Dear administration,

After looking at several colleges in the area that offer classes for doctor or veterinarian degree I have chosen to apply to your college. I have been interested in being a veterinarian or a doctor since I was young. I don't have much experience with doctoring but I do have pets and know how to care for them.

My experience with animals consist of volunteering at an animal shelter assisting in the care of wounded animals. The joy of helping animals is overwhelming and there isn't a better feeling than helping others whether it be a human or an animal

I have taken 4 years of FFA showing and caring for my animals. Going to shows with my goat and pig that I have spent time training and caring for.

I appreciate your consideration into your veterinarian or doctor program. I hope to hear from you soon so that we can schedule a meeting.

Sincerely,

Madison K Hoagland
