	2. The message is meant for Linh.	
	3. Joy and Linh often meet for dinner on Friday.	
	4. Joy is with Linh on a business trip to town.	

PART 2 – Questions 8-15

Read the passage and answer questions 8-15.

Fifty-two-year-old American Henry Evans is one of the world's first teletourists. From the comfort of his bed in Palo Alto, California, he has travelled to places as far away as Bora Bora in the South Pacific. Under normal circumstances, this journey would be impossible for Henry because he is disabled. A serious stroke when he was 40 affected his brain and left him without speech and unable to use his arms or legs. But with the help of technology, Henry is able to deal with his difficulties and get out to see the world.

When Henry wants to visit a museum, he uses a telepresence robot called the Beam, a big computer monitor with a webcam that is attached to a mobile base with two poles. Using head movements, he can drive the machine around the halls, talking to the guide and learning about the exhibits, just like any other visitor. Several of the world's museums already use these machines, and Henry hopes there will soon be more.

[A] To see what is happening outside, Henry uses a device called Polly. Like the Beam, Polly is **made up** of a monitor and a webcam, the difference being that it is small enough to be portable. The gadget fits into a frame attached to a person's shoulder allowing **it** to be carried around

Question 14. Which of the following can be inferred about Henry from the last paragraph of the passage?

- A. He has already been approved to use a robot on the International Space Station.
- B. He has little hope of achieving his goal of exploring space remotely.
- C. He has shifted his focus from using drones to controlling robots in space.
- D. He is determined to keep exploring new possibilities despite his disability.

Question 15. Which sentence best summarizes the main idea of the passage?

- A. Henry Evans, at 52, uses advanced technology to help other disabled individuals experience the world in ways they couldn't before.
- B. Henry Evans, a disabled American, has explored space using innovative technologies like telepresence robots and drones.
- C. Henry Evans, a 52-year-old American, explores the world using telepresence robots and drones, aiming to one day travel to space.
- D. Henry Evans, an American inventor, designs telepresence robots and drones to enable disabled individuals to travel virtually.

PART 3 – Questions 16-20

PART 4 – Questions 21-25

Read the text and fill in ONE word which best fits each gap.

We know sleep is an activity we can't do without, yet we let our hectic lifestyle wear us down until we can't (21) _____ from bed in the morning. We know the longer we go without sleep, the more likely we are to have (22) _____ accident, and when that happens, this will be the unhappiest moment we've been through in our life. It's safe to say that too many people have come up against this problem. But there's no need for us to make ourselves tired over a lack of sleep. Now it seems as if people are bouncing back from this terrible (23) _____ torture by taking mid-day naps. Some may think it makes them look lazy to the boss, but these days aren't as old-fashioned (24) _____ we might expect, and such ideas as napping at work are catching (25) _____. It's been proven by researchers that a mid-day nap increases productivity, and more employees are changing their tune about the practice.
