

Lucky Lock Touch D1 Product Features and Information

Introducing the Lucky Lock Fingerprint Smart IoT Lock Touch D1 – the perfect blend of style, security, and convenience for your home. This cutting-edge smart lock is designed specifically for Australian doors and offers a seamless, keyless entry experience that you'll love.

Key Points:

1. **Easy Keyless Access:** Say goodbye to the hassle of keys with the Touch D1's advanced fingerprint technology. With a quick scan of your finger, you'll have instant access to your home.
2. **Beautiful Design for Australian Doors:** The Lucky Lock Touch D1 is meticulously crafted with high-quality metal finishes to suit most Australian door's style and thickness (35-45 mm). It's not just about function – it's about adding a touch of elegance to your home.
3. **Effortless Set-Up:** Using the Lucky Lock Touch D1 is a breeze once it's installed. The lock comes with clear instructions and can easily replace the existing deadbolts on most Australian external and internal doors, making the process straightforward and hassle-free.

We take pride in offering products made of quality. Lucky Lock provides 2 years warranty over electronic parts (vs. 1 year for many other locks) and 3 years of warranty over the mechanical parts.

What's in the box

- Interior Assembly
- Exterior Assembly
- Latchbolt + Strike
- Backup Keys x 2
- Contactless Tags x 2
- User Guide
- Drill Template

Features:

Adjusting the volume

- Depending on your preference, you can adjust the volume to higher, lower or even set the lock to mute.

One-time Dynamic Passcode

- When you are away and have a visitor, you can give them temporary access by sending them a one-time passcode. It will last for 5 minutes. As the passcode is generated based on a secure algorithm, you can use it offline without any Bluetooth/WiFi connection.

Anti-peeping passcode

- You can unlock the door by adding any random digits before or after your real passcode if there is someone nearby when you open the door.
- For example, if your passcode is **241317**, you can enter **127241317** or **2413179273** to unlock the door.

Contactless tags:

- Apart from the fingerprints and passcodes, you can also register the contactless tags on the app and swipe the tag to open the door. It is especially useful for the elderly in the household because their fingerprints could start to fade and become hard to read.

Temporary users:

- Under member management, users can set up accounts with temporary validity periods. They can recall the access easily if the temporary accounts are no longer needed.
