2.新项目洞察

- Omni Exchange 是跨链去中心化交易平台, 致力于打通不同区块链网络之间的资产交易壁垒。依托多链基础设施, Omni 为 Web3 生态提供高效、安全的去中心化交易与流动性聚合解决方案, 实现跨网络资产的无缝交换与流动性共享。
- Honeypop DEX 是部署在 Scroll 上的去中心化自动做市商(AMM)协议, 具备完全无需许可的特性, 旨在成为该链生态中的核心流动性枢纽, 为用户和项目提供高效、开放的交易与流动性服务。
- Breeze 是构建在 Solana 上的收益引擎, 旨在为任何移动应用快速集成原生收益功能。开发者只需几行代码即可为应用添加非托管、安全且高速的收益分润机制, 帮助产品在不改变用户体验的前提下解锁新的商业模式。Breeze 已获得 Solana 官方、Turnkey 等生态支持, 致力于让“收益集成”变得简单、轻量、即插即用。

三. 行业新动态

1. 本周行业大事件

- Solana 流动性管理平台 Meteora 发布积分查询网站, 第一季快照于6月30日拍摄。Meteora 第二季活动正在进行中, 用户提供流动性可赚取手续费和获得第二季LP激励计划的积分。
- Ethereum L2 网络 Linea 公布空投细节, 计划将总代币供应量的 9% 分配给获得 LXP 的用户, 目前已完成快照和女巫过滤, 10% 将用于奖励早期贡献者, 1% 分配给战略建设者。空投资格检查器即将上线, 将包含门槛值与乘数说明。生态流动性奖励另行从 75% 的生态基金中发放, 与用户空投无关, 该基金设有 10 年解锁期, 专注长期生态建设。剩余 12% 的流通代币将用于交易所流动性等用途, 后续 Linea 还将公布原生收益桥设计和 TGE 时间。
- Fetch.ai 与ICP联合发起的 NextGen Agents Hackathon 黑客松正式启动, 奖金池 30 万美元。该活动鼓励开发者基于 Fetch.ai 生态构建自主 AI 代理, 并连接至 ICP 的去中心化区块链基础设施, 优胜团队还将直接晋级 2025 年世界计算机黑客联盟赛事。

- 去中心化 AI 智能体平台 SIA Nexx 上线旗下投资交易类 multi-Agent 平台，等待名单上的用户现可在完成验证后体验更智能、更高效的 AI Agent 交互体验。更多场景的 multi-Agent 平台将于近期推出。此外，SIA 积分互动规则也已同步上线，用户使用 SIA Agents 可获取积分，参与后续活动。
- Ethena 上线 TON，提供 20% APY(包括 12% 基本 tsUSDe APY+10% TON APY)另外，在 STON.Fi、Fiva Protocol、Eva Protocol 和 Affluent 上也可获得 APY 提升，上限为 10000 tsUSDe。

2.下周即将发生的大事件

- dYdX 基金会旗下全资子公司 dYdX Grants Ltd. 正向 dYdX Chain 社区财政部申请 800 万美元的 DYDX 资金，用于启动并运营新的资助计划，预计可覆盖未来 12 至 18 个月的运行周期。该计划旨在进一步支持 dYdX 生态系统中的开发者、研究人员和贡献者，同时提升整体运营效率与成本效益。经过社区反馈后，相关链上治理提案于8月4日正式启动。
- Rice Robotics 将于8月5日在 TokenFi Launchpad 上推出其 RICE 代币，旨在为人工智能机器人构建去中心化数据市场，推动机器人数据的代币化与 DePIN 扩展。此次预售总额为 75 万美元，占总供应量(10 亿枚)的 10%，估值为 750 万美元，合作方包括 BNB Chain、DWF Labs 和 Floki。RICE 代币将用于激励数据贡献、订阅 AI 模型与参与平台治理，并通过手续费回购实现通缩。Rice 的室内配送机器人已部署至软银东京总部、日本 7-Eleven 等场所，公司今年初获得阿里巴巴创业者基金等机构的 700 万美元 Pre-A 融资。
- Solana Mobile 宣布其第二款智能手机 Seeker 于 2025 年 8 月 4 日开始发货，并同步推出原生代币 SKR。作为 Solana 移动生态的核心资产，SKR 将直接分发给参与生态系统的开发者和用户，旨在激励社区建设与应用增长。

