

Title

C00lkidd vs Frenzy VS BLOG!

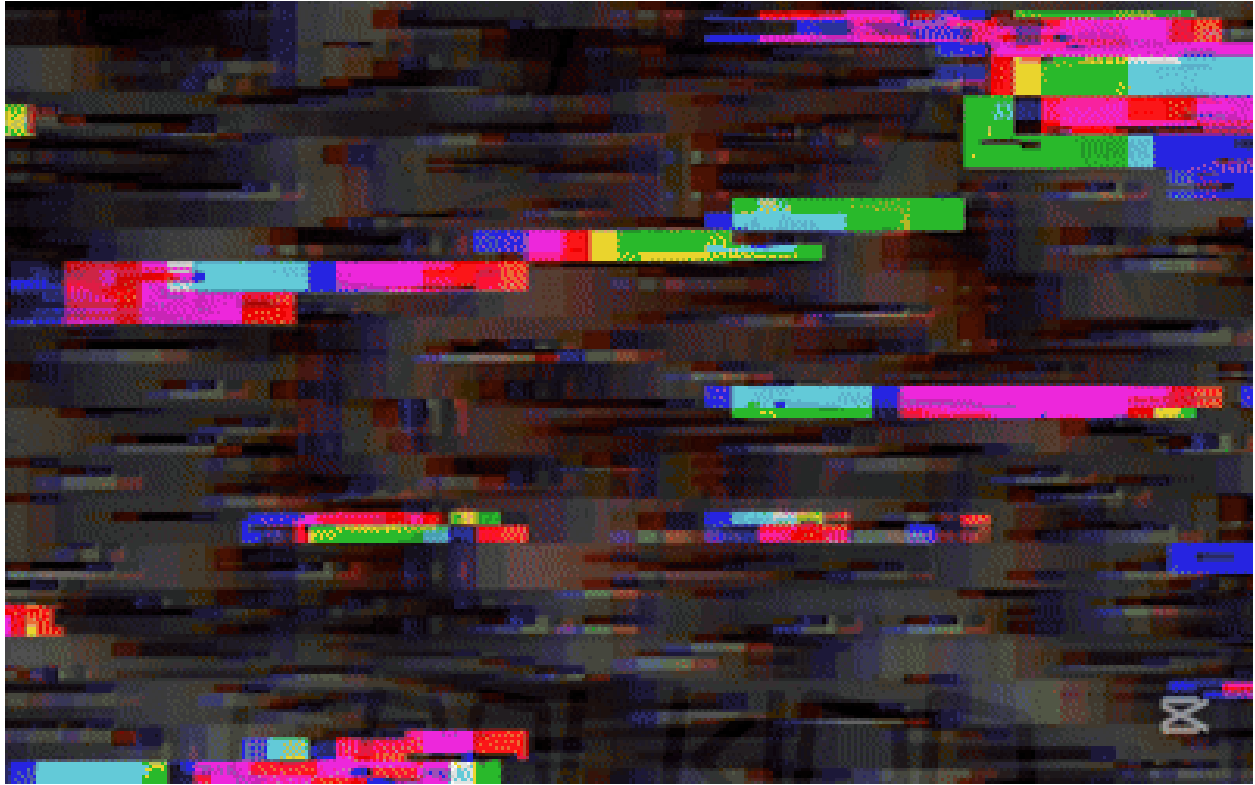

Introduction

Introduction

Meet C00lkidd, The Coolest Kid in town.

And Frenzy, The Demon that strikes torment

Roblox, A platform full to the brim of creativity, full of games of every genre.

And Youtube, a platform full of videos of creativity, gameplay and franchises of every genre.

These two playful reality warpers come from one of the popular apps in their own series.

In this blog they will be analysed to decide who would win in a fight.

Context & Credits

Before we start...

For C00lkidd, We will be giving him the actual C00IGUI (The C00IGUI seen in forsaken), Feats & Statements shown in forsaken, I won't add every skin in the forms section when they don't really add any interest for this fight and any reasonable scaling (However, I would add the important ones instead). However, We will be not allowing the limits like his cooldowns for an example, Which are known to be the spectre effects.

For Frenzy, We will be giving him all the feats and statements from his author, clones, mugen, and the main SCP series. (Were not allowing cross scaling feats that is outside from his series, Like the Original Canon SCP Series and M. U. G. E. N. Mods) However, I will not try to add "EVERY GOD DAMN" Frenzy Clone when there's like 217200 seconds of introducing these clones. (I will rather add the important one's instead tho)

Update:

Sadly, Most videos related to frenzy and his clones were deleted. However, I provided sources as images in abilities. Which they used to look like before being deleted (I even downloaded the videos [which i will put in this google drive for you guys to gain sources](#))

Credits

Even tho I am the only one doing this all by myself, Here is a huge shout out to them for their research, as this blog as a whole most likely wouldn't have been made without their help

Shoutout to those in FC/OC Vs Battle Wiki, [Who made a brief explanation about the forsaken cosmology](#). (I am one of the supporters now)

Shoutout to **aldis_bin_raider296** and the people who had helped him made [c00lkidd vs WYST vs blog](#), Which I am using as a reference to mine.

Background

Background

C00lkidd

“You seem familiar... Oh well!”

(Credit to **ChayKvas** for the background)

One day,

A roblox hacker who went by the name 007n7 found an abandoned child on his doorstep, who he named **C00lkidd**.

However, The Child was actually meant to be born as a literal **Monster**.

who later joined a Vandalism group called... team C00lkidd, aside after an unknown amount of time.

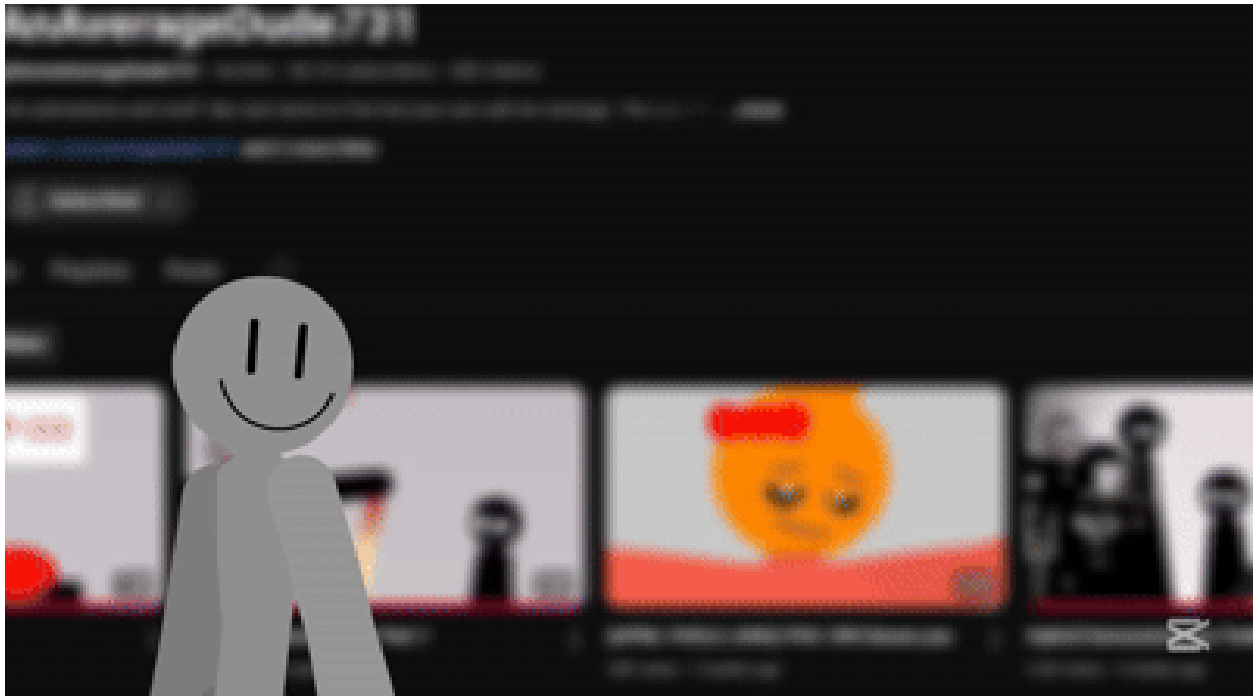

At C00lkidd Birthday, It was implied that he was given the **C00IGUI** at a young age by 007n7.

C00lkidd and his Father seemingly attracted the attention of a powerful entity known as the spectre.

Using C00lkidd's naive nature to make him believe those he murdered, including his own father, Were simply sleeping and their screams were of joy,

He tricked C00lkidd into becoming one of his **Killers** in Forsaken.

Frenzy

"SAII THE BELLSŻ SAII THE BELLS MF SHOREDITCH"

(AnAverageDude731 Youtube Channel Homepage)

Before,

A demon escaped outside from an old 2D fighting game known as *M.U.G.E.N.*

When Borned from broken code and abandoned scripts, it found its first steps in a crumbling, ruined church where smiley faces marked the walls like warnings.

And when he was discovered by the SCP Foundation and Captured?

They called him... **Frenzy**.

A tall twisted figure with a painted grin and claws.

The foundation tried to understand it... But Frenzy didn't come alone.

He brought **clones** upon to his arrival....

Well... dozens, maybe more. Some hostile & kind.

He enjoys as he tears, slow and deliberate.

While some say... His a **GOD**. (or Demon)

Experience & Skills

Experience & Skills

C00lkidd

(c00lkidd intro from forsaken in roblox)

Even tho C00lkidd is very young at his age (Since his around 10 years old).
he has shown great skills in combat and his abilities?

C00lkidd can fight and kill guest 1337, a survivor with military combat training and who is frequently shown fighting back. Additionally, C00lkidd is skilled enough with the c00lGUI to being able to frequently deconstruct games (Even Implied by 2x2, That he has been using it to corrupt other games with it)

Also, C00lkidd has been shown to do "Notable Attacks/Techniques"; (These are offical names)

Punch: [He does a basic punch](#)

Corrupted Nature: [He throws a humanoid torso brick \(that is a clear reference to roblox exploiters using humanoid torso bricks to fling others\) to damage through his foe's durability in long range](#)

WALKSPEED OVERRIDE: [He lunges himself at his foe at long distance. Which he pulls his arm to grab and use his firebrand sword in an instant to use fire on his foe after it's action is done.](#)

PIZZA DELIVERY: [He duplicates himself with two delivery of himself. Which are used to instantly find his foe's very easily, and punch through them causing a fire and slowness.](#)

Update: However again, I later found out that he has been stuck in the Eternal Hell/Forsaken, for awhile.

Frenzy

(SCP-113 JOKE VIDEO from AnAverageDude731 Youtube Channel)

Frenzy may have been shown to do a few “Notable Attacks/Techniques”;
Such as: (I am naming these moves because I do not know what they are called and these are not official names)

Grabbed CrushHead: Frenzy Grabs the Person Body, And Then Crushed its head

SwingClaw: Frenzy gives himself a claw, As he claws through the person's body

BackSpine Claw: Frenzy Turns his back as he claw through the person's body up at the air

Lounge: He lounges himself to the enemy at a long distance

Note: Although, There are feats that do confirm that he is another level in fighting. Like [the author himself confirming that he is completely superior than the rest of his clones](#), [Which is supported statement to him being the original & creator of him being responsible for making these clones](#), [Ever since he escaped being inside mugen](#).

There are Frenzies being good at combat in depending situations:

Such as [SmileZ watching his victim and waiting for a right moment to ambush and kill it slowly](#), [Kinoshita Frenzy spamming his moves like a character from mugen](#), [TriggerMan hitting anything with a shot with his guns](#), And More.

The Point is that, There are many frenzies that shows good combat skills (which they have taught themselves to do) that can be used for our OG frenzy.

Update: However again, I later found out that he has been stuck in the M. U. G. E. N. Video game for awhile, Of where he is shown to do [impressive attacks](#).

Intelligence

Intelligence

C00lkidd

(By **DoesMusicalThingsGuy**)

Effectively led Team C00lkid and gained widespread popularity at a young age. Can effectively utilize the C00lgui much like his father, 007n7, who he received coaching and learned from. ([Which he managed to hack & corrupt through roblox games with C00lGUL](#))

He has learnt basic academics and Knowledge from fifth grade. (Judging by his age and sch00lkidd skin)

[He created the C00l Carnival which is a map with functional technology and headlights, alongside a solid, compact design which implies many degrees of creativity](#)

Therefore, Making him **Gifted**;

(Gifted: Characters that demonstrate high reasoning ability, demonstrating proficiency of complex concepts with minimal repetition, and display high performance capability in intellectual, creative, or specific academic fields.)

Frenzy

(By Pump731)

He should be completely smarter than the rest of his clones, Including RED Enginner. [Who is implied for making that involves technology. Such as sentries. & dispensers.](#) Who even made a robotic girl named "Sentrzy".

