

Meletrix Zoom65 Quality Disclaimer

This is an acceptable finish

Due to the nature of electrostatic coat treatment, there may be minor, unavoidable dust points on the case surface. Small dust points, micro scratches that are only visible in just the right angle of lighting, small flaws, scratches inside the keyboard case, or dents on the case that are not visible when the keyboard is fully built. These are normal and within our quality acceptance.

Some top and bottom cases might have slight differences in finish, texture or reflection when viewed from certain angles. And this is within our acceptance.

If you have any questions, please contact us by email at service@meletrix.com before you unbuilt the kit. If you do not hear back from the vendor within 3 business days, please PM Fang#1568 on the discord directly. Thank you.