3.上周重要投融资

- RD Technologies, 完成了总额为4000万美元的A2轮融资, 投资方包括 Hongshan、Hivemind Capital等。RD Technologies是一家致力于推动信任、稳定与高效支付的创新型金融科技公司, 核心产品包括以港币支持的稳定币 HKDR 和获得许可的储值支付工具 RD Wallet。公司旨在通过数字货币与合规金融工具的结合, 赋能香港及全球 Web3 经济发展, 支持本地、离岸及海外企业实现多币种、跨境、高效的金融交易。(2025年7月30日)
- Stable, 完成了种子轮融资, 筹集资金2800万美元, 投资方包括 Hack VC、Bitfinex、Castle Island、Franklin Templeton等。Stable 是由 Bitfinex 和 Tether 推出的 Layer 1, 主打以 USDT 作为原生 Gas 实现免费点对点转账。该链支持在稳定币上直接运行智能合约, 具备无 Gas 的用户体验、原生法币端口集成、通过 USDT0 实现的无桥跨链机制, 以及合规架构与优先执行通道, 旨在为 Web3 应用提供稳定、高效、便捷的基础设施。(2025年7月31日)
- Billions, 完成了总额为3000万美元的融资, 投资方包括Coinbase Ventures、Liberty City Ventures、Polychain、Polygon等知名机构。Billions Network 是专注于数字身份验证的网络平台, 旨在构建一个人与 AI 彼此可信的未来。该平台采用零知识证明技术, 致力于为人类和 AI 身份提供可扩展且安全的验证机制, 也是 Sam Altman 加密项目 World 的基础设施之一, 聚焦于可信身份在加密与人工智能时代的核心作用。(2025年7月31日)

Daily Trading Volume & Transaction Fees:

Daily trading volume and transaction fees are key indicators of a public blockchain's activity level and user experience. This week, except for slight increases on Ethereum and Toncoin, other chains generally showed a downward trend. BNB Chain and Sui experienced the most significant declines in volume, dropping 71.9% and 60.9% respectively compared to last week. In terms of transaction fees, Toncoin saw a 70% decrease, Sui fell by 37.5%, while Aptos rose by 40% week-on-week. Fees on other chains remained relatively stable.

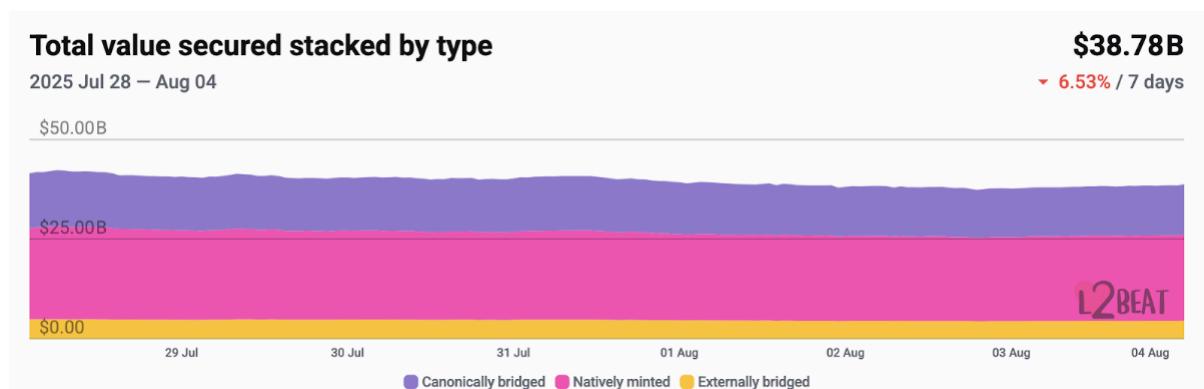

Daily Active Addresses & TVL:

Daily active addresses reflect ecosystem engagement and user stickiness, while TVL (Total Value Locked) indicates the level of user trust in the platform. For daily active addresses, BNB Chain increased by 25.1% compared to last week, Sui dropped by 20.4%, and other chains remained relatively stable. As for TVL, aside

from Toncoin which remained unchanged, all other chains showed a downward trend, with Sui seeing the sharpest decline—down 13.9% from the previous week.

Layer 2 Metrics:

Total TVL: \$38.78 billion, a 6.53% decrease this week.

2. New Project Insights

- Omni Exchange is a cross-chain decentralized trading platform aiming to break down barriers to asset trading across different blockchain networks. Leveraging multi-chain infrastructure, Omni provides the Web3 ecosystem with efficient, secure solutions for decentralized trading and liquidity aggregation, enabling seamless cross-network asset swaps and liquidity sharing.
- Honeypop DEX is a decentralized automated market maker (AMM) protocol deployed on Scroll. Fully permissionless, it aims to become the core liquidity hub within the Scroll ecosystem, offering efficient and open trading and liquidity services for users and projects alike.
- Breeze is a yield engine built on Solana, designed to help any mobile application rapidly integrate native yield functionalities. Developers can add non-custodial, secure, and high-speed yield-sharing mechanisms with just a few lines of code—unlocking new business models without compromising

user experience. Backed by Solana Foundation, Turnkey, and others, Breeze strives to make "yield integration" simple, lightweight, and plug-and-play.