Therefore, Making him **Genius**;

(Genius: Characters with exceptional insight in the performance of some art or endeavor that surpasses expectations, potentially sets new standards for the future, establishes better methods of operation, or remains outside the capabilities of competitors. Genius is associated with intellectual ability and creative productivity emerging from the remarkable capacity to apply creativity and imaginative thinking across diverse contexts. This definition operates under the premise that we are set in our current era of human progress, marked by our current level of academic advancement, or a period akin to our contemporary level of academic achievement.)

Equipment

Equipment

C00lkidd

The C00IGUI

The C00IGUI is the exploiting device used by 007n7 and C00lkidd. We may not have been given that much INFO about the C00IGUI. However, There are Some Feats and & Abilities Shown to do so;

Statistics Amplification: Shown to buff c00lkidd himself in physical stats by C00IGUI (Strength, Speed, Stamina)

Durability Negation: Shown to negate through durability, when using corrupt nature.

Teleportation: [Shown by 007n7 using it to teleport anywhere far from its original location](#)

Corruption, Hacking & Code Manipulation: [Stated by 2x2](#), c00lkidd has been corrupting and twisting the code of the roblox games. Which is implied to be capable of doing that with the C00IGUI.

Action & Hax Negation: Should be comparable to 1x1x1x1 Abilities, That is capable of giving "Helpless Effect" that disables the foe's Actions & Abilities. When Given combat interaction. (Such as [Moving](#), [Action to fight back](#), & Using Ability)

Reality Warping, Creation, Summoning, & Duplication: Shown to replace the entire background with image of his entire body, [Created his own pocket dimension "C00l Carnival"](#), Can Summon his weapons like the firebrand sword, Shown to Duplicate himself twice or [more](#).

The Firebrand Sword

The Firebrand Sword is one of his main weapon's to use, Which can release fire on his foe's when damaging them.

The Large Lollipop, Wooden Sword & Pool Stick

Same thing, with firebrand sword.

Cardboard weapons

It's just costumes

Skateboard

Just a cool skateboard for him to use

Pizza

Pizza in forsaken is capable of healing others (Including clones), Which is capable of healing them from Injures, Wounds, & Burns. (Regeneration; **Mid-Low**)

Frenzy

Claws

He has large black claws?

His claws have been shown to be strong enough to break bones and [through human bodies](#)?

Forms

Forms

C00lkidd

(I will only show the Important form)

Milestones

Milestones are timelines which are treated as forms for c00lkidd, showing the changes of c00lkidd being in eternal hell/forsaken world.

1

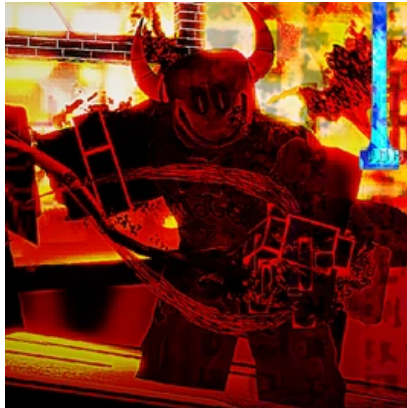

Not much info about his first form, However should be stronger than before.
Is shown to develop horns and a tail.

2

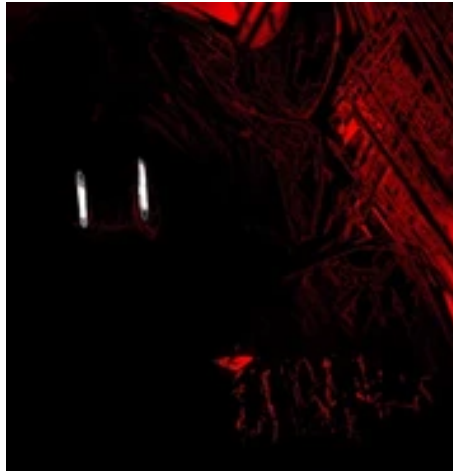

Not much info about his first form, However should be stronger than before.
Is shown to develop horns and a tail.
Even has a cape.

3

Same info as the first and second, However has shown to have gloves and a corrupted aura around him.

4 (Final Form)

Same info as the third form, However this form should be stronger than the rest of forms, as not only that but shows greater experience to the C00IGUI, not only for greater advantages but even burning people as a fancy kill animation.

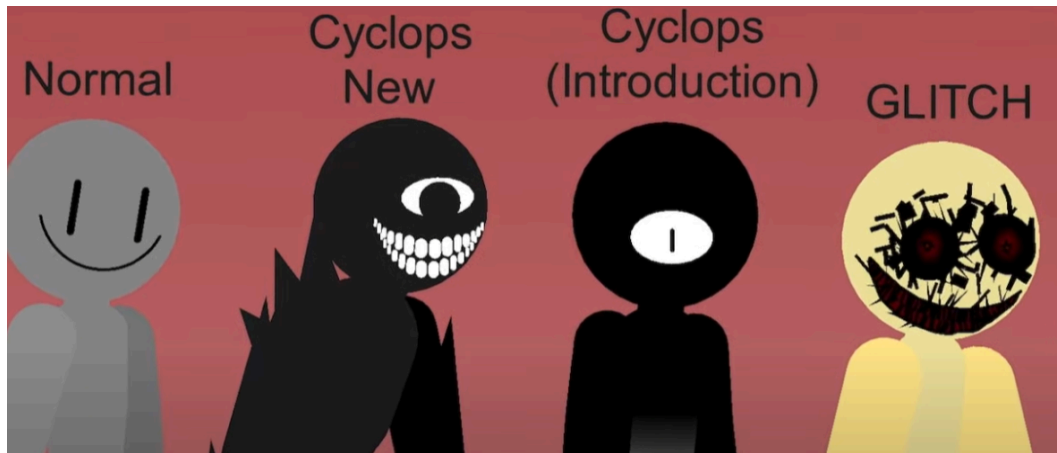

Frenzy

[Frenzy Mode?](#)

This form is just basically him very insane and mad when given enough damage,
This form would automatically make the background as the victim's face. However, when his
victim doesn't see frenzy. It will give the victim Hallucinations.

Other Forms

No Info about these forms, Whatsoever. However Should be stronger than his previous forms.

Abilities

Abilities

C00lkidd

Statistics Amplification & Empowerment

With C00IGUI, He can Buffed himself in these categories;

Strength: Can Potentially Buff himself at the same level of power from the C00IGUI

Speed: Can Buff himself at the same level of speed from the C00IGUI (Shown in OVERRIDE WALKSPEED)

Stamina: Can Buff himself with Infinite Stamina (However. Since, this is obviously caused by the C00IGUI. We will apply this to him as a possibility, Which Works.)

Immortality & Blessing (Movement, Protection, Resurrection & Enhancement)

C00lkidd can survive multiple sword blows and gunshot at the head (Basically Resilient), However...

Thanks to "The Spectre", He has given **Resurrection** to [the survivors and killers afters death.](#) Which can apply to c00lkidd.

C00lkidd can go walk on surfaces like liquids (Yorick's Resting Place's poisonous river)

However, Managing to negate this ability or getting rid of The Spectre, Would get rid of c00lkidd being incapable of dying.

Pyrokinesis

When a survivor is hit with walkspeed override or by a pizza delivery clone of c00lkidd, they will be lit on fire for a short period of time.

Summoning

C00lkidd is capable of summoning his weapons like his sword or lollipop to his hand at any time. (Including his pizzas.)

Duplication

C00lkidd is capable of creating his clones of himself from nothing to chase survivors. (Under his control) Who are capable of attacking and lighting people on fire. (They could be given with the same weapons by c00lkidd)

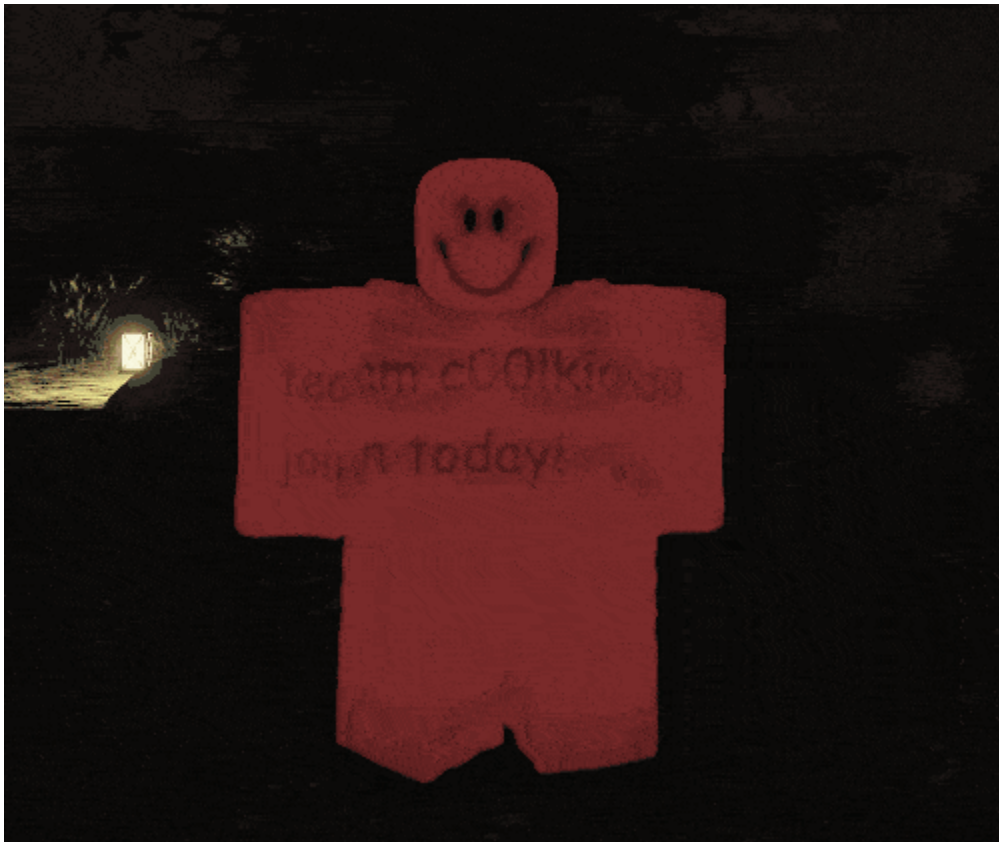

Durability Negation & Statistics Reduction

C00lkidd is capable of throwing humanoid torso bricks at people, Who can negate through their durability and send slowness.

(However, it would last seconds. It isn't instant kill)

Flight

While using walkspeed override, C00lkidd levitates above the ground.

Non-Physical Interaction (Arguably)

(By **Toastednuttellabread**)

[C00lkidd can harm 1x1x1x1](#), Who is a form of a physical manifestation that is made out of Shedletsky's Hatred, Pure Malice, and Negativity.

Necromancy

In the C00lkidd Cupcakes skin, C00lkidd is able to bring back survivors from the dead as his minions to attack his foes. (When killed by him)

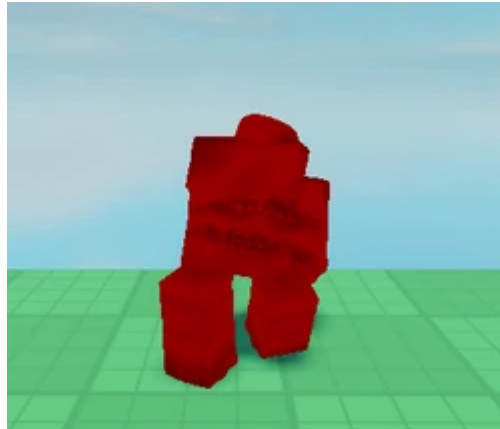

However, He can somehow bring back others to life from **The Spectre's** Existence Erasure.

Creation + Pocket Reality Manipulation

It has been stated that C00lkidd created the C00l Carnival forsaken map, Including a ferris wheel, & a totally inconspicuous van and an exhibit containing a statue of a drakobloxxer

Reactive Evolution

When he gets stunned once, he will gain immunity from stuns temporarily. Which is the effects of the spectre.

And More (C00IGUI)

(By Robloxian_isaforsakenfan🔥)

Teleportation: [Shown by 007n7 using it to teleport anywhere far from its original location](#)

Corruption, Hacking & Code Manipulation: [Stated by 2x2](#), c00lkidd has been corrupting and twisting the code of the roblox games. Which is implied to be capable of doing that with the C00IGUI.

Action & Hax Negation: Should be comparable to 1x1x1x1 Abilities, That is capable of giving "Helpless Effect" that disables the foe's Actions & Abilities. When Given combat interaction. (Such as [Moving](#), [Action to fight back](#), & Using Ability)

Reality Warping, Creation, Summoning, & Duplication: Shown to replace the entire background with his entire body, [Created his own pocket dimension "C00l Carnival"](#), Can Summon his weapons like the firebrand sword, Shown to Duplicate himself twice or [more](#).

Frenzy

Attack Reflection

When attacked, At the perfect timing.

He uses a move that would parried his enemy attack back to it.

