

Privacy Policy - Tap Count

This policy describes how the "Tap Count" application and its developer, "Bay Yolal," collect, process, use, and share information about you. This Privacy Policy applies to the "Tap Count" mobile application, whether on your computer, on your mobile device, on a website, on a console, PC, or platform, including Google Play (each a "Application" and collectively, "Apps"). It also applies to our Marketing and Advertising activities on all platforms and other services that we may provide to you from time to time. In this Privacy Policy, we refer to our Applications, websites, marketing and advertising activities, and other services collectively as our "Services". By downloading, accessing, and/or playing our Applications, or other Services, you agree to the use of your information in accordance with this Privacy Policy. If you have any concerns about providing information to us or it being used as described in this Privacy Policy, you should not use our Applications or other Services.

Information we collect when you use our Application and other Services

When you play and/or run our Applications or use our other Services, we collect information about your device anonymously. There is no direct or personal usage collecting as data requiring your name, surname, your information, etc. These are not wanted in our apps, and we are not logging these kinds of and similar data. Because we don't need and don't want to make an app that disturbs us, we want productivity for our app users, and thanks a lot.

We collect information from you when you voluntarily provide such information, such as when you play or run our Applications or use our other Services. When playing our Games, the information we may collect about you relates to the type of device you are using, device ID, Advertising ID, geographic information (i.e., country and region), mobile operating system, the type of mobile Internet browser, and gameplay information (i.e, how you play our Applications and purchases made in our Applications). Information that you allow us to access when connecting to your social media accounts through our Applications or Services.

Tap Count is a free-to-use and free-to-download application published on Google Play for worldwide use.

Tap Count has no log-in, log-out, sign-in, sign-up, or sign-out features.

Tap Count is an open-source project aiming for your productivity in counting numbers and sharing the counted numbers. It is also available to transform the numbers into Roman numbers and to read the counted numbers in several languages.

Tap Count may use third-party application libraries to serve you more benefits of the application, aiming for your productivity.

Data Safety

At Google Play, we prioritize the security and privacy of our users. This "Data Safety" section outlines the measures we take to ensure the safety and protection of your personal information when you use our Android app.

- **Data Collection and Usage:** We collect and process only the necessary data required to provide you with a seamless and personalized experience on Google Play. This may include information such as device details, app usage patterns, and basic account information. We use this data to enhance your app recommendations, improve our services, and ensure a more tailored experience.
- **Encryption and Security:** All data transmitted between your device and Google Play is encrypted to safeguard it from unauthorized access. We employ industry-standard security protocols and technologies to protect your information from potential threats. This ensures that your data remains confidential and secure during transit and storage.
- **App Permissions:** When you install and use apps from Google Play, you may be prompted to grant certain permissions. These permissions are explicitly requested to enable specific features and functionalities within the apps. We encourage users to review and understand these permissions before granting access to ensure transparency and control over the information shared.
- **Data Access Control:** Access to your personal data is restricted to authorized personnel only, and we employ strict access controls to prevent unauthorized use or disclosure. We regularly audit and monitor these access controls to ensure compliance with privacy standards.
- **Data Retention:** We retain your data for only as long as necessary to fulfill the purposes outlined in this Privacy Policy or as required by law. Once the retention period expires, we securely dispose of or anonymize the data to prevent any unauthorized access.
- **Third-Party Integrations:** Google Play may integrate with third-party services and applications. It's important to note that while we strive to work with reputable partners, their data handling practices may differ from ours. We recommend reviewing the privacy policies of these third parties for a comprehensive understanding of how they manage your information.
- **User Controls:** We believe in giving you control over your data. Google Play provides settings and options that allow you to manage your privacy preferences. You can adjust app permissions, control ad personalization settings, and review your data shared with us.

By using the Google Play Android app, you agree to the terms outlined in this "Data Safety" section. We are committed to continuously improving our security measures and keeping your data safe. If you have any questions or concerns regarding data safety, please contact us through the provided support channels.

This Privacy Policy is effective as of the release date of our applications on Google Play, and any updates will be reflected in the latest version available on the Google Play platform.

In compliance with our commitment to transparency and user privacy, Google Play acknowledges the collection and usage of Device or Other IDs, which may include but are not limited to Advertising ID, Android ID, IMEI (International Mobile Equipment Identity), BSSID (Basic Service Set Identifier), and MAC address. These identifiers play a crucial role in enhancing your experience on the Google Play Android app and are handled with the utmost care to ensure data safety.

- **Purpose of Collection:** Advertising ID: Used for personalized ad experiences and ad-related analytics to provide you with relevant and engaging content. Android ID: Enables the identification of your Android device, assisting in delivering personalized app recommendations and improving overall app performance. IMEI: Collected for device identification and support purposes, aiding in troubleshooting and customer service. BSSID and MAC Address: Utilized for Wi-Fi network identification and connection optimization.
- **Encryption and Security:** All devices or Other IDs are transmitted securely, employing encryption protocols to prevent unauthorized access during data transfer. Stringent security measures are implemented to safeguard these identifiers from potential breaches or unauthorized usage.
- **Limited Access and Purpose:** Access to Device or Other IDs is restricted to authorized personnel for specific and legitimate purposes, as outlined in our Privacy Policy. These identifiers are used exclusively for the designated purposes, ensuring that they are not misused or accessed without proper authorization.
- **User Controls:** Google Play provides users with control over the collection and use of Device or Other IDs. Users can manage preferences related to ad personalization and app recommendations through the app settings.
- **Data Retention:** The retention of Device or Other IDs is governed by strict policies. Data is retained only for the duration necessary to fulfill the intended purposes or as required by applicable laws. By using the Google Play Android app with Version Code 210, you acknowledge and agree to the collection and usage of Device or Other IDs as described in this Data Safety section. We are committed to upholding the highest standards of data protection and continually strive to enhance the security measures in place.

For any inquiries or concerns regarding the handling of Device or Other IDs, please contact our support team through the provided channels.

This Privacy Policy is effective as of the release date of our applications on Google Play, and any updates will be reflected in the latest version available on the Google Play platform.

Changes to this Privacy Policy

We may update this Privacy Policy from time to time, and we will post the updated Privacy Policy on this page. Please come back to this page every now and then to make sure you are familiar with the latest version. Any new policy will be effective from the date it is published by us.
