

Exclusion Criteria based upon Symptoms

Fever – Children should not be sent to school with a body temperature greater than 100.0 Fahrenheit. Children with a temperature greater than 100 degrees will be excluded from school. Students may return to school when they have been fever free **without** the use of fever reducing medicine (Ibuprofen-Advil, Motrin or Acetaminophen-Tylenol) for 24 hours.

Vomiting-Children should not be sent to school if they have vomited 2 or more times in the past 24 hours. Students may return to school when 24 hours pass without vomiting. Students will be excluded from school if they vomit, unless vomiting is known to be caused by a condition that is not contagious.

Diarrhea- Children should not be sent to school if they have 2 or more loose bowel movements in 24 hours. Students may return to school when symptom free for 24 without the use of medication to control diarrhea.

Generalized rash of unknown origin- Children should be excluded from school until the rash is resolved or medical clearance from your primary healthcare provider is given to the School Nurse.
