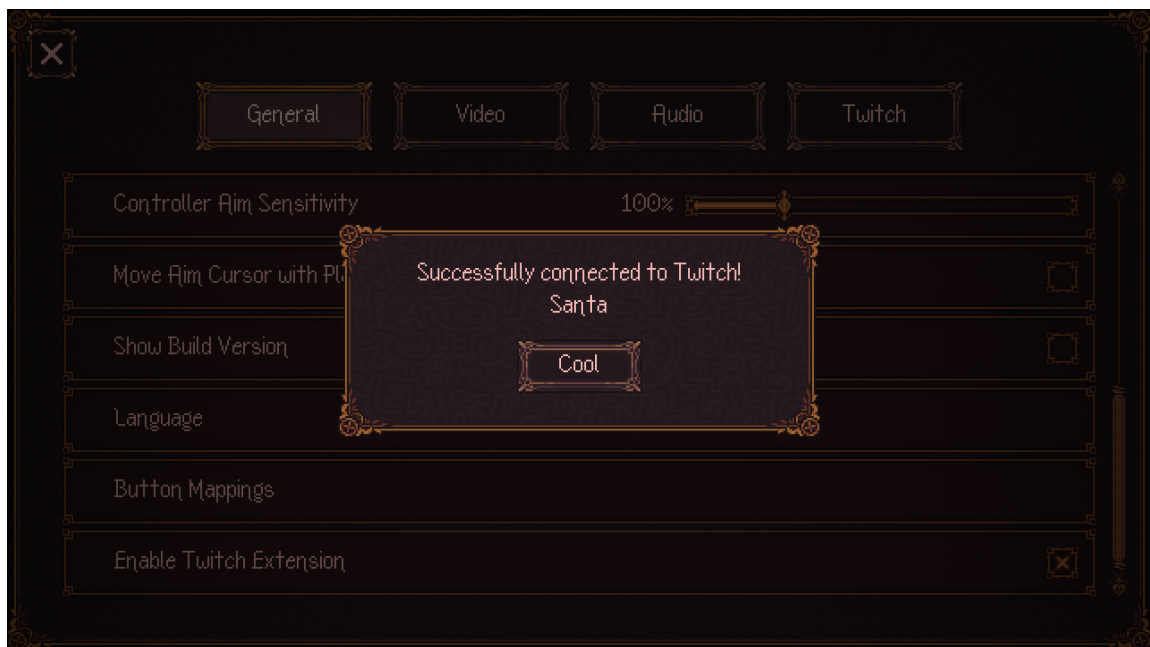

1. Visit [devolver.gg/ballxpitextension](https://devolver.gg/ballxpitextension)
2. Press the purple "+ Install" button at the top right of the extension page
3. Press the purple "activate" menu button in the bottom right of the window
4. Press "Set as Overlay 1"

## Linking the Extension to your game

1. Launch BALL x PIT on Steam
2. Head to the Settings menu
3. Scroll to the bottom of the General Settings and click the "Enable Twitch Extension" button

4. Log into your Twitch account to connect it to BALL x PIT. Once done, you'll see a pop-up that says "Successfully connected to Twitch!"

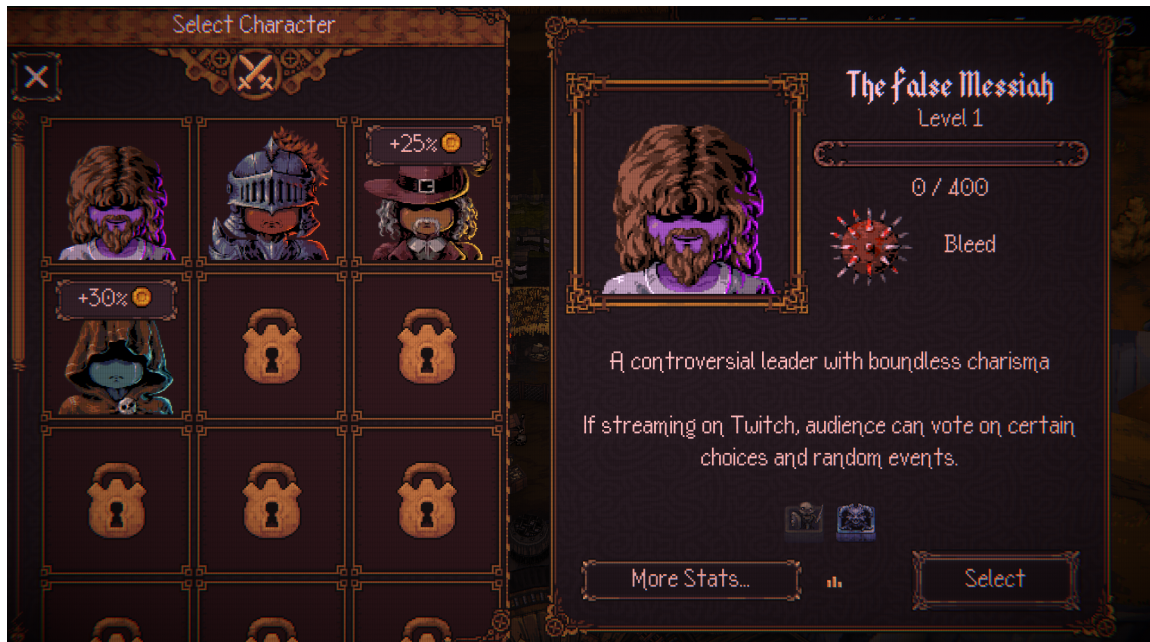

5. At the top right of the Settings Menu, you will now have access to the “Twitch” Menu with a variety of settings to customize the Extension

## Going Live on Twitch with the Extension

6. Go live in the [BALL x PIT category](#) on Twitch for the extension to be visible to your viewers

- When starting a run, select the "False Messiah" character to enable the extension (no, it doesn't work with other characters!)

- When prompted, click "Begin Vote" to let your Twitch viewers influence your run

9. Your viewers will have a limited amount of time (defaults to 15 seconds) to vote for various options

10. Once the timer lapses, click "Continue"

## Updating the Extension

**The extension will update automatically on your channel**, all your viewers need to do is refresh the page.

## FAQ/Troubleshooting

**I've enabled the Twitch integration, but my viewers can't vote!**

The integration only works when the False Messiah character is selected and the streamer is live in the BALL x PIT category.

**What platforms support the Twitch integration in-game?**

Currently, the only supported platform for the in-game Twitch integration is PC.

**My viewers are constantly trying to curse my playthrough, help!**

Unfortunately, the Ball is quite literally in their ~~court~~ Pit.

**An error pops up when viewers try to vote for fusing 2 of the same balls.**

You cannot fuse two balls of the same type together (e.g. Bleed cannot fuse with Bleed). If a majority of your viewers vote for a duplicate combination, you will run into this error. We're working on a fix to stop people from voting for doubles.

## Getting Help

Please reach out to [influencers@devolverdigital.com](mailto:influencers@devolverdigital.com) if you run into any issues with the extension.
