## Abstract

Asian Journal of Logistics and Intermodal Transport Management (AJLITM) is established at the Faculty of Logistics, Burapha University. AJLITM's purpose is to collect, disseminate, and develop knowledge in logistics and supply chain management in sustainability and smart covering, including modes of transportation and multi-modal transportation in Asia and the world. This journal is an international journal that submits research articles and academic articles from all countries.

**Keywords:** First keyword, Second keyword, Third keyword, Fourth keyword

## 1. Introduction

AJLITM scope research articles and academic articles in management science and engineering operations in logistics and transport research, including:

- Logistics and supply chain management,
- Modes of transportation management (Road, Air, Maritime, and Multimodal transport),
- Inbound and outbound distribution,
- Sustainability transport and logistics management,
- Smart and automatic transport and logistics management,

- Performance and operation transport and logistics management.

## 2. Literature review

**Definition 2.1.** [1].

**Lemma 2.2.** [2].

**Theorem 2.3.** [3].

## 3. Model development

**Definition 3.1.**

**Lemma 3.2.**

**Theorem 3.3.**

**Proof.**

**Corollary 3.4.**

**Remark 3.5.**

## 4. Comparative analysis

### Example 4.1.

## 5. Extensions

## 6. Conclusion and discussion

## Declaration of competing interest

The authors declare that they have no affiliations with or involvement in any organization or entity with any financial interest in the subject matter or materials discussed in this manuscript.

### Author Contributions

Authorname1: investigation, writing-original draft and software.

Authorname2: conceptualization and writing-review.

Authorname3: supervision, conceptualization and writing-review.
