Did you enjoy your stay in Poland?

17 ответов

Why did you enjoy your stay in Poland?

Learned a lot of interesting things. Good organization of the event.

People were nice and friendly to me and my group!

Cultural experience

i got to meet amazing new people and learn a lot about poland and it's culture!

The activity and workshops were very well prepared, with a lot of interactivity, involvement and good time for students and teachers. Also we discovered polish cuisine and legends and many other interesting facts.

because Poland is the beautiful country

I loved to know the culture, see the beauty of the country. I also loved to meet new people, from different countries, with different perspectives- 8 persons

the location of the hotel is close to the school and we stay in the same hotel with our project partners.

The things I liked?

Work shops, ice-break activity, quest games, evening with Polish families, cooking Polish food

the diversity of activities, group work

The views, walking around the old town and the people.

the views, monuments, architecture, food and most of all how nice everyone was

I liked the atmosphere in school and how workshops were done, i liked the polish evening out for students, the visit of museums in Warsaw and tour guide in Lublin. Also the workshop with cooking and ebooks was also very creative

the environment of children from other project-countries

The new teachers i met and the school

School and friends from another country sincere and Lublin city was funny.

cars stopping everytime at crosswalks

School and sport

I liked the culture, the socialisation, the beauty of the country

Polite and courteous people, the school and facilities of the project coordinator, transportation facilities and hospitality, and the activities carried out in the mobility contributed very well to our students.

The reception was very warm, I loved getting to know the cities the people and living new experiences

The things I didn't like?

I liked everything-5

it was very tiring in the theater NN -3

Too many excursions and tasks... I would like more simple walks around the city

The lack of involvement of Polish students during the week

Everything closes early.

The program had a lot of activities regarding Poland history. Maybe one day of explaining Poland history could have been better.

The weather was very cold, and we got tired. Air pollution

there weren't bidet nozzles :)

Didn't like the hotel in Świdnik.

The accommodation was very comfortable, we have WiFi everytime, the weather was warm.

The things I learned during the project meeting...

history of Polish cities, interesting game ideas, education system in Poland

New words

Prepare Polish traditional food

I learned about the culture, architecture and gastronomy of Poland.

To collaborate between the group, to combine nonformal with formal education.

English is very important in life, English words, communication on English language- 4

I learnt a lot about Poland history and how the school system is run in Poland. Also got a feel of how Erasmus projects are conducted in other countries

Visiting another country and cities are good. Meeting different culture and different people also good.

Science terms like surface tension etc. , history of Poland.

Europe preserves their old buildings very good

I learned how to cook some traditional foods, I learned more about the Nazi invasion in Poland, more about the Polish daily life

group work during the mobility, using students as more active participants

I also want to add...

Thanks to Marcin!

Overall a very good experience

it was the best week of my life

It was a great experience for students and for teachers.

want to participate in more often projects like this one, because it's very interesting and cool

Thank you to all teachers who participated. Also a big thank you to Marcin, Beata and all teachers for their warm welcome and hospitality

I also want to visit more city and more shopping center. I also stay more day in the project.

I learned how to cook polish traditional dishes

I was really pleased with the trip we had and love to have a second visit to Poland

The fact that many activities during the mobility are paid has damaged our budget within the scope of the project. Project activities need to be done for free or with lower fees. Causes it to exceed the budget of all project partners.
