9	Outdoor Classroom & Gazebo & Lighting *Example only:*	Diane and Daphne met with Andy Selig on 23 March to share discussions from 8 March. Estimates: To refurbish or to move the gazebo up to $2000 depending on a more in-depth analysis (crane vs. flatbed vs. forklift). If moved, what is the stability of the gazebo (was built in place). Removal of the

		gazebo would be free and handled by the Property Services Department of the SSRCE. To order two of the prefabricated structures would see construction/installation hopefully in the summer. Once location of the outdoor classrooms is confirmed they will finalize lighting needs and install. We were told we are next on the list.
10	Gaga Pit & Play Structures   	Uplift Grant – Gaga Pit – located and priced – we have missed the funding deadline. Hoping it will be delivered by Fall. Play Structure: too expensive with the leftover funding; students asked for more seating as their #3 choice; 3 or 4 buddy benches delivered would be possible in the gazebo space