Immortality (Arguably)

When he is killed, [He will come back at 666 hours.](#)

One of his clones, RED Medic. Had a pencil inside his skull or brain, [Which he is still alive.](#)

(Frenzy is comparable to this)

Body Control

Shown to control his body, By giving himself claws or [unknowingly more...](#)

Social Influencing (Arguably)

Most of the time, His actions and his appearance can show Instigating Fear and Leadership to others, including [his clones](#).

Creation, Duplication & Corruption (Arguably)

Ever Since, Frenzy escaped M. U. G. E. N. 2D Game World, [The Clones were then made by him.](#)

However, His clones can be made by through his kills.

Such as his [first victim.](#)

Durability Negation

He launch projectiles, that can negate through durability.
Including this... weird orange ball?

Durability Negation & Pocket Reality Manipulation & BFR

His move can send his enemy to his pocket dimension, [as he escapes letting his enemy die.](#)
(However this would last within seconds, It isn't instant kill)

Immortality Negation (Arguably)

"When Frenzy kills a clone, they are dead dead. They won't come back. =)"

Reality Warping, Sound Manipulation & Mind Manipulation

Even Angered or not, [He is shown to be capable of turning the background as the victim's face, while playing his main theme, it causes the victim to hallucinate when not being by frenzy](#)

Inorganic Physiology & Acid Manipulation

[His skin is nothing but rotten and moldy with no organs and his blood is black acid substance
Shown over here using it.](#)

Berserker Power

[Can Become Mad very easily when interrupted](#)

Fourth Wall Awareness

Has shown to be aware of the audience numerous times, [Including adding a jumpscare to them as a silly prank](#)

Immersion (Arguably)

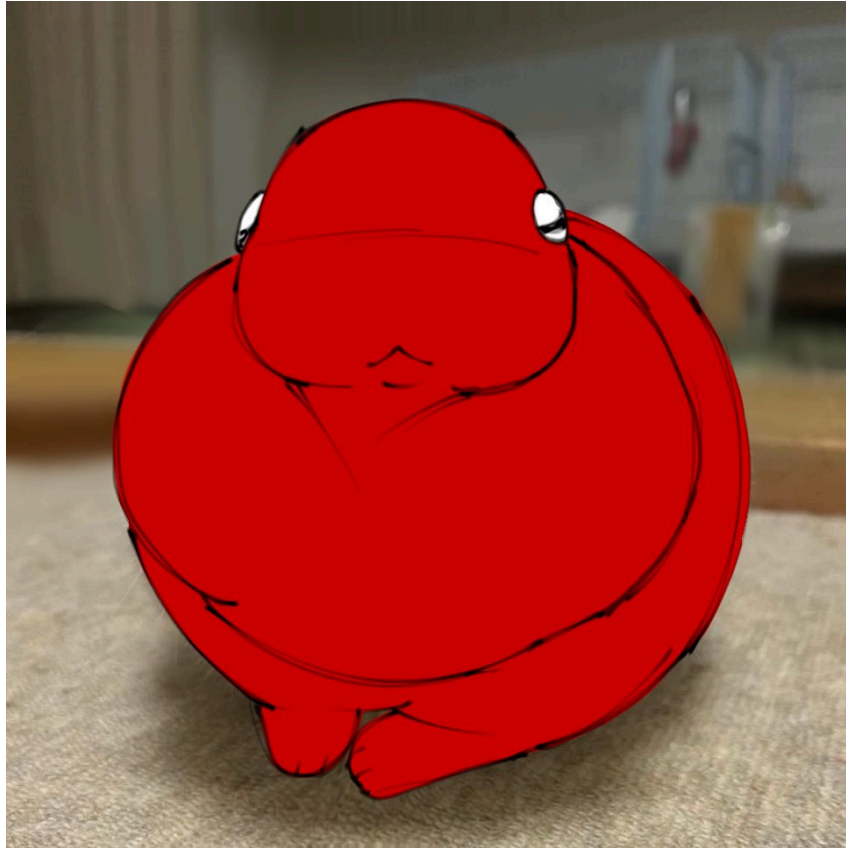

[Escaped 2D Fighting Game Called M. U. G. E. N.](#)
[Shown over here.](#)

And [Has went to the real world outside his own world.](#)

Resistance

Resistance

C00lkidd

(I have no idea where is this from)

- **Pain Manipulation** (Due to the Spectre's brainwashing, C00lkidd does not feel any pain from physical combat, Rather frustration. Killers like c00lkidd can be temporary stunned by gunshots and sword strikes, However they would endure it to chase down survivors.)
- **Mind Manipulation** (Shrugs off the effects of The Spectre's brainwashing after the match ends)
- **Explosion Manipulation** (Unaffected by subspace tripmine, [That is implied to be used for exploding house's](#))
- **Poison Manipulation** (can withstand being in the Yorick's Resting Place's poisonous river far longer than survivors)
- **BFR & Sealing** (The Spectre prevents the killers & survivors escaping his realm)

Frenzy

(From **Dr Veznan**)

- Possibly **Temperature Manipulation** ([His body was not melted completely when drinking the grimace shake](#), [unlike his clone.](#))
- Arguably **Sealing & BFR** ([Can teleport away from his BFR & Sealing](#), Which is arguable for him to teleport away from other people's BFR Including Sealing)

That's pretty much it?

Leadership

Leadership

C00lkidd

C00lkidd has Effectively led Team C00lkid and gained widespread popularity at a young age. Even, Depicted as a lead cultist.

Comparable to [007n7's Clones](#) with the same c00lgui given by the spectre, It is shown to control his clones manually or not. (which applies to his zombies)

His clones / zombies can still work automatically, Without him controlling them.

His clones / zombies can be used for some good use in combat, such as tricking his foe's into walking them, which would burn them and damage them more. ([Or trapping them into a death trap.](#))

His clones / zombies can be used as a blockage, [According to what 007n7 did.](#)

Frenzy

(By **Pump731**)

Its pretty much confusing about how his leadership would work?

In Disobedience video, It shows him killing his clone who disobeyed him. Which he made his clones fear him, just to control them.

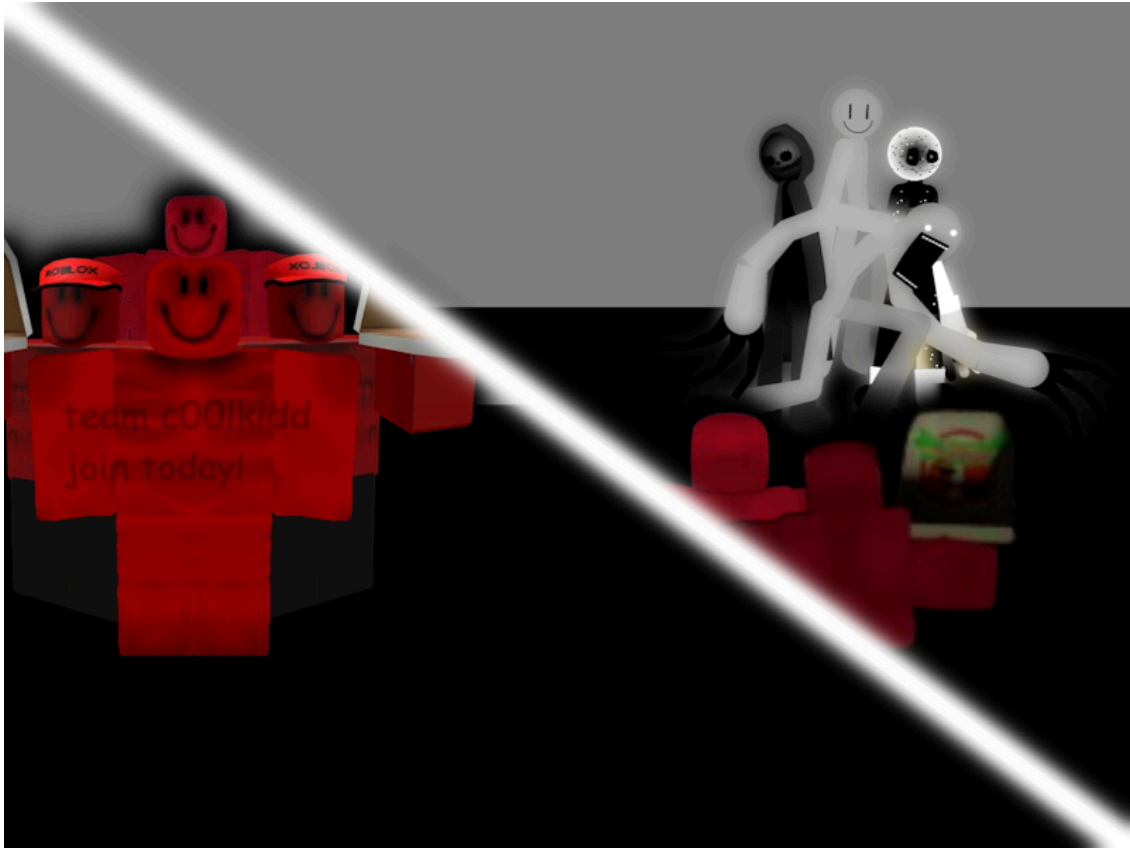

However, Altdude confirms that he only does that to lower Tier C's. and confirmed that the other clones would follow his orders.

Although, We don't know how he uses his clones in a fight, Such as making plans?

[However, It was established that he indeed cared for his clones.](#)

Support

Support

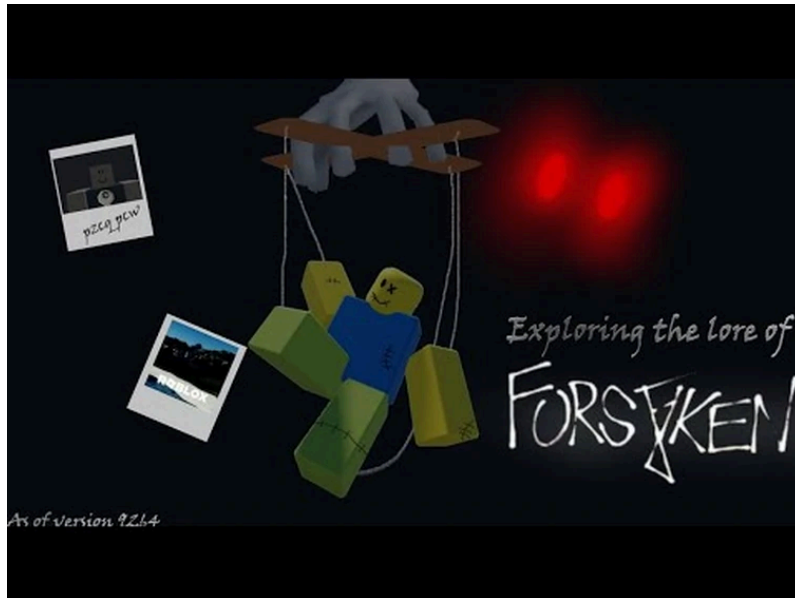

(Edited by me)

Again, I will show the important one's in frenzy's Army.

And Using only the clones of c00lkidd (Not his friends like 1x1x1x1, Jason, etc. & Same logic goes to frenzy. However, There is one character I would add that would make sense).

C00lkidd

The Spectre

(Idk who made this)

The Spectre is one by far the most important supporters for c00lkidd, Although. It is questionable for c00lkidd to have him. However, It actually makes sense.

Which I explained in "Before The Verdict" (Uh Oh Frenzy Fan's....)

The Spectre can do more than giving c00lkidd Immortality (In Resurrection);

- **Mind Manipulation & Possibly Action Negation:** The reason why Shedletsky is unable to swing his sword rapidly, Who is a swordsman. Shedletsky describes there to be a *"force that's stopping him"* from swinging. The Spectre can consistently notice all of the survivor's negative energy and use it against them)
- **Existence Erasure:** Caused The bodies of dead survivors (Their Corpse's) slowly fade away, leaving nothing behind.
- **Immortality:** To fully get rid of The Spectre's tyranny, you must stop playing Forsaken altogether, As stated *"Forsaken has an ending when there are no more rounds being played by you guys. The more you play the more the survivors suffer."* - Forsaken QnA.
- **Time Manipulation:** Implied to be capable of affecting time, As stated; *"The place where they reside, rotting as time passes."*, *"Fish, Wind, Time and Darkness..."*
- **Soul Manipulation and Fissionism:** [Can split the souls of its victims into hundreds of pieces and trapping those fragments inside plushes](#)
- **Incorporeality & Inorganic Physiology:** Exists As [Coding](#) & Outside the forsaken verse, Therefore. [Not having a physical form, Rather existing in a non-physical state.](#)

And [More](#)

Clones

Just clones of himself, Who can function themselves and can be controlled by c00lkidd. Which these clones can be buffed by c00lkidd's C00lGUI. (Which is proven, Due to the fact the clones were somehow resistance to being triggered by traps or sentries & Given the ability to set someone on fire by touch. Arguably Giving them the same scaling as him. Also Unknown how many clones he can give but arguably alot than the total count of frenzy's army) C00lkidd can also self destruct his clones by them disappearing from existence, or simply killed. (Shown by 007n7) Even, Given them weapons by it.

