

## ABOUT GIPC

Global Intellectual Property Convention (GIPC) is Asia's leading conference designed for in-house IP counsels and innovators to interact with IP attorneys from around the world to discuss the latest trends, opportunities, and challenges in the field of IP which is necessary for the optimisation and leveraging of IP Assets.

GIPC is organised by the Institute of International Trade, Kolkata, and managed by ITAG Business Solutions Ltd., Kolkata, since 2009. To date, more than 3900 participants from more than 50 countries have taken part in the conference.

It is the favourite learning and networking destination in India for IP fraternity from well-known law firms, multinational organizations, service providers and government office bearers from India and countries like USA, Canada, Brazil, Russia, UK, Germany, Japan, Australia, Hong Kong, Zimbabwe, Nigeria et al. Speakers from USPTO, WIPO, IPO, JPO, EPO, ARIPO, and many other international IP organizations have shared their ideas and vision about innovation and IP.

The intellectual property industry in India has been growing rapidly in recent years. According to a report by the Indian Brand Equity Foundation, the size of the intellectual property industry in India was estimated to be around US\$ 7.5 billion in 2020, and it is expected to grow at a CAGR of around 10% between 2021-2026.

The report highlights that the major segments of the Indian intellectual property industry include trademarks, patents, copyrights, and designs. The trademarks segment is the largest, accounting for around 80% of the total industry size, followed by patents, which account for around 15%.

The report also notes that the Indian government has taken several initiatives to promote the intellectual property industry in the country. These include the establishment of specialized intellectual property courts, the introduction of expedited examination of patent applications, and the launch of various schemes and programs to support the filing and registration of IP.

Overall, the intellectual property industry in India is poised for significant growth in the coming years, and it is expected to play a crucial role in driving innovation and economic growth in the country.

-

11

According to the Ministry of Commerce and Industry, the number of patent filings climbed from 42,763 in 2014-15 to 66,440 in 2021-22 due to the government's efforts to strengthen the country's intellectual property rights (IPR) framework. It also stated that India would grant

30,074 patents in 2021-22, up from 5,978 in 2014-15. The time it takes to examine a patent has also decreased from 72 months in 2016 to 5-23 months.

The Ministry said that the number of domestic patent filings at the Indian Patent (IP) office surpassed the number of international patent filings for the first time in 11 years. It went on to say that out of the total 19,796 patent applications filed, Indian applicants filed 10,706, and non-Indian applicants filed 9,090.

The Department for Promotion of Industry and Internal trade (DPIIT) and the IP office have collaborated to raise awareness among all strata of society. These efforts have increased the number of IPR filings while also lowering the number of patent applications pending.

-

12

India is fast emerging as a global R&D hub. Around 30 per cent of the top 1,000 global R&D spending organisations have centres in India. India's R&D investment growth is likely to outpace overall Gross Domestic Product (GDP) growth.

India is increasingly seen as a product development destination. Companies are now offshoring complete product responsibility, including complex services such as product management. Contract research is a fast-growing segment in the Indian healthcare industry.