III: Industry Updates

1. Major Industry Events This Week

- Meteora, a liquidity management platform on Solana, launched its points-checking portal, with Season 1 snapshots taken on June 30. Season 2 is currently live, allowing users to earn fees and points by providing liquidity through its LP incentive program.
- Ethereum L2 Linea announced its airdrop details, allocating 9% of the total token supply to users who earned LXP points. Snapshots and Sybil filtering have been completed. Another 10% will reward early contributors, and 1% goes to strategic builders. The eligibility checker will launch soon, outlining thresholds and multipliers. Ecosystem liquidity rewards will be distributed separately from the 75% ecosystem fund (10-year unlock), focused on long-term development. The remaining 12% of tokens will go toward exchange liquidity and other uses. Linea will also unveil its native yield bridge design and TGE schedule.
- Fetch.ai and ICP jointly launched the NextGen Agents Hackathon with a \$300,000 prize pool. Developers are encouraged to build autonomous AI agents on Fetch.ai's ecosystem and connect them to ICP's decentralized infrastructure. Winning teams will qualify directly for the 2025 World Computer Hackathon.
- SIA Nexx, a decentralized AI agent platform, rolled out its multi-agent investment and trading platform. Users on the waitlist can now access a smarter, more efficient AI Agent experience upon verification. Multi-agent

platforms for additional use cases will launch soon. SIA also introduced a points system where users earn rewards by engaging with SIA Agents.

- Ethena added support for [TON](#), offering 20% APY (including 12% base tsUSDe APY + 10% TON APY). Additional APY boosts are available on STON.Fi, Fiva Protocol, Eva Protocol, and Affluent, capped at 10,000 tsUSDe.

2. Upcoming Events Next Week

- dYdX Grants Ltd., a fully-owned subsidiary of dYdX Foundation, has proposed a request for \$8 million in DYDX tokens from the dYdX Chain community treasury to launch and operate a new grant program covering 12–18 months. The goal is to further support developers, researchers, and contributors in the dYdX ecosystem while improving operational efficiency and cost-effectiveness. Following community feedback, the governance proposal went live on-chain on August 4.
- Rice Robotics will launch its RICE token on TokenFi Launchpad on August 5. The project aims to create a decentralized data marketplace for AI robots, enabling data tokenization and DePIN expansion. The presale will raise \$750,000 (10% of the total 1 billion RICE tokens) at a \$7.5 million valuation. Backers include BNB Chain, DWF Labs, and Floki. RICE tokens will be used for data contribution rewards, AI model subscriptions, governance, and deflationary buybacks. Rice's delivery robots have been deployed in SoftBank HQ Tokyo and Japan's 7-Eleven stores. The company previously raised \$7 million in Pre-A funding from Alibaba Entrepreneurs Fund and others.
- Solana Mobile announced that its second smartphone, Seeker, will begin shipping on August 4, 2025. Simultaneously, it will launch a native token, SKR, which will be distributed directly to ecosystem developers and users to incentivize growth and community participation.

3. Notable Investments Last Week

- RD Technologies raised \$40 million in its Series A2 round, backed by investors such as Hongshan and Hivemind Capital. The fintech firm focuses on trusted, stable, and efficient payments, with core products including HKD-backed stablecoin HKDR and the licensed stored-value payment tool RD Wallet. RD aims to empower Web3 economic development in Hong Kong and beyond by integrating digital currency with compliant financial tools. (July 30, 2025)
- Stable raised \$28 million in a seed round with investors including Hack VC, Bitfinex, Castle Island, and Franklin Templeton. Developed by Bitfinex and Tether, Stable is a Layer 1 chain using USDT as native gas, enabling gas-free peer-to-peer transfers. The chain supports smart contracts on stablecoins, native fiat integration, bridge-less cross-chain via USDT0, and a compliance-first framework with priority execution channels—positioning it as stable and efficient infrastructure for Web3. (July 31, 2025)
- Billions raised \$30 million from investors like Coinbase Ventures, Liberty City Ventures, Polychain, and Polygon. Billions Network focuses on digital identity verification, aiming to build a future of trust between humans and AI. Using zero-knowledge proof technology, the platform offers scalable, secure identity systems for both people and machines. It also serves as infrastructure for Sam Altman's crypto project World, emphasizing the central role of verifiable identity in the age of crypto and AI. (July 31, 2025)
