

Eclipse IoT Working Group Call

Minutes, March 24, 2020

Agenda

Add agenda points at any time in the [permanent agenda](#) document.

1. Instant messaging platform
2. Testbeds update and revamp
3. Project update: Eclipse IoT Packages
4. Community news
5. Varia

Attendees

Dejan Bosanac
Benjamin Cabé
Laurent Carré
Frédéric Desbiens
Miguel Ferreira
Christian Glomb
Jereme Haack
George Hernandez
Kilton Hopkins
Kai Hudalla
Thomas Jäckle
Matteo Maiero
Kevin Olotu
Jens Reimann
Alois Zoitl

Recording

1. Instant Messaging Platform

The survey is over. The final tally is:

- Gitter — 15
- Mattermost — 5
- Slack — 16
- Other — 2

Slack is the winner. An Eclipse IoT workspace will be created.

April 1st update: An [invite link](#) is available. Click on it to join the workspace.

2. Testbeds update and revamp

Matteo Maiero highlighted that the demos for our [current testbeds](#) are broken. He asked working group members if they are willing to second Eurotech in repairing them and refreshing the related content on our website, since some of the organizations mentioned have left the Eclipse Foundation.

Benjamin Cabé mentioned that it is difficult to have a discussion on this topic, since we do not have an official definition of what a testbed is. Jens Reimann commented that maybe a live cloud hosted demo is not a mandatory requirement. Several attendees agreed that making sample code available is a useful tool to drive adoption of Eclipse IoT technologies.

Call participants agreed to continue the discussion on this topic during next month's call.

3. [IoT Packages](#) project update

The project delivered the initial version of [Cloud2Edge](#), its very first package. Cloud2Edge deploys a pre-configured IoT cloud backend made of [Eclipse Ditto](#), [Eclipse hawkBit](#) and [Eclipse Hono](#).

The IoT Packages project also hosts individual Helm charts for the projects mentioned above. Edgeworx intends to contribute a Helm chart for [Eclipse ioFog](#) to the project soon.

4. Project News

There was not enough time to cover that point.

5. Varia

No points were added to the agenda.