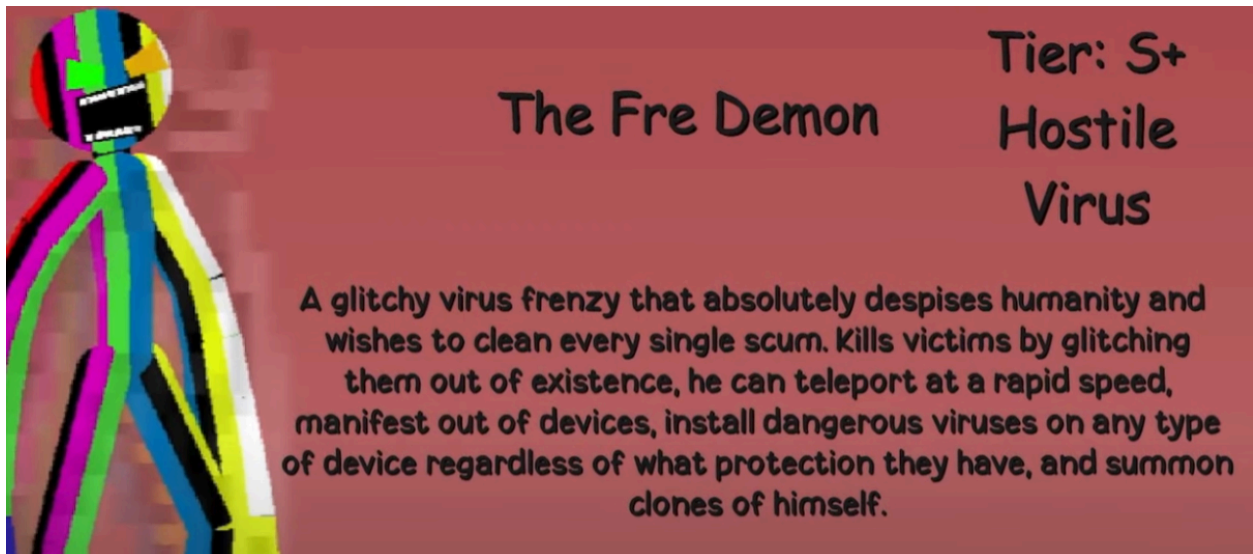

Zombies

When killed by c00lkidd from before or currently, It would become its own minion or zombie under his control. Which he can use against others. (Uh Oh Frenzy fan's....)
He Can also buff the zombies by the C00IGUI (same logic with the clones)

Frenzy

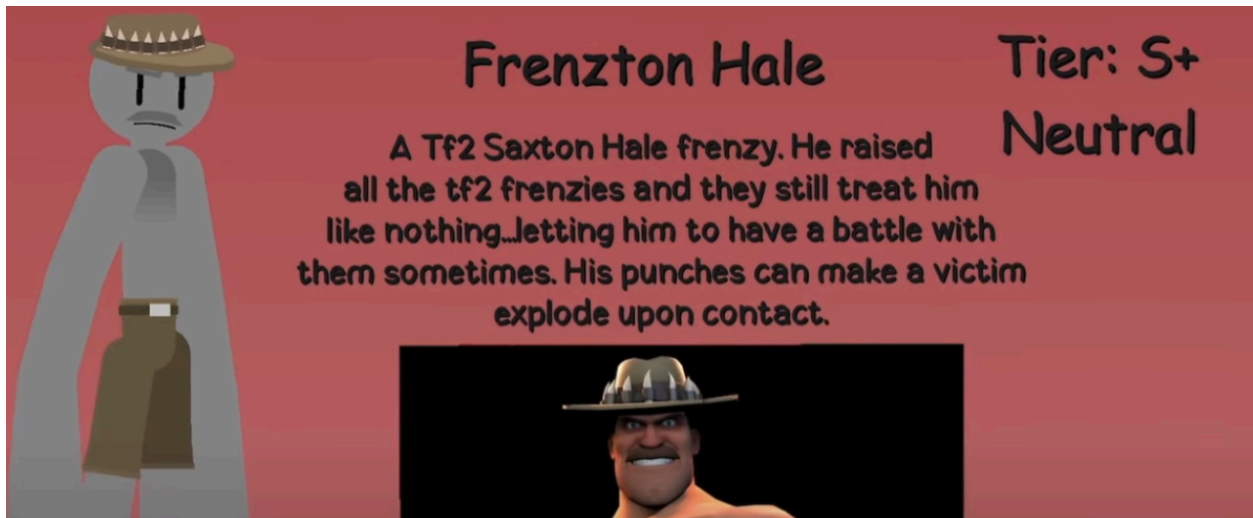

The Fre Demon

The Fre Demon is one the most important frenzy's clones, [Who are capable of glitching someone out of existence. Manifests from devices & Installs viruses in any device.](#) (Arguably, Uh Oh C00lkidd fans...)

Overall: Code Manipulation & Hacking & Abstract Existence Type 2

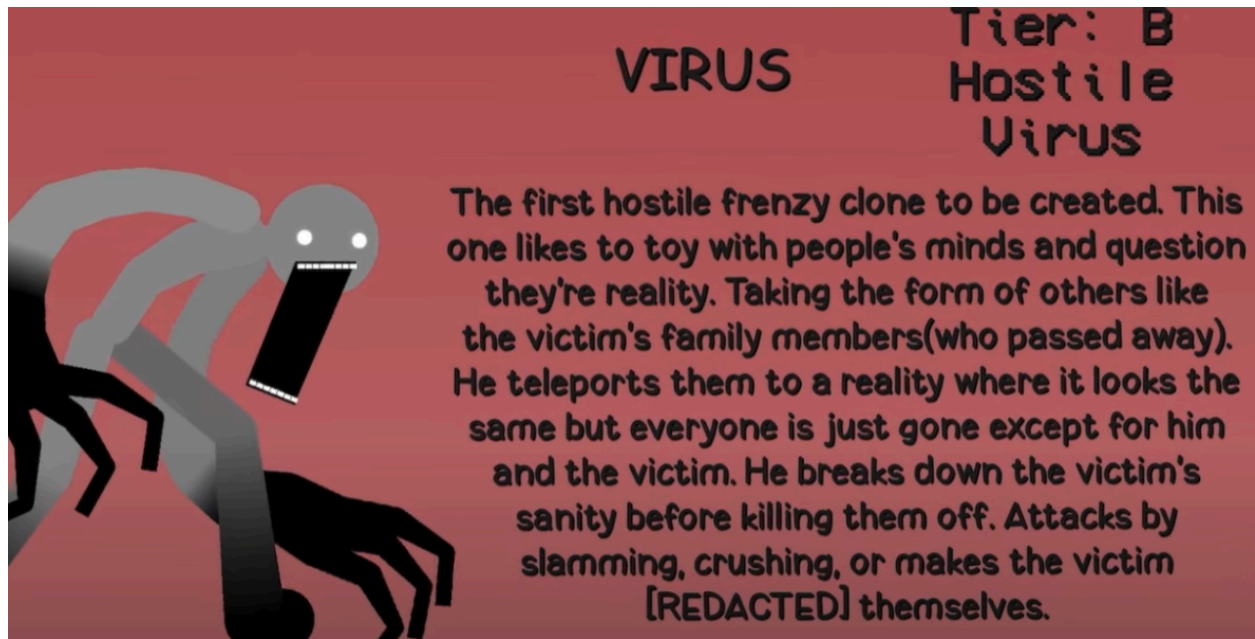

Frenzton Hale

Frenzton Hale is a inspiration of Saxton Hale, Who is one of Frenzy's Clones. [Which he is capable of exploding someone. when punching someone.](#)

Overall: Durability Negation & Explosion Manipulation

VIRUS

VIRUS is the first frenzy clone made by frenzy, Which he is one of frenzy's clones. He is capable of Sealing them to a reality where it looks the same, but only his victim and him. & Can manipulate their victim's to Kill Themselves. VIRUS can also disguise of your love ones.

Overall: Sealing & Madness Manipulation Type 3, Shapeshifting

Boss

Boss

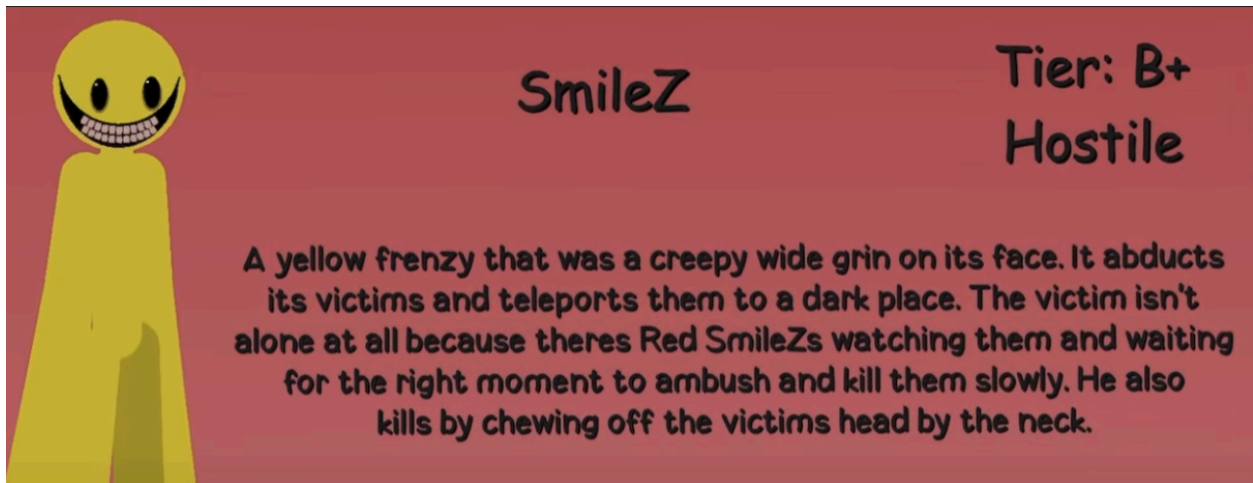

Tier: S+++++
[REDACTED]

One of the strongest and pure frenzies that appears to be a tall stranger with clown make and wears a jacket and hoodie. When he smiles, his eyes glow and release a powerful nuclear blast, wiping out absolutely everything in a long radius. Any damage he takes, he deflects it back at the attacker without even trying. He stays in the dark and watches, watching the victims suffering, watching his creator(Frenzy) torture others even having a bit of sympathy. He rarely talks.

Boss is one of the frenzy's clones, Who is basically a meatshield, that would deflect the damage to the foe, who damaged him.

Overall: Attack Reflection Passively

SmileZ

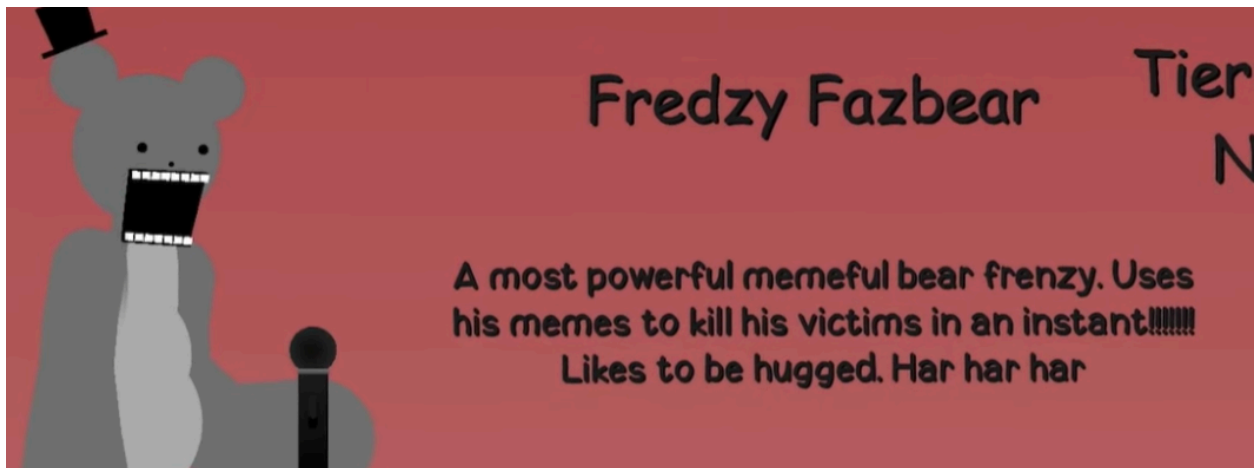

SmileZ is a inspiration of WSYT, from Pillar Chase 2. Who is one of frenzy's clones.

