TST Meeting 9/14/2016

- ~~L3VPN project proposal~~ *(Patrick Liu/Lu Kai/Hongtao Yin)* *postponed*
- Proposal for ONOS performance benchmarking & improvement *(Patrick Liu/Jin Gan)*
  - Mastership assignment test
    - Observed performance worse than "other" controller
  - VTN via RESTConf performance
    - Observed performance spikes with a 3 node cluster
  - Proposal to share test methodologies and testing infrastructure
  - PCEP Device scale
    - Observed reduced scale with 3 node cluster
  - For every test, we should justify why this is an important test for a networking environment, and be very specific about how this can/should be tested.
    - For many reports, we don't know how they are doing or why they are doing what they report
  - Can these performance tests be automated?
    - Some of the tests are being done via GUI at the moment
    - Hopefully, we can automate them in the future
- Community Shout-outs?
- Bug review for RC2 to follow TST meeting
