In 1519, *Hernando* Cortez led his army of Spanish Conquistadors into Mexico. Equipped with horses, shining armor, and the most advanced weapons of the sixteenth century, he fought his way from the flat coastal area into the mountains highlands. Cortez was looking for gold. And he was sure that Indian groups in Mexico had mined large amounts of the precious metal. First, he conquered the groups and then seized their precious gold. His method was very organized.

Initially, Cortez defeated the *Tiascalans*, and then formed an alliance with them to defeat the Aztecs, their enemies. Because of an Aztec prophecy about the return of Quetzecoad a legendary god-king who was light skinned and bearded, Cortez was believed to be a god and was received by the Aztecs with honor. Later, this warm welcome turned to mistrust and hatred when he Spaniards mistreated the Aztec people. Eventually, the Aztec capital, Tenochtitlan, fell to the Spaniards. Cortez had Tenochtitlan razed and built Mexico City on its ruins.

Dr. Magill has more than 20 years' experience in nuclear science and is the author of four books, more than 150 scientific publications and 10 patents.

Following a Ph.D. in computer simulation of laser driven fusion processes, he took up a position as theoretical physicist with the European Commission. He is one of the pioneers of the field of laser nuclear science in which nuclear reactions are induced by lasers – thereby offering a simple and inexpensive way of studying nuclear processes without a nuclear reactor or particle accelerator. Dr. Magill was a member of the Technical

Working group on ADS and is one of the authors of the report: “A European Roadmap for Accelerator Driven Systems for Nuclear Waste Transmutation”. He has acted as consultant to the IAEA in Vienna on Partitioning and Transmutation of Nuclear Waste, and coordinated a European benchmark exercise on radio toxicity of spent nuclear fuel. Dr. Magill is an author on radiochemistry and nuclear chemistry in the Encyclopedia of Life Support Systems or EOLSS, an interdisciplinary encyclopedia sponsored by UNESCO.

He is currently sector head of Advanced Nuclear Studies and action leader for Knowledge Management, Education and Training at the Joint Research Centre in Karlsruhe, Germany. Dr. Magill is also the JRC representative on Education, Training and Knowledge Management working group of the Sustainable Nuclear Energy Technology Platform (SNETP).

He is the originator of Nuclides 2000, Nuclides.net, and the Nucleonic Nuclear Science Portal. Since 2003 he has been responsible for the organization of nuclear science training courses based on the use of this internet technology. His current activities also include the management of the Karlsruhe Nuclide Chart –and the publication of the latest 7th edition.