[He can Seal them to a dark place of where red versions of himself would try to ambush his victims at the right time.](#)

Overall: Sealing

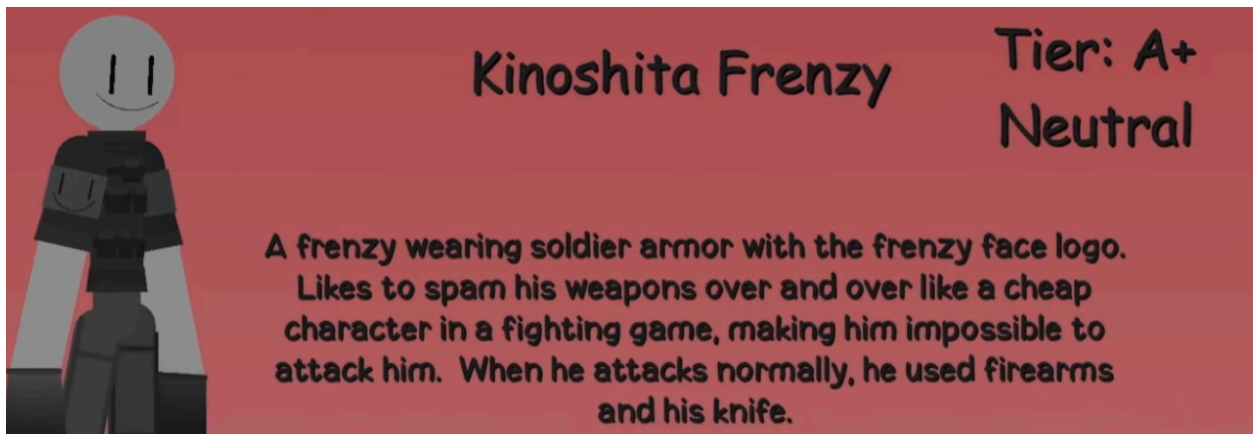

Fredzy Fazbear

Fredzy Fazbear is one of frenzy's clones, [Who is capable of using memes to kill someone.](#)

Overall: Durability Negation (One Shot)

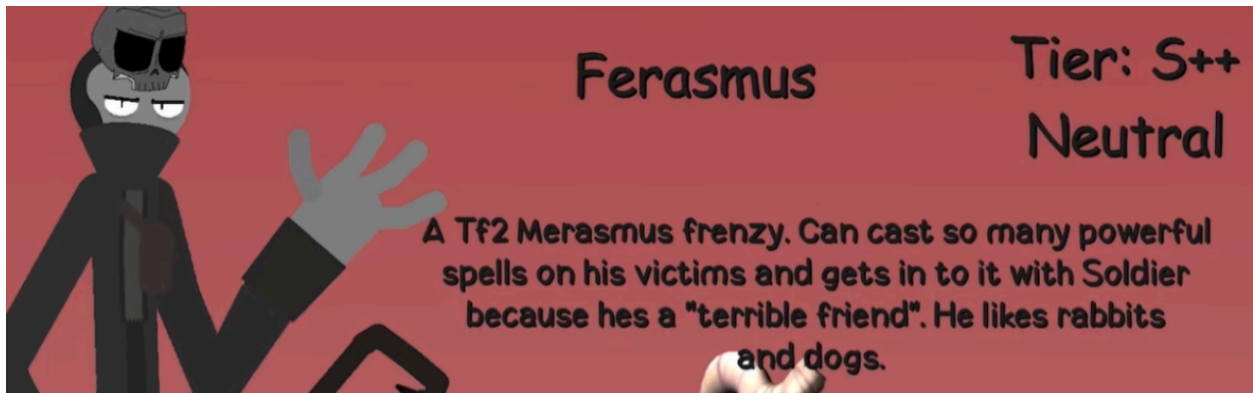

Kinoshita Frenzy

Kinoshita Frenzy is one of frenzy's clones, [Who is capable of stunning his foe's.](#)

Overall: Action Negation

Ferasmus

Ferasmus is inspiration of Merasmus, From TF2. Who is apart of frenzy's clones. [Who is capable of doing magic.](#)

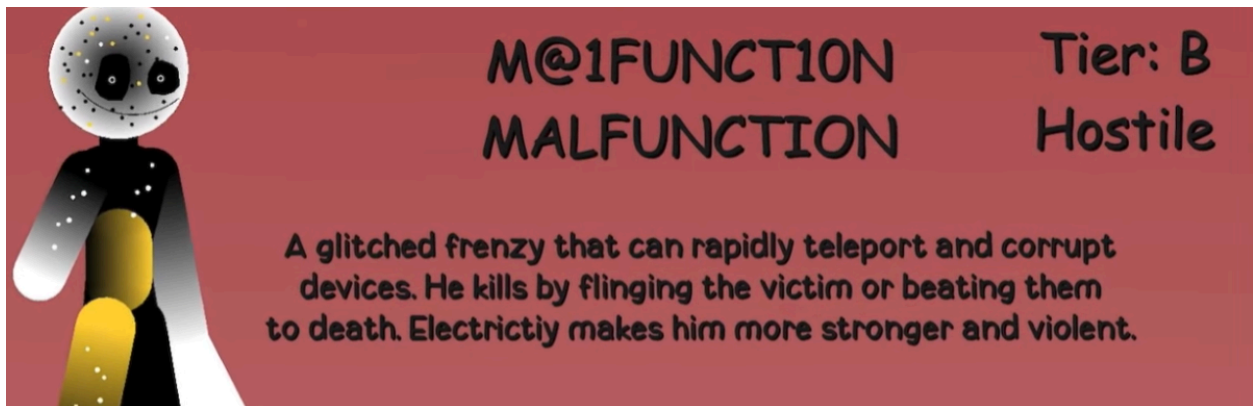

Overall: Magic

RED Medic

RED Medic is bald looking as- I mean. RED Medic is a inspiration of Medic, From TF2.
Who is capable of healing others and [resurrecting others from their death](#) with his ubercharge.
Overall: Regeneration, Healing & Resurrection.

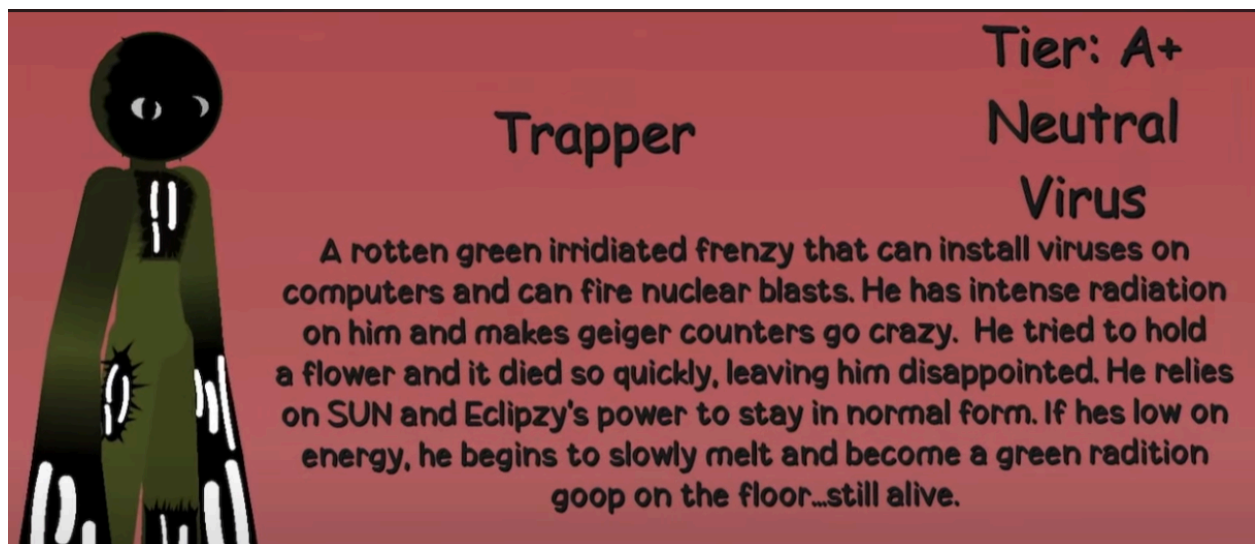

M@1FUNCTION MALFUNCTION

MM Is one of frenzy's Clones, Who is capable of [corrupting devices and flinging others.](#)

Results: Hacking, Code Manipulation

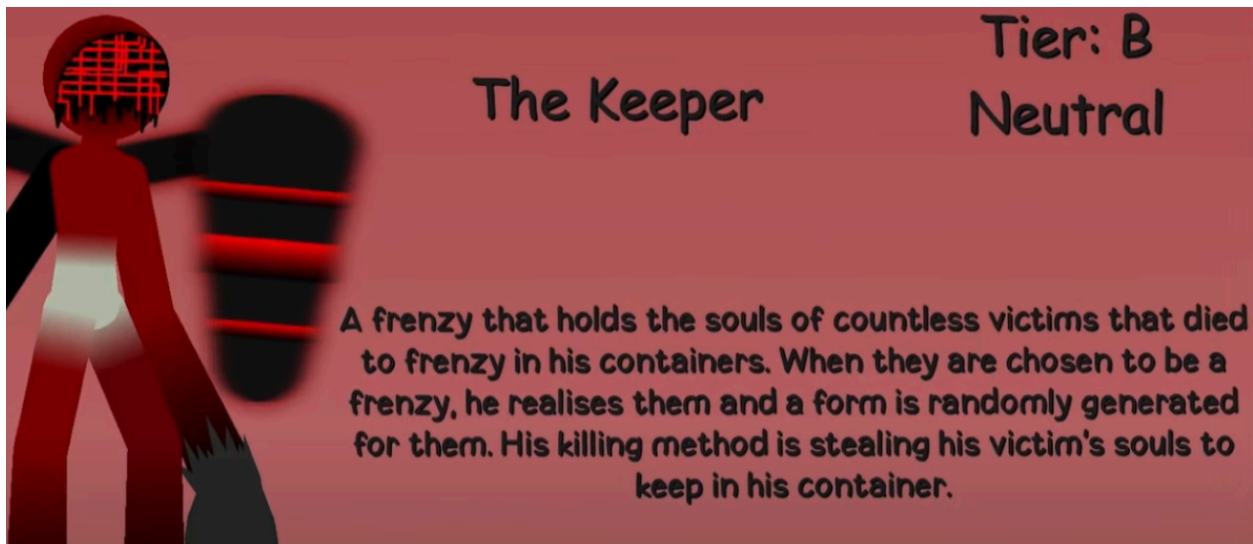

Trapper

Trapper is one of frenzy's Clones, [Who is capable of having intense radiation that is capable of decaying something really quick when upon interaction from a touch.](#)

Overall: Radiation Manipulation Passively

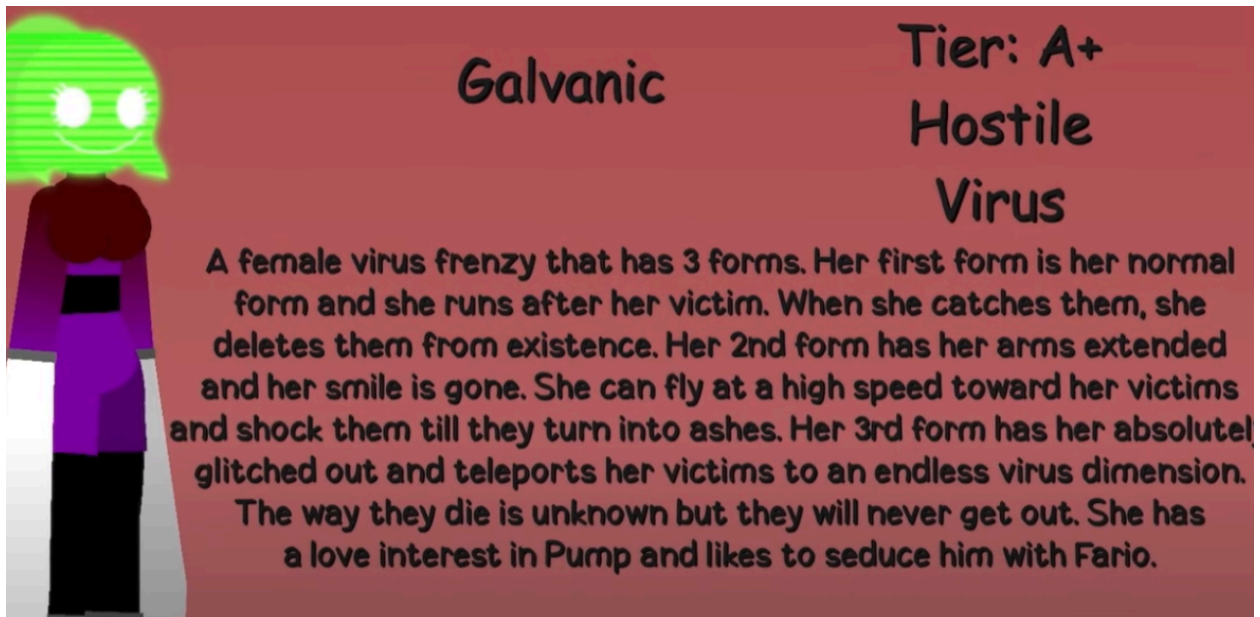

The Keeper

The Keeper is one of frenzy's clones, [Who is capable of containing someone's soul and containing it to his container.](#)

