Use a calculator to find the answers to the calculations within the brackets.

Turn the calculator upside down and it will appear like a word. Use these to fill in the gaps in the story.

Hint:
$$1 = I$$
, $2 = Z$ $3 = E$, $4 = h$, $5 = S$, $6 = g$, $7 = L$, $8 = B$

Santa had just finished loading the (3691 x 125) Sleigh when (10+ 24) he realised he couldn't (67 x 5) see a single reindeer.

(27689 x 2) "Bless me", he said, "where can they have gone? If we don't (60÷100) go soon we'll never get round all the children tonight." He grabbed (900 – 386) his (2395+5343) bell and rang it loudly. He waited and listened, but nothing happened. "Come on boys," he muttered, "or (1191 x 3) else I'll have to phone the (2÷100) Zoo and (319 x 2) ____beg____ them to send some more deer."

Just then there came a (8×47077) giggle from behind the stables. First Santa saw a pair of (23596 + 33738) heels then two (1879×3) legs then at last the whole of Rudolph appeared. $(8.5074 \div 11)$

"Hell <u>Santa</u>. Did you like our joke? Don't look so worried. The others are all ready but they're hiding in a (463×8) hole in the (6×9619) hills" He smiled. They know you're the (9000 - 3492) boss really."

"Alright, come on , let's (12 \div 20) go," said Santa with a big (923 x 5) sigh of relief. He got out (257 x 2) his list. "Now, let's see, I've got the computer for (28867 x 11) Leslie and the (637 \div 1000) for Gemma, the bike for (3 x 246017) isobel, and
