## OLD TIME RADIO SHOWS

I have narcolepsy and delayed sleep phase syndrome. When I was a teen, I would often find myself bored af at night.

To entertain myself, I used to listen to old time radio shows on KNX (Los Angeles); they had a few hours between 9-11PM where they had the Golden Age of Radio. (At least, I think that's what they called it. XD)

My grandmother, who was born in the 30's, always told me how she used to gather around the radio as a fam. It was really just a way to get away from all the nasty things that were happening during her lifetime. So they hold a very special place for me, because she'd always tell me about how important they were to her.

There are sites that allow you to download these shows, but they may be unsecure, so I recommend listening to them on YT instead of OTR, etc.