Overall: Soul Manipulation

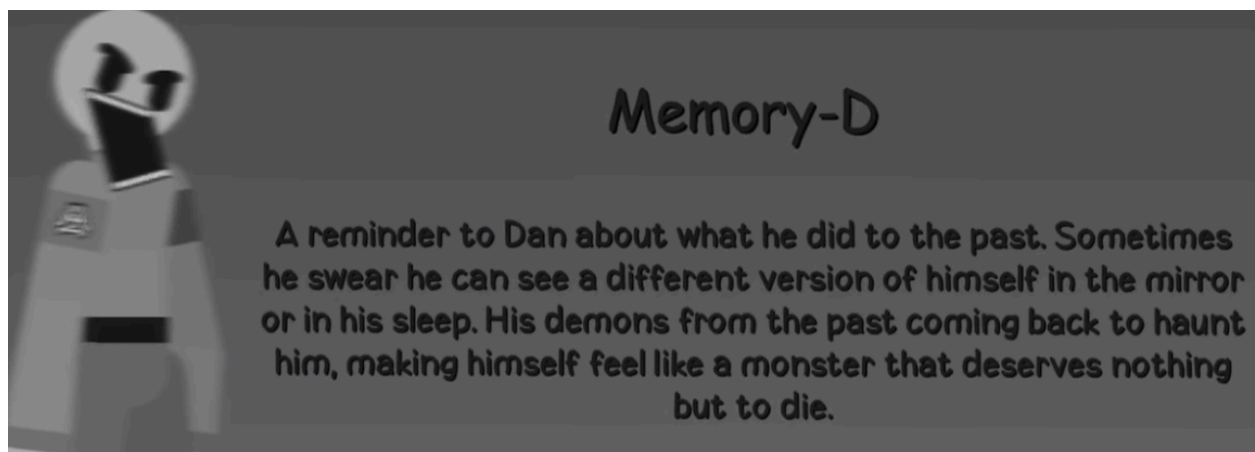

Galvanic

Galvanic is the one of the frenzy's clones, [Who is capable of deleting someone from existence & sealing them to virus dimension.](#)

Overall: Existence Erasure & Sealing

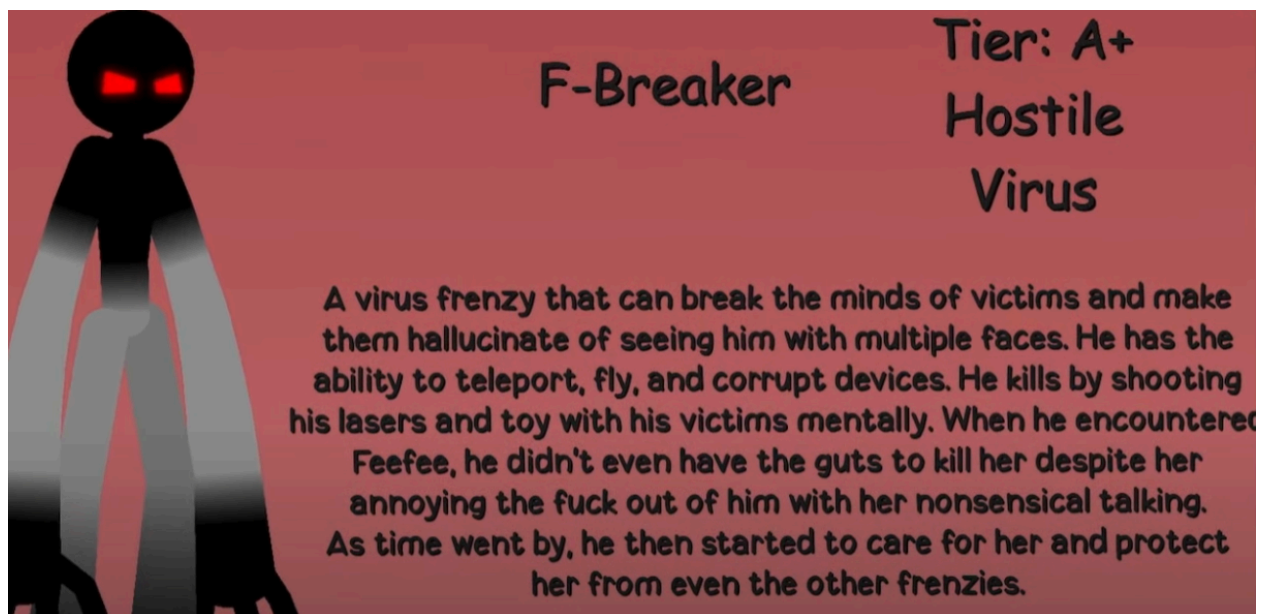

Memory-D

Memory-D is one of the frenzy's clones, [who is arguably a physical manifestation of someone's trauma. \(Aka Dan's Trauma\)](#)

Overall: Abstract Existence 2

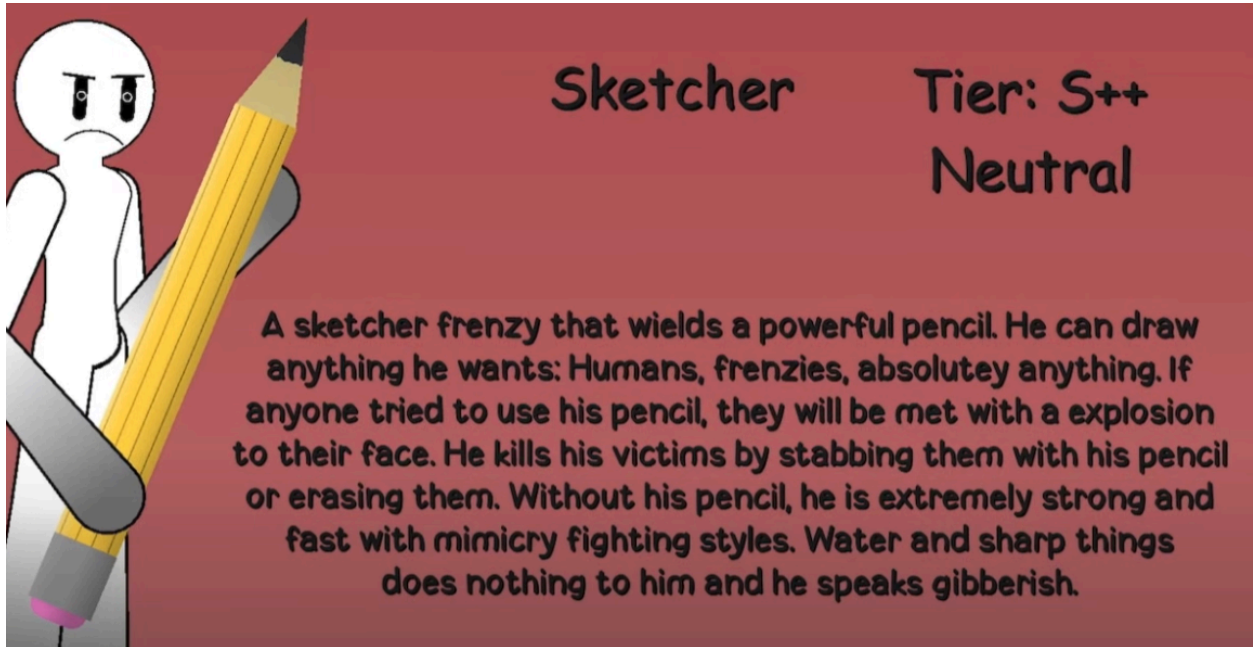

F-Breaker

F-Breaker is one of frenzy's clones, [Who is capable of breaking minds of his victims, making hallucinations for them to see, & corrupt devices. As he is capable of flying, & teleporting.](#) (Bro was made to be infinite in that death battle scene)

Overall: Mind Manipulation, Hacking & Code Manipulation, Flight & Teleportation

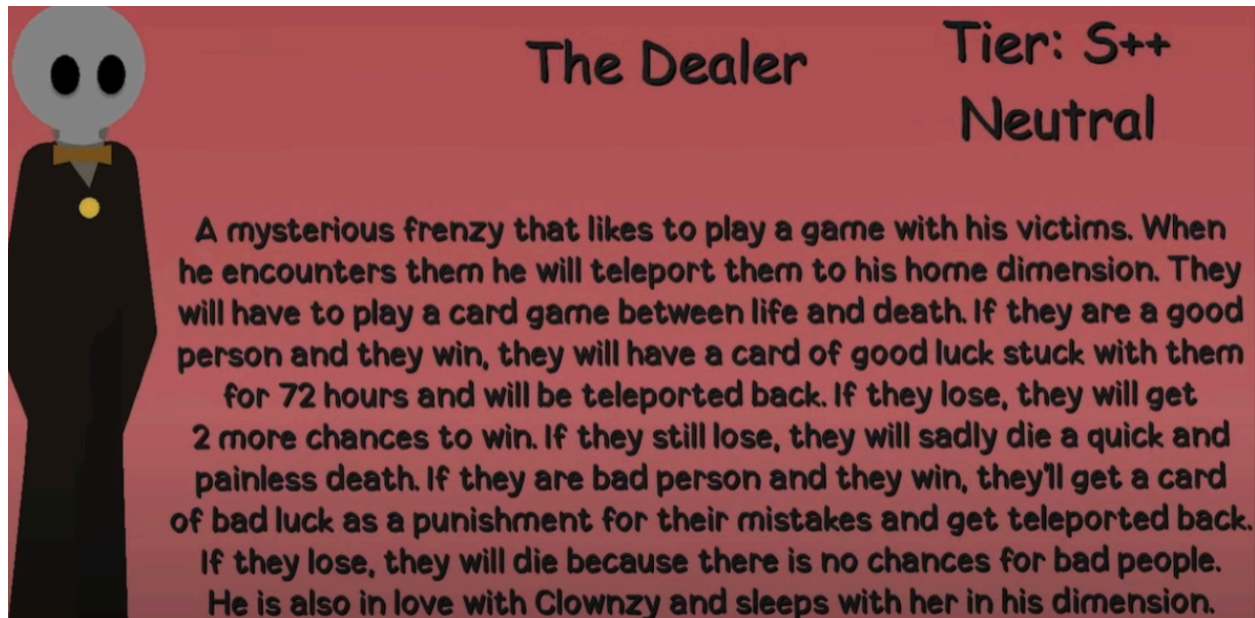

Sketcher

Sketcher is one of frenzy's clones, [Who is capable of drawing anything he wants. Such as humans, frenzies & "Anything". However, Can also erase someone.](#)

Overall: Creation, Existence Erasure

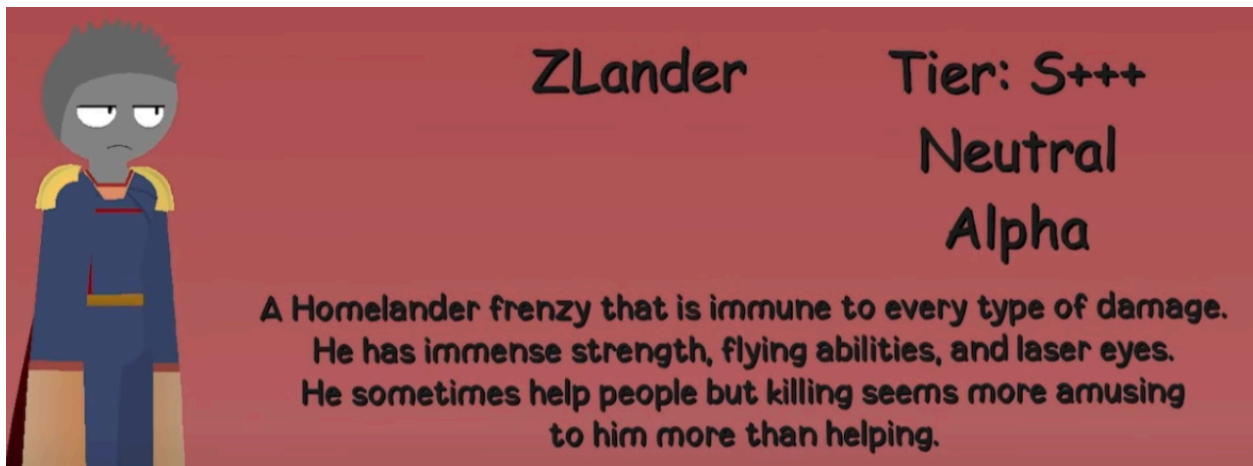

The Dealer

The Dealer is one of frenzy's clones, [Who is capable of sealing him to his home dimension. Which would force them to play a game. If they won and being a good person, They can escape. If they are a bad person and won, They will be sent back again and having a card of punishment and bad lock. However if good person lost, He will die in painless death unless he didn't lose his 2 other lives. However if the bad person lost, he will die.](#)

