Key Highlights

1. 'My Misconception Mentor' is an online teacher development offering that helps teachers to tackle the root causes of major student misconceptions and common errors identified by ASSET, India's leading diagnostic assessment. It is offered in 4 series- Primary Math, Middle School Math, Primary Science/EVS, and Middle School Science.
2. Each series has 8 two-hour online sessions running over 4 months. Teachers work on practical assignments in-between the sessions and are provided feedback on their submissions. There are also 16 optional 'Teacher Hour' sessions that run through the year in which subject teaching experts are available twice a month, to respond to teacher queries live. Teachers can share specific doubts about concepts, ask for teaching ideas and resources or anything pertinent to student learning and assessment. Thus teachers receive support well beyond the end of the 4-month course. The program is built on the successful teacher mentoring work of GenWise with leading schools in India and the UAE. See [Feedback from GenWise Teacher Mentoring Programs](#) for feedback/ past customer list. The course approach and topics covered are available [here](#).

3. The program focuses on addressing root causes of misconceptions rather than superficial fixes, helping teachers build deeper subject and pedagogical content knowledge in the process that leads to sustained enhancement of teaching practice.
4. Teacher motivation to enhance their practice is built because of the practical action-based approach in the program that provides early wins. There is a balance between reflection, theory and practical application.
5. Schools can expect the following benefits from the program through committed participation, over a period of time-
 - Lasting enhancement of teacher capability
 - Identification of 'Teacher Champions' who will support the growth of all teachers in the school
 - Improvement in student learning outcomes as measured by a high-quality diagnostic and benchmarking assessment like ASSET. Initially schools will see

improvement in teacher knowledge and teaching practices and more engaged classrooms, which will lead to improved student learning outcomes in due course.

For details of the program philosophy and the teacher training approach, refer to [this document](#). You can see the [faculty profiles here](#).

Program Fee and Deliverables

The program fee for each series of 8 sessions is **INR 20,000 per participant inclusive of GST**. *If you are an Ei ASSET school or a teacher from an Ei ASSET school, you are eligible for a special price. You can email prakhar.ghildyal@ei.study or siddharth@genwise.in or call +91-8762703967 to receive a quote.* The fee includes the following-

Feedback from GenWise Teacher Mentoring Programs

Math and Science Teacher Mentoring

- "Our vocabulary and use of words also matter with the students- saying 5 upon 6 and saying 5 sixths makes a difference to the students - if we use the correct vocabulary, it helps the students build their concept, wrong vocabulary shatters it - and this builds up anxiety - when we handover run of the mill formulas, anxiety builds - when they do not understand and they have to memorise lot of formulas, that creates anxiety "- *Middle School Teacher, Shiv Nadar School, Faridabad*
- "If you give out rules and formulas, children have a tendency to forget the concepts. However if you have a process of questioning and exploring and arriving at the answer, the learning becomes a fundamental part of them and they remember concepts for a long time.... and they are able to apply it in different situations."- *Primary Math teacher, Gems Modern Academy, Dubai*
- "<Mentor Name> is approachable, has strong content knowledge, and shares interesting demos which can be done with simple things". -*Science Teacher, Inventure Academy*
- "<Mentor Name> shares excellent practical tips to explain concepts to students." -*Science Teacher, Inventure Academy*