Overall: Sealing & Fate Manipulation

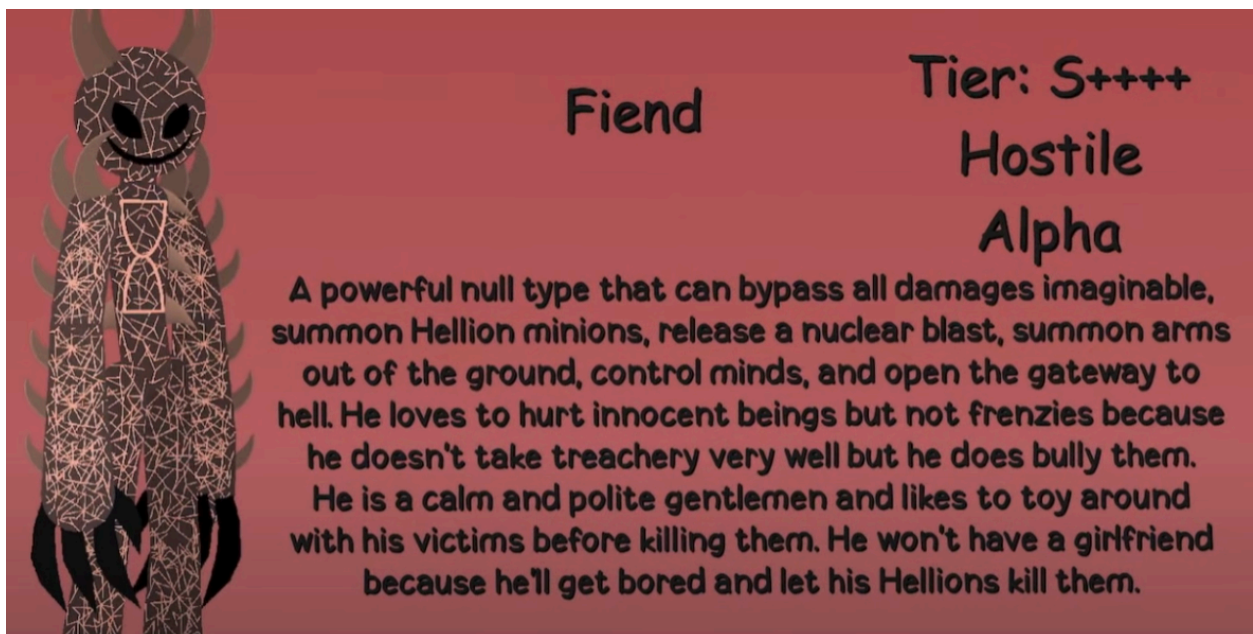

ZLander

Zlander is a inspiration of homelander from the boys. [Who is one of the frenzy's clones. who is capable of being dealt no every type of damage and has flying and laser eyes.](#)

Overall: Invulnerability, Flight, Temperature Manipulation & Energy Projection.

Fiend

Fiend is one of frenzy's clones, [who is capable of bypassing any damage dealt to him, Summoning minions, arms, & Controlling Minds. Including, opening a gateway to hell?](#)
(Another Infinite Wannabe)

Overall: Invulnerability, Summoning, Manipulation, Dimensional Travelling

Televisionist

Televisionist is one of the frenzy's clones, [who is capable of invading screens, & glitches them out. until they are off.](#)

Overall: Code Manipulation

FZ1

FZ1

Tier: B+
Hostile

A heavily damaged mechanical frenzy that make other frenzies even more stronger even the weak ones. He will release neurotoxin that will poison the victim and make frenzies even faster and more violent than they were. The toxin lasts for an hour for the frenzy but it will kill the victim's heart after causing intense pain.

FZ1 is one of frenzy's clones, who is [capable of buffing the clones & release poison gas.](#)

Overall: Statistics Amplification & Poison Manipulation.

COOIKIDD

- Slightly faster than the survivors, [Who can run this fast.](#) (7.6 m/s, **Athletic Human**)
- Can travel faster than the survivors, As Walkspeed Override is the fastest Movement ability in the entire game. (**Superhuman**)
- [Can react to Subspace Tripmine Explosion, Before it detonates.](#) ([11.582.4 m/s](#), **High Hypersonic**)
- Can be buffed by C00IGUI, That is capable of corrupting, through roblox games. (**Immeasurable**)

CLONES / ZOMBIES

- Slightly faster than the survivors, [Who can run this fast](#). When controlled to be running, rather than walking. (Arguably, 7.6 m/s, **Athletic Human**)
- Should have the same speed as c00lkidd (11,582.4 m/s, **Superhuman to High Hypersonic+**)
- Can be buffed by c00lkidd's C00IGUI (**Immeasurable**)
- Depends what type of corpse that c00lkidd had controlled, after killing the foe to use as a zombie. (**Varies**)

THE SPECTRE

- Should be superior to c00lkidd's C00IGUI (**Immeasurable**)
- Seemingly pulled in survivors from different parts of their timelines, dubbed "Milestones" (**Immeasurable**)

Weakness

Weakness

C00lkidd

PSYCHOLOGISTS HATE Him!

He gives FREE therapy sessions & comfort to MILLIONS a day

Friendly neighbourhood cat exposes shocking secrets to life.

LEARN THE TRUTH NOW

(I do not know who made this)

C00lkidd has a very playful personality, and doesn't even register what he's doing as "fighting" or "killing", making it quite **unlikely he'd intentionally go for a killing blow first**. additionally , C00lkidd has never fought somebody on his level before, besides 1x1x1x1, only survivors who, while strong, do not fight anywhere near his level due to their lack of abilities.

However, if provoked too much, he will likely take a much violent approach at fighting.

Additionally, The Spectre's brainwashing will wear off of C00lkidd after an extended period of time, meaning C00lkidd can and will break out of his trance.

He also still curious and naive, as he is still just a **child**.

Frenzy

(I made the art)

Frenzy has been shown to be angered easily, **Satanic and Hostile to Anything**.

However, still keeps a childlike personality & is shown to be chill with others to those who he knew.

There is a problem though, [he mainly targets the one he chooses to fight](#), **while not noticing the surroundings**.

He even shows anger towards those who disturb what he is doing, [Like how this frenzy clone disobeys him and then disturbs what he is doing](#).

Update:

Sadly the videos were removed. However, its still usable.

Before The Verdict

Before The Verdict

How would the interaction/fight take place?

Before:

Okay In this VS BLOG, Ima make a scenario to how they would interact and fight in the first place. (Like a headcanon)

Since, AnAverageDude731 Main Series takes place in SCP Foundation, and Forsaken uses popular meta's that is related to roblox. I would use [SCP Demonstrations](#) (Which is one of the nostalgic SCP Games in roblox, Which was back then. Old one or not, which doesn't matter.) as the location for them to interact, or fight.

“How would C00lkidd end up being there (Including The Spectre)?”

~~Even tho, We have seen maps that the spectre has made. There are maps that he hasn't made and basically stole them for the survivors to be tortured. (Like Ultimate Assassin Grounds, Yorick's Resting Place, Area 51, Haunted Mansion, Etc)~~

~~Also, It doesn't really matter, if he remade the maps for the balance.~~

(I don't care, If it's inconsistent or out of character or not, to add it. I still needed to find a way of how both of their supports would be added, otherwise either both armies being added or removed would change the results.

For example; Frenzy solos C00lkidd, because he doesn't have his army, or C00lkidd solos frenzy, because he doesn't have his army.)

The Interaction and Fight is still entirely possible (Even/When, We don't add my headcanon) [when frenzy and his clones have the ability to go to popular media's, and real life.](#) (Which the spectre can pull people into forsaken from real life, and forsaken is considered as a popular game)

Update:

So after researching. [I found out that frenzy plays roblox](#), Where he bullies kids in the game. Which absolutely works of how c00lkidd and frenzy met.

So, The Spectre could possibly take him in and the clones noticing and begin helping frenzy ([Because they are capable of immersing themselves to popular media's](#)), or any different scenario that makes frenzy go into forsaken/eternal hell along with his clones.

Is The Spectre Helping C00lkidd?

Yeah, It actually makes sense?

The Spectre was known to be the monitoring and responsible for tormenting the survivors, he kidnapped others from real life & popular media's and transported into his own realm containing the killers, Which he had also kidnapped from popular media's. (Called as Eternal Hell)

And Why would he be usable.....?

Its simply because someone that isn't even known or exist as a survivor in the series, Frenzy. would be a potential threat to his laws and game (Including the torment & killer aka c00lkidd). Meaning frenzy wouldn't follow his rules in his own realm for the sake of the balance between him and c00lkidd. Which would require for the spectre to downgrade frenzy & help c00lkidd to do so.

Which is why C00lkidd got bigger and was granted a copy of a C00IGUI modified by the spectre

Also, The Spectre wouldn't even care for being usable only for ""Alliance"" as a supporter, by the way. Since, He only cares about **maintaining the endless cycle of torment.** (Which is the reasoning why his here)

Does Frenzy actually have control over his clones?

Before:

~~Yes & No, It was implied that frenzy would kill them, If they don't do whatever he says.~~

~~(Basically, Controlling them by fear)~~

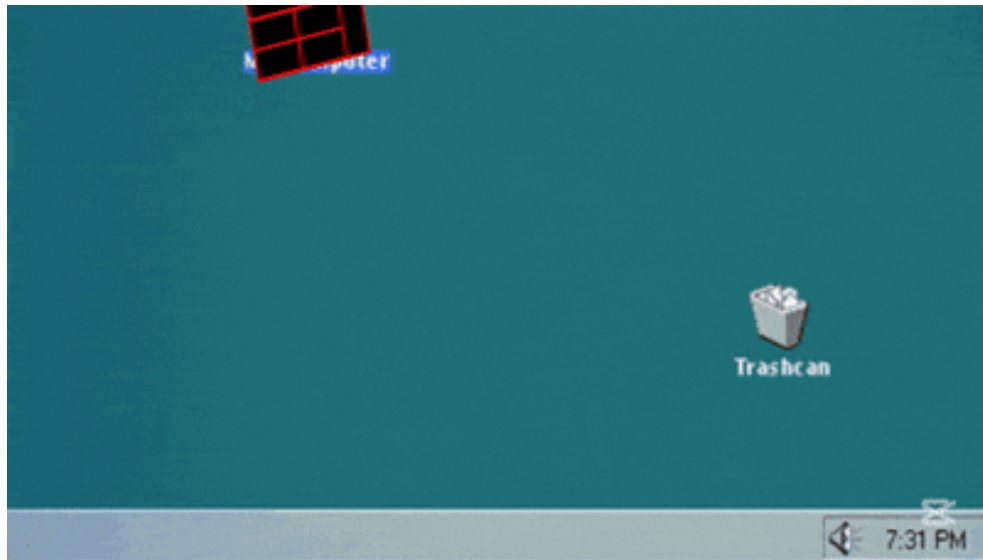

~~However, In this blog. It would involve alot of the clones being killed by c00lkidd's army so.....~~

~~His army would just easily dropped from his c00lkidd's support advantages. (Since, it's less actual tactical control and more about dominance or intimidation.)~~

Update:

The Author (AltDude) [Confirms](#) that, His clones would follow his orders. Frenzy only uses fear on the weaklings to be forced to fight his opponents, Only for **Below Tier C's Frenzy Clones**. However, Its still not confirmed how he manages his own clones for now. (Since, he mainly hangouts with them).

Can The Fre Demon & Other Clones Counter The C00IGUI?

Yes, C00IGUI is known as a device for c00lkidd to use in combat or not, when messing around with reality, or buffing himself;

Fre Demon is stated to install viruses in “any device”,

F Breaker is stated to corrupt devices,

MM is stated to corrupt devices,

Etc.

Therefore, It should work right?

However....

It was implied that the spectre granted 007n7 and C00lkidd their version of the C00lgui, which must have taken several steps of coding. (which explained why they have so many limits of the C00lGUI in forsaken)

Therefore, The Spectre would just give him another version of the C00lGUI for c00lkidd to use that works similarly the same level as the original one he used to corrupt the roblox games, Which are known universes.

“Can They Just Keep Countering It Tho?”

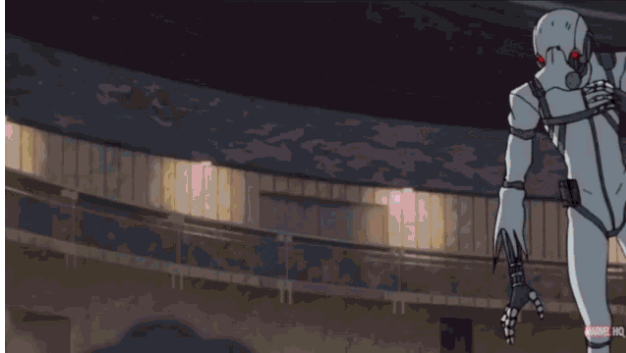

Which is why I decided to put these 2 factors to see the possibilities of this outcome;

1. The Spectre countering that completely (By getting rid of them or their actions of activating it)
2. The Spectre is fast enough to give c00lkidd his C00lGUI Copies, before one of their abilities were activated through action, or mind.

Can Frenzy & The Clones Interact The Spectre?

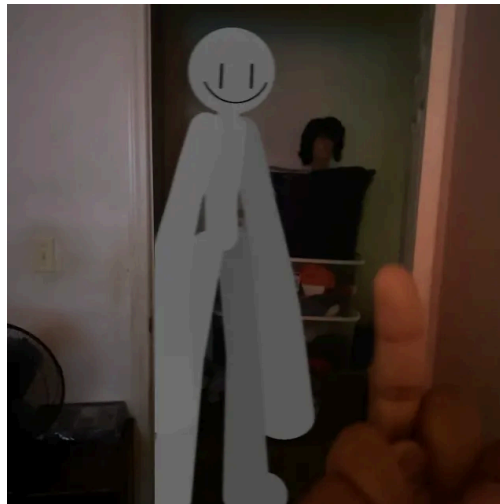

**The Spectre when
Frenzy and his clones
try to interact him with
their abilities:**

Simply No, He exists as coding in the game, & Outside the game. Via existing as the same level as the players in their real world.

Even with abilities like “Code Manipulation” Wouldn’t work on him (When it only works on devices), & Also [lacks a physical body](#).

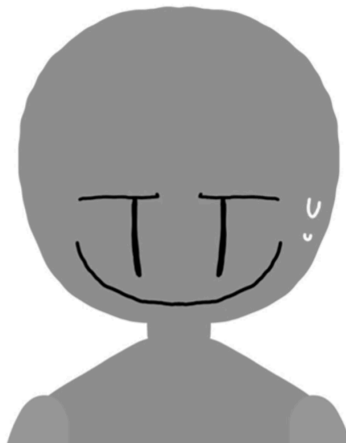

“What about their Immersion Ability?”

That wouldn’t work either when he can’t interact with someone, [who exists as “coding” and has no physical body whatsoever](#).

Why does Frenzy Upscales his Clones?

**after his clones were
destroyed by 00lkidd
and spectre:**

From what I have said earlier in Experience & Skills Tab, Frenzy is completely superior than the rest of his clones. Which were supported by many cases from author statements and consistent feats.

Is Frenzy's Social Influence & Mind Manipulation going to work against C00lkidd?

(I made the art)

Yes and No, C00lkidd has shown shrugging off the effects of being brainwashed by the spectre after 4 minutes. Even, If frenzy has the capability to remove the effects. The Spectre would do something about it (By getting rid of his ability, or action for doing that) and Add the effects again. However, The Spectre would use his effects of c00lkidd being brainwashed (which happens every time) as a advantage, Against Frenzy and his clone's.

Like a gain motivation for c00lkidd to keep fighting, is what I can describe it.

However, if provoked too much, he will likely take a much violent approach at fighting.

Additionally, The Spectre's brainwashing will wear off of C00lkidd after an extended period of time, meaning C00lkidd can and will break out of his trance. (Which applies to frenzy's Mind Control & Social Influence)

Does Frenzy's Immortality Negation Work on C00lkidd?

Sadly, It does not. Because, Altdude directly implied it only works on the frenzy clone's (Including himself).

"When Frenzy kills a clone, they are dead dead. They won't come back. =)"

However....

(By **Upcoming_ALT_**)

Possibly, **HE CAN**. If he managed to kill c00lkidd, before the buff from C00IGUI. (If he found the RIGHT c00lkidd, Instead of his clones.) Which will turn c00lkidd into a frenzy clone, like his other clones? And, then killing him for good.

However Again, The Spectre MIGHT do something about it...

Which is him preventing that to happen with his abilities (Like, Time Manipulation or Action Negation)

4D C00LKIDD??? LOW MULTIVERSAL C00LKIDD?

There were arguments about it being iffy. However, It should be consistent that he would earn this tier.

Robloxia is a multiverse where it contains roblox games, [Which were explained as alternative realities](#). Which are universes, However. [It also contains spacetime for each](#).

Which c00lkidd can [effectively / affectively corrupt the roblox games](#), Which is used as destruction ([As shown over here of him vaporizing the clouds](#))

C00lkidd would scale to this, Thanks to the C00IGUI. Which he can amp himself by either the modified version of the C00IGUI or Original One. Either way, he can scale to it in abilities & physical combat.

Also, C00lkidd is shown to harm and tank hits from 1x1x1x1, Thanks to C00IGUI Buff, [Who is incredibly comparable to 2x2](#). Which robloxia is made out of several lots of parts of him.

“How would c00lkidd activate his full potential?”

Since, VIRUS is capable of turning into his victim's love ones. 007n7 would be an example that VIRUS would use to shapeshift, as trying to kill c00lkidd. However, This could work as a way to make c00lkidd being threaten by frenzy's clones since VIRUS can transport c00lkidd into his own dimension involving multiple VIRUSES with the 007n7 to make him scared or frighten. Which would make c00lkidd go to his full potential if 007n7 was killed by them in the first place as a reminder death to c00lkidd or VIRUS manipulating his mind.

Is C00lGUI Corruption Harmful against Frenzy and his Clones?

Possibly **Yes**, c00lkidd can control the corruption as shown by corrupting the sky, [which vaporized the clouds](#).

Not only is this the biggest threat against Frenzy and his clones, It's required for them to get rid of it. Which would be a massive problem later on.

Since, it's capable of corrupting roblox games, which are universes, containing each spacetime.

Making this **usable, in combat**.

Even, if we don't argue him being amped by it. (Although, It is needed in this blog)

Update:

Okay, I've heard arguments about vaporization, being taken as durability negation. However doesn't really matter lmao, it's still connected to their Power / AP.

Can Stuns work on c00lkidd? (& His Supporters)

No, C00lkidd has been shown to be immune to stuns for a short amount of time. Whenever he gets stunned by one. (By Two-Time, or Shedletsky)
Which is arguably the effects from the spectre.
(Which applies to his supporters)

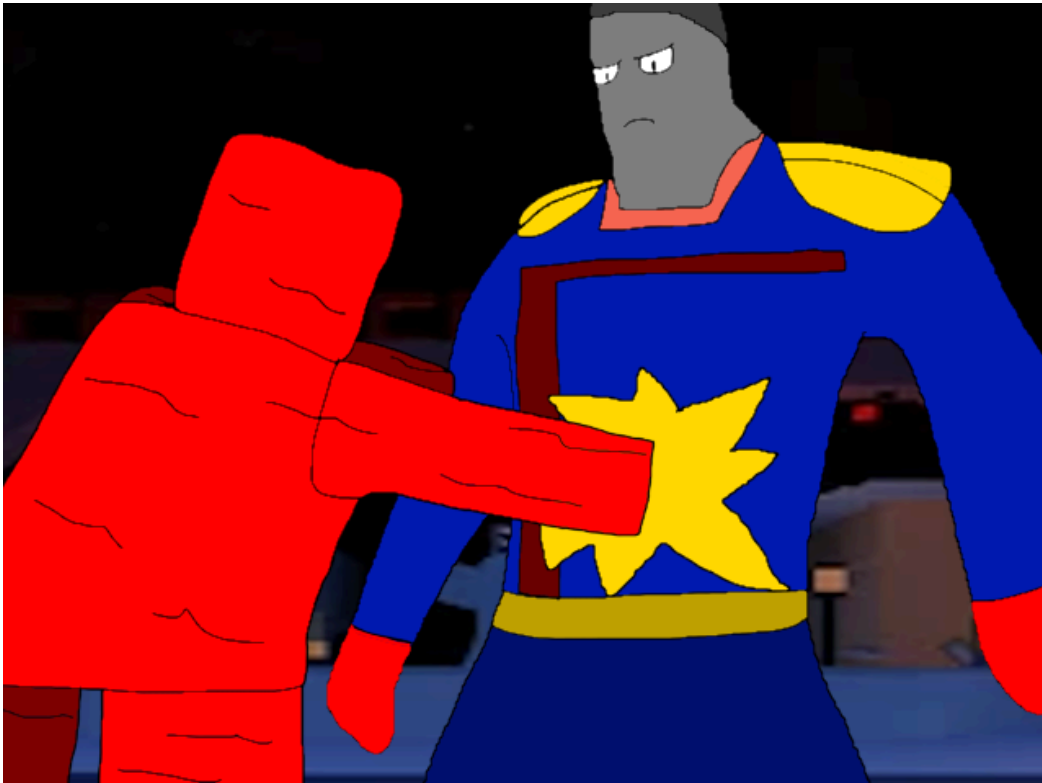

INFINITE SPEED FRENZY?

Sadly, No. He does not get infinite speed and neither does sleepy.

It has been contradicted by scp 999, Who confirmed that these forms, including the infinite form Were nothing, but **NON CANON**. Which is made for fun by the author.

GOD MODE FRENZIES??? (Invulnerability)

Frenzy Clone's are shown to be immune to any *type* of damage.
So you may think...

"How can C00lkidd and His Supporters bypass it?"

Simple, **DURABILITY NEGATION**.

Durability Negation is an ability to bypass through durability,

Meaning. C00lkidd can bypass it, Including his supporters like his clones.

C00lkidd has durability negation, With Corruption (From his C00lGUI, That is shown to vaporize universes, aka roblox games.) or Corrupt Nature that can go through wall's and player's (Which damages them).

Verdicts (WIP)

Verdicts

To decide on this verdict for the matchup, We will be going off at 4 different categories (Stats, Skill, Powerset (Which goes over Abilities, Resistance), & Misc. (Which goes over other factors like Equipment, Leadership, & Support))

1 Point = 2 Bar's in the point box, However, blank points will be considered as free points to the person who has the most points.

However Again, If it was ever close. It would give the the person who has less points will get 4 free points.

Statistics

"STRENGTH/DURABILITY"

Going off to stats, both of them in terms of physical attack potency reaching around building level. However, both reach above it.

C00lkidd can go from **Town to Universe+ to Low Multiverse levels.**

While, Frenzy can reach **Mountain to Large Country to Star Levels.**

Via, C00lkidd vaporizing clouds and universes. While Frenzy upscales his clones who can destroy a mountain with it's lasers, shaking the moon & being powered by the sun or releasing a sun explosion.

Overall, C00lkidd takes AP. (+P1)

"SPEED"

Both of them are fast enough to blitz others that can reach at subsonic or higher, However both can get above.

C00lkidd reacts to a house explosion, buffing himself by the c00lgui that is capable of corrupting other universe's that fast. **(High Hypersonic+ to Immeasurable)**

While, Frenzy can upscale his clones who can go from earth to the moon in short timeframes.

(Massively Hypersonic+ to Sub-Relativistic)

Overall, C00lkidd takes Speed. (+P1)

"INTELLIGENCE"

Both of them are shown having impressive feats on their intelligence.

C00lkidd had Effectively led Team C00lkid and gained widespread popularity at a young age, Can effectively utilize the C00lgui much like his father, 007n7, who he received coaching and learned from ([Which he managed to hack & corrupt through roblox games with C00IGUL](#)),

He has learnt basic academics and Knowledge from fifth grade. (Judging by his age and sch00lkidd skin), & [created the C00l Carnival, which is a map with functional technology and headlights. alongside a solid. compact design. which implies many degrees of creativity.](#)

Making C00lkidd **Gifted**.

However, Frenzy can reach above gifted. As he is superior than RED Enginner. Who can make sentries & dispensers (Including a robotic girl).

This should qualify him as a **Genius**.

Overall, Frenzy takes Intelligence. (+P1)

Experience & Skills

Both are experienced fighters indeed, however. It is questionable who is *better* in Experience & Skills.

Both have been shown fighting for arguably **YEARS**, As [C00lkidd is Implied for torturing the survivors \(As it involves Tyler who was tortured by the spectre for 200 Years. Which also involves combat against a military soldier\) For 200 Years and yet not being capable of aging by the spectre.](#)

While, Frenzy is shown being stuck fighting others who are impressive fighters in M. U. G. E. N. As a mod for years ever, Since the game was released.

Also, C00lkidd and Frenzy are experienced within their abilities.

Overall, I would give this to c00lkidd (+P2)

Since, M. U. G. E. N. is released in 1999 or around 2000's.

Powerset

Even Tho, Both are experienced with their abilities. We have seen what both are capable of doing with their abilities.

However, I will go off who has better and stronger Abilities & Resistance.

The C00IGUI is strong enough to corrupt through universes, buffs the user, unlimited cloning, etc.

C00Ikidd also has better abilities than him, As he is shown to be Immortal by the spectre effects (Which his resurrection should be the same timeframe as two time's resurrection, Which is an instant), Can gain infinite stamina when the survivors are not around (Which are the effects by either C00IGUI or The Spectre),

And Sadly Frenzy lacks resistance, While C00Ikidd is shown being immune by the explosion, glitches, mind control, hallucinations, & Pain.

Overall: C00Ikidd (+P1)
